

A Unified Patient-Pharmacy Experience

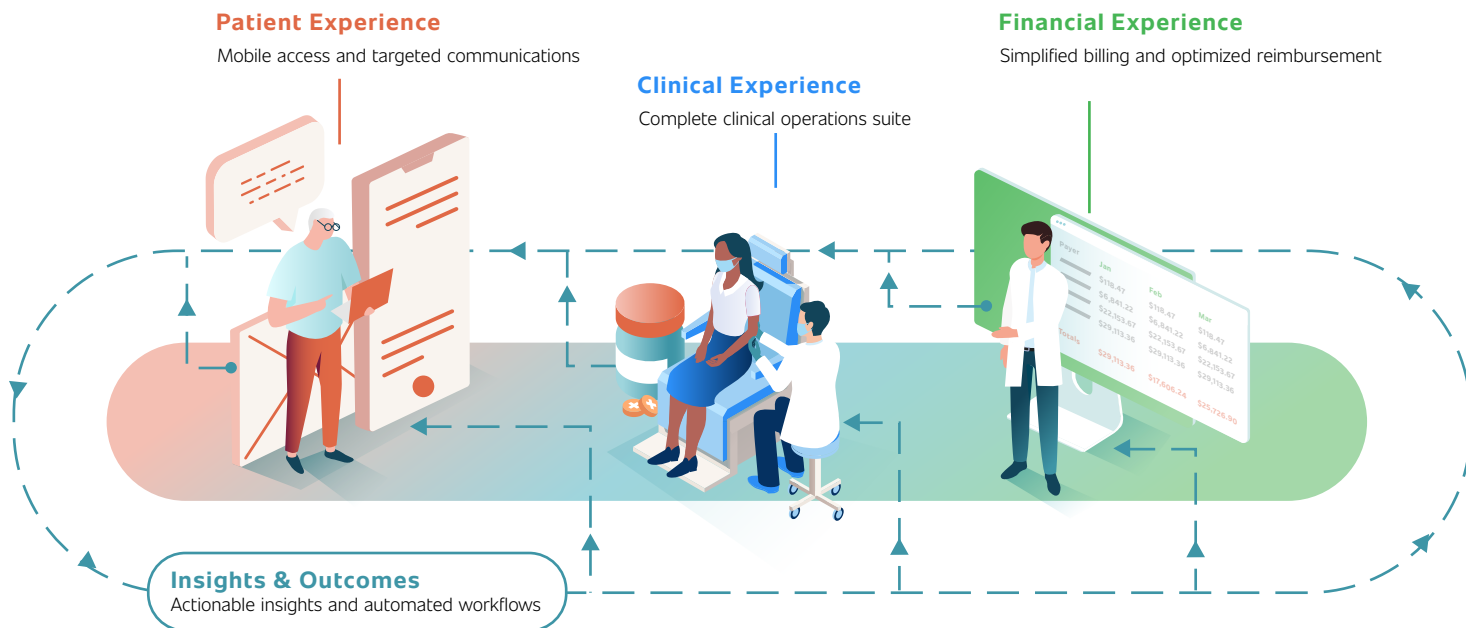

Pharmacies are under pressure to do more — deliver better patient outcomes, capture new revenue streams, and compete in an increasingly digital healthcare landscape — with the same staff and the same hours in the day. EnlivenHealth empowers pharmacies to do just that.

Trusted by more than 44,000 pharmacies nationwide, EnlivenHealth provides the technology infrastructure that helps pharmacies run smarter:

- engaging patients proactively
- coordinating care more efficiently
- turning every interaction into an opportunity to strength long-term health and business results

At the heart of EnlivenHealth is e360, the industry's only unified pharmacy platform. Rather than forcing pharmacy teams to navigate a patchwork of disconnected tools, e360 brings patient engagement, clinical operations, financial management, and analytics together under a single login. That integration isn't just a convenience — it frees pharmacists to practice at the top of their license, spend less time on administrative coordination, and more time delivering the personalized care that keeps patients healthy and loyal to their pharmacy.

Delivering enterprise-grade innovation to pharmacies of every size — independent, retail chain, health system, specialty, and long-term care.

EnlivenHealth Products & Solution

EnlivenHealth's complete solutions offering is built on e360 — the first and only unified pharmacy platform. With a single sign-on, pharmacy teams can manage every patient, clinical, financial, and analytic workflow in one place. No toggling between systems. No duplicated effort. Just time back for the work that matters.
