

Your Complete Clinical Pharmacy Solution

Transform Your Pharmacy into a Revenue-Generating Clinical Care Provider

EnlivenHealth Treat is an advanced, integrated platform that allows pharmacies to easily identify patient opportunities, provide appropriate clinical care, and bill for those services—all in one seamless workflow. This powerful, proven solution brings together everything you need to establish or expand your clinical practice.

By streamlining time-consuming manual tasks, pharmacists can improve workflow efficiencies, allowing more time to deliver high-touch clinical services such as: vaccinations, point-of-care testing, wellness services, medication therapy management, preventative services, test and treat, and more. Expanding your clinical services allows you to enhance the patient experience, build long-term patient relationships, and measurably improve both patient health and business outcomes.

Powerful Benefits of EnlivenHealth Treat

Transforms your pharmacy's clinical practices and business results to grow and thrive in this new era of digital-driven healthcare

Proactively identifies, engages, and manages high-value populations to measurably improve patient health outcomes

Empowers pharmacies to deliver personalized clinical care that strengthens, expands, and retains patient relationships

Integrates clinical workflows with medical billing to enable pharmacies to shift from dispensing to clinical care delivery and grow pharmacy revenue

EnlivenHealth Treat delivers everything you need to transform your pharmacy from a dispensing center into a profitable clinical services provider — all in one integrated solution.

Enhanced Key Features Designed for Today's Pharmacy

Custom Clinical Workflow with Encounter Templates

- Create customized workflows for clinical educational programs, diagnostic testing, and other state-approved clinical protocols
- Pre-populate repetitive information to save time
