

The Legacy Hotel & Event Center

Despite hosting hundreds of weddings and events each year, Medina lacked a hotel or dedicated venue to meet the growing demand. The city needed a hospitality anchor, a place that could host visitors, support community events, and reflect the charm of its historic downtown.

AVID Architects partnered with the development team to design a boutique hotel and event center that blends local character with modern features. The team navigated site constraints, public approvals, and historic design standards, all while aligning with Marriott's Tribute Portfolio. A collaborative design-build approach and in-house MEP coordination kept the project efficient, flexible, and on track.

Now under construction, The Legacy Hotel represents a major step forward in Medina's downtown evolution, proof that thoughtful design and strong partnerships can deliver meaningful impact at a local level.
