THE OXFORD LEARNING EXPERIENCE

Our award-winning Oxford programmes are built on small-group learning led by expert tutors, many holding Oxford or Cambridge academic backgrounds. With fewer than eight students in a class, teaching runs as seminar and tutorial discussion — deeper questions, sharper thinking, and personalised feedback on your own work.

You will study in historic college settings in Oxford, in the same spaces where generations of students have grappled with difficult questions. Beyond the classroom, hands-on projects, excursions, and social activities build the analytical skill and confidence students carry into what comes next.

FEATURED SUBJECT AREAS

Law

Explore legal reasoning through case studies and mooting, building skills in argument, evidence, and defending views under pressure.

Philosophy, Politics and Economics

Politics, philosophy, and economics come together to explore ideas about justice, power, and markets, encouraging interdisciplinary thinking across fields.

Medicine

A grounding in cell biology and its connection to the human body, exploring disease, normal function, and advances in treatment.

18-24

2027 TUITION

£5,495 – £9,995

Specific start and end dates may vary by age group. Full programmes, dates, and tuition at atlassummercourses.com

GET TO KNOW OUR STUDENTS

Our Oxford programmes are designed for students aged 13–24, across a wide range of academic interests and career goals. Students are split by age group to ensure the right learning approach at every stage. Tutors shape course content around students' interests rather than following a fixed curriculum.

Ages 13–15

Two daily lessons with Oxford tutors in small classes, plus directed study sessions with on-course staff on hand. Guided city tours and orientations help students discover Oxford, while planned activities, excursions, and social events build confidence and lasting friendships in a supportive setting.

Ages 16–17

Academic work deepens through seminars, tutorials, and independent study, with goal-setting and reflection sessions supporting personal growth. University fairs and college visits offer insight into higher education, and built-in free time encourages responsibility and curiosity.

Ages 18–24

Independent study takes precedence, letting students explore topics beyond seminars and develop their own ideas. Industry insight discussions and future pathways sessions offer career guidance, while evening socials, college visits, formal dinners, and a graduation ceremony close the summer.

**Activities vary depending on tier.*

FIELDS OF STUDY

English Literature	Creative Writing	Psychology
Philosophy	Architecture	History
Economics	Business	Computer Science
Law	PPE	Engineering
Medicine	Psychology	and more...
Mathematics	International Relations	

IMMERSIVE EXPERIENCES

Ashmolean Museum

One of the world's oldest museums, founded in 1683, with over 1 million objects spanning ancient Egypt to contemporary art.

British Museum

Located in the heart of London, it is one of the world's most renowned museums, home to over 8 million artifacts from around the globe.

Tower of London

A historic castle and fortress that has served as a royal palace, a prison, and even a zoo over the course of its many centuries.

“The experience was incredible, I literally couldn't have asked for more. Education wise, I learned a lot of new things which possibly will become usefull futher in my life. However, the most unforgettable part for sure would be the friends I made and the people I met.
