Our difference

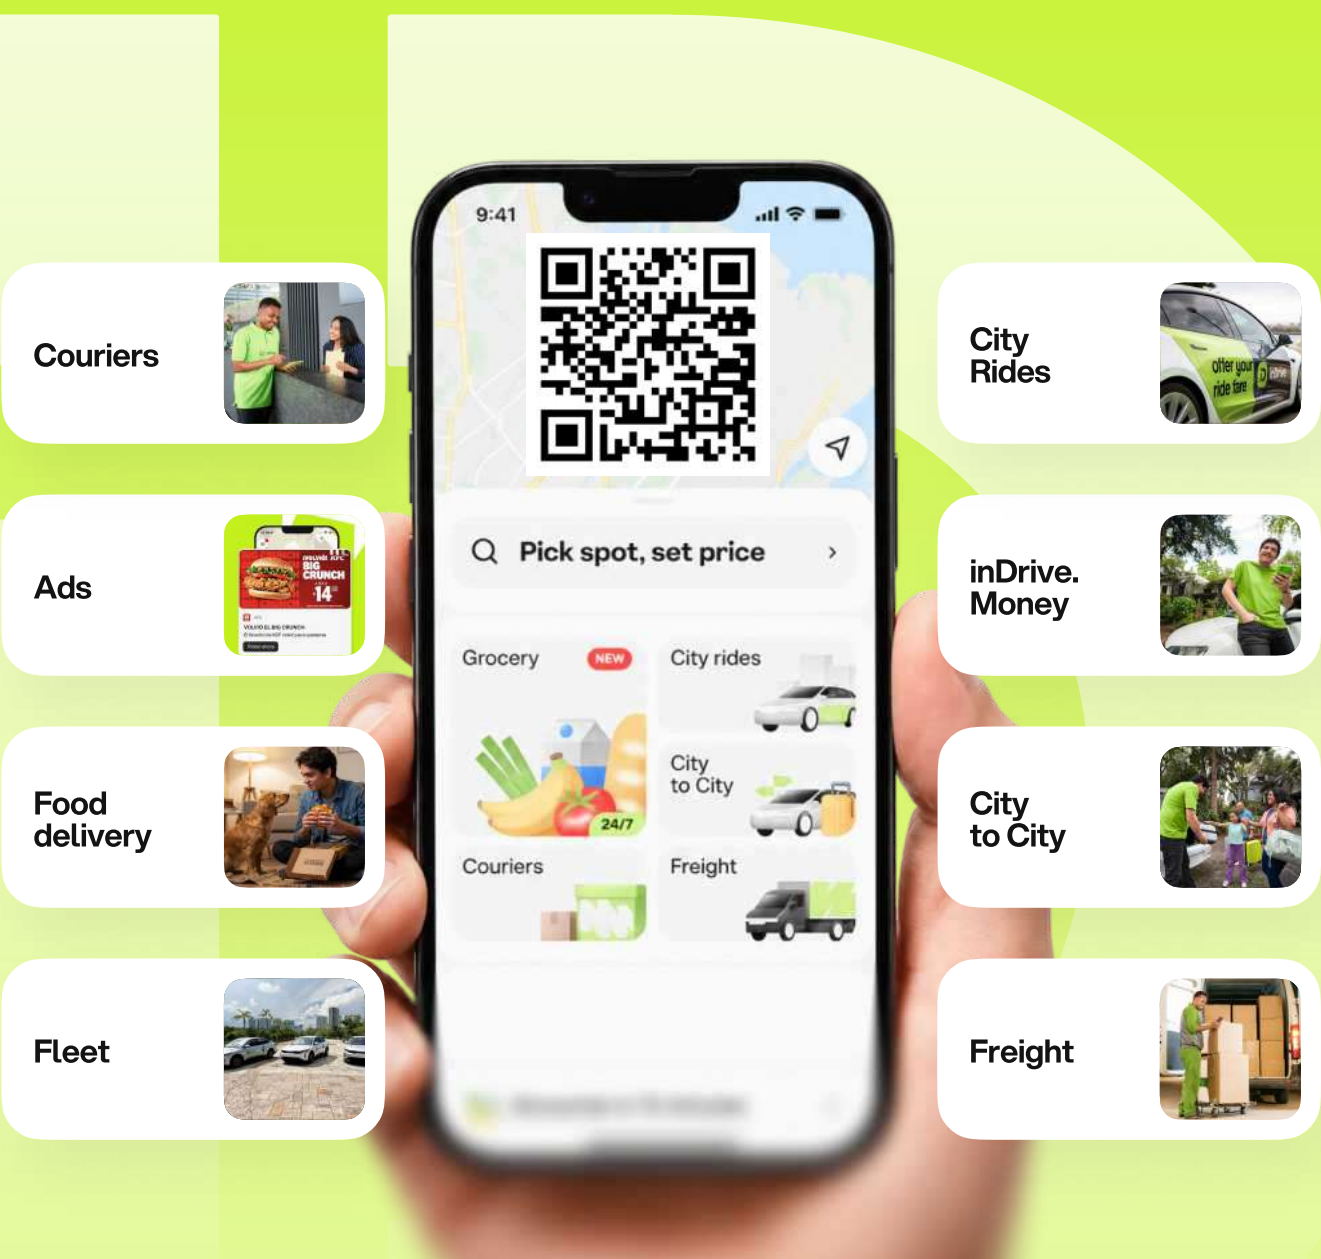

inDrive's peer-to-peer pricing model where passengers and drivers negotiate fares directly gives users a genuine say in the cost of every journey. We provide a direct alternative to opaque surge pricing and algorithmically imposed fares. See how it works [here](#).

Passenger Driver

- ✓ Choice of driver
- ✓ Choice of ETA
- ✓ Choice of price
- ✓ Choice of passenger
- ✓ Low commission
- ✓ Choice of price

Growing ecosystem

We are building a [marketplace](#) that connects users to their local communities through our growing ecosystem of interconnected services.

2025 Financial Performance

Gross Bookings
Up 30% year-over-year

\$6.4B

Revenue
Up 31% year-over-year

\$601.6M

Positive — Profitability
Positive EBITDA and net income achieved

* Preliminary unaudited results for full-year 2025. Gross Bookings represent the total value of completed rides and deliveries across the inDrive platform before deductions such as driver earnings, incentives, refunds, and other adjustments.
