

# Transform Your Pharmacy's Financial Health

**Safeguard your pharmacy's revenue with automated claims reconciliation that puts you back in control.**

Effectively managing third-party receivables shouldn't consume your valuable time. EnlivenHealth Reconcile delivers a proven pharmacy claims reconciliation solution that provides real-time visibility into payment statuses, identifies missing payments, and ensures you receive every dollar you're owed.

## Benefits That Transform Your Business

### **Maximize Reimbursement Revenue**

Capture every dollar owed to your pharmacy with automated identification of underpaid claims and missing payments.

### **Gain Real-Time Financial Clarity**

Access comprehensive financial data instantly with our enhanced Ledger feature, showing payment statuses, partial payments, and outstanding balances in real-time.

### **Reduce Administrative Burden**

Free your staff from time-consuming manual reconciliation with streamlined workflows and automated payment tracking.

### **Improve Cash Flow Management**

Make informed business decisions with clear visibility into receivables, aged claims, and expected payments.

### **Enhance Financial Planning**

Leverage accurate financial insights from our improved reporting tools to better forecast revenue and manage your pharmacy's financial future.

Reconcile helps you transform the financial side of your pharmacy from a constant worry into a competitive advantage.

# Taking Control Of Your Pharmacy's Financial Future

In today's challenging pharmacy environment, understanding your financial position is critical to success. Many pharmacies struggle with:

- Manual, time-consuming reconciliation processes
- Limited visibility into outstanding claims
- Difficulty tracking partial payments
- Wasted time chasing down missing reimbursements
- Unclear financial reporting for decision-making

EnlivenHealth Reconcile transforms these challenges into opportunities by automating the entire reconciliation process. Our solution provides real-time financial tracking with expanded visibility into each claim's payment status, giving you a clearer picture of your pharmacy's financial health.

## Practical Applications

- Identify slow-paying third parties
- Track missing claims payments or checks
- Monitor partially paid claims
- Generate comprehensive financial reports
- Reduce unreconciled payments older than 60 days

With EnlivenHealth Reconcile, you'll spend less time managing claims and more time focusing on what matters most—your patients.

**Stop leaving money on the table. Choose EnlivenHealth Reconcile to safeguard the financial side of your pharmacy business.**

## Enhanced Ledger Functionality

- Track payments for prescription claims in real-time
- Monitor individual claim statuses with expanded visibility
- View original claim amounts alongside payments received
- Identify outstanding balances at a glance

## Comprehensive Financial Tracking

- Follow partial payments automatically
- See payment statuses instantly
- Identify discrepancies sooner
- Access real-time aging reports

## Streamlined Workflow

- Maintain your existing day-to-day processes
- Process EOBs exactly as before
- Search functions remain intuitive and familiar
- Experience minimal learning curve

## Flexible Service Options

- **Reconcile Auto:** Automatically collect 835 files and match payments
- **Reconcile Complete:** Full-service solution with dedicated reconciliation analyst
- **Reconcile Excellence:** White Glove service with EnlivenHealth senior lead specialists and monthly business reviews
- Choose the level of support that fits your pharmacy's needs

## Improved Reporting

- Generate accurate financial insights
- Access detailed aging reports
- Track payments by payer
- Analyze claim processing trends

Contact EnlivenHealth today to discover how Reconcile can transform your pharmacy's financial operations.
