There are not enough EV chargers in the world.

Less than 10% of short-term rentals around the world offer EV charging. The ones that do give their electricity away for free.

Electricity is expensive.

Stop losing bookings to the hotel down the street.

EV drivers stay where they can charge.

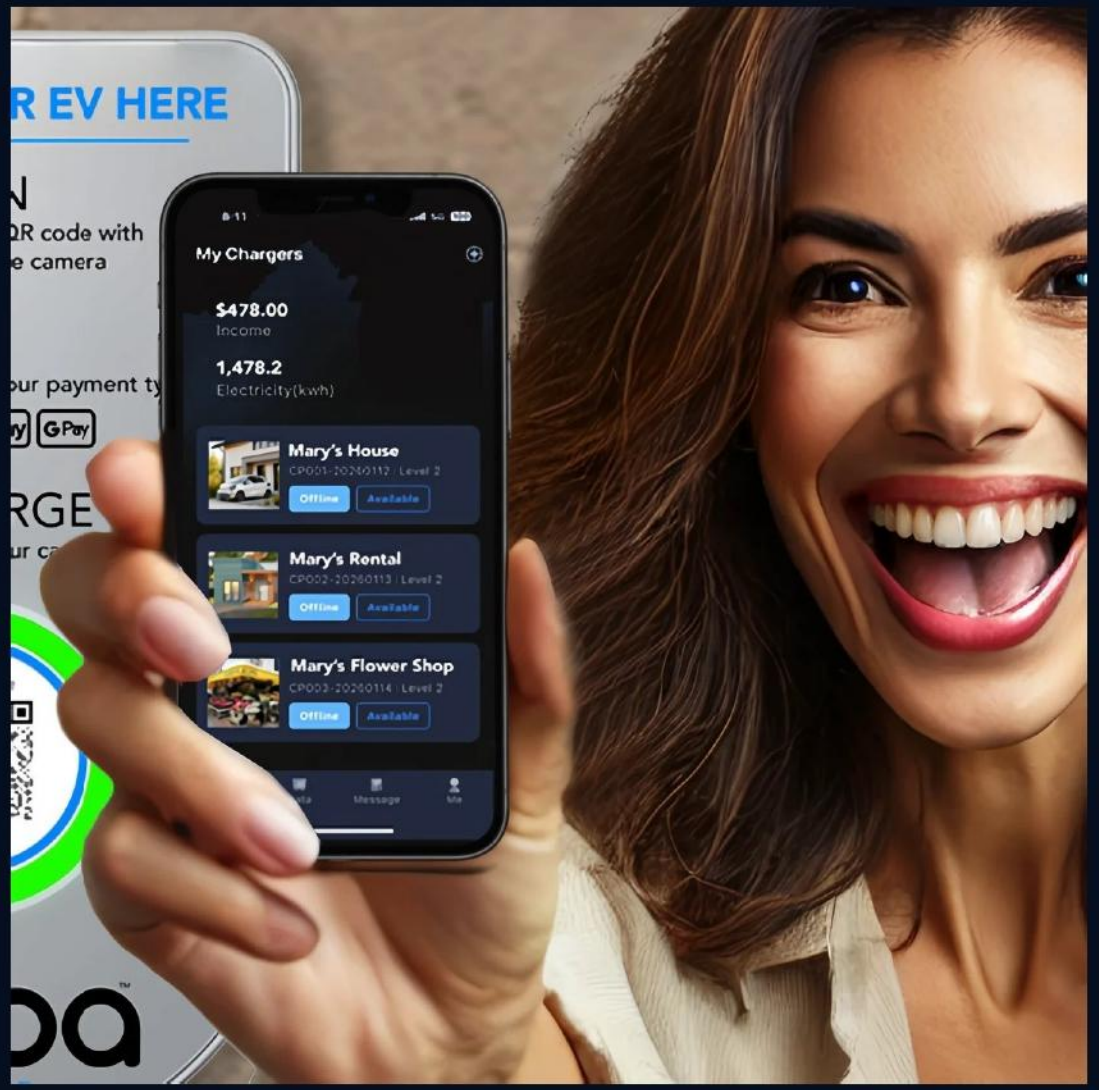

~500

EV chargers sold in 3 months, with almost no marketing.

Boba Charge is looking for UK & European partners.

Will it be you?

boba charge™

The world's first and only residential-style EV charger with an owner-controlled payment system.
