

Akron Children's Pediatrics Jackson Township

Akron Children's Hospital sought to expand pediatric primary care into Jackson Township to improve accessibility for families and strengthen the health system's presence in Stark County. The goal was to deliver a new, community-based facility that extended Akron Children's trusted care model while meeting an aggressive one-year schedule from initial approval to opening day.

AVID leveraged its deep experience with Akron Children's to quickly develop a proven program tailored to the site. This familiarity allowed the team to fast-track design and move swiftly into construction documents. Working closely with the construction manager with support from AVID's in-house MEP engineering team, the project achieved permitting just weeks after design approval, keeping the accelerated timeline on track.

The new facility includes 23 primary care exam rooms and two child guidance rooms. Completed on schedule, this new location brings high-quality pediatric care directly into the community.

LOCATION	GROSS SF	PROJECT COST	YEAR COMPLETE
