COUNTRYWIDE
WINDOW COVERINGS

FAMILY OWNED IN KYNETON SINCE 1994

Roller Blinds

Interior blinds for light control, privacy and easy comfort

Filter light, reduce glare and create privacy with streamlined blinds that work beautifully in almost any room.

Roller blinds can help to...

Control light
to make each room feel more comfortable to use

Reduce glare
to make screens, reading and daytime living easier

Soften harsh sun
to create a calmer, more settled atmosphere

More privacy
for seclusion without closing in the room

Keep rooms cooler
to help manage heat through sunny windows

Frame the space
to make windows feel finished and intentional

Why choose Countrywide?

COUNTRYWIDE
WINDOW COVERINGS

FAMILY OWNED IN KYNETON SINCE 1994

We are your local experts in external awnings built for Australian conditions, serving Kyneton and surrounds since 1994.

We'll help you compare systems, choose the right fabric, then measure, supply and install a solution that fits properly and works smoothly.

Find the perfect blinds

What do you need?

Want light control for sleep or media?

Start with Blockout Roller Blinds for darkness, privacy and a more restful room.

Want flexibility from the one window?

Dual Roller Blinds pair a lighter daytime blind with blockout for night.

Want soft natural light during the day?

Start with Transparent or Translucent Roller Blinds to soften glare without closing in the space.

Want a clean and simple look?

Single Roller Blinds keep the window neat while giving you the level of light control you need.

Roller blinds at a glance

	Blockout Roller Blinds	Transparent Roller Blinds	Translucent Roller Blinds	Dual Roller Blinds
Best for	Bedrooms, media rooms, privacy	Living areas, views, daytime glare	Living areas, kitchens, soft filtered light	Maximum day and night flexibility
Light Control	High: room darkening	Low: keeps light and view	Medium: soft filtered light	Adjustable: light by day, blockout by night
Privacy	Full day and night privacy	Daytime privacy	Soft privacy with light	Day and night privacy
View	Blocks the view	Keeps the view	Softens the view	View by day, privacy by night
Room Feel	Calm and enclosed	Bright and open	Soft and balanced	Flexible and practical
Known for	Darkness and privacy	Light and outlook	Light and softness	Two blinds in one

1 Choose Your Fabric Type

Your choice affects light control, privacy, views and how flexible the space feels

Blockout Fabric

Best for rooms where you want strong light control and privacy.

- Blocks outside light
- Gives excellent privacy, day and night
- Helps reduce heat in summer and retain warmth in winter
- Can help soften outside noise
- Helps protect furniture, flooring and artwork from UV
- Works well in bedrooms, media rooms and other darker spaces
- Easy to keep clean

Transparent Fabric

Best for rooms where you want to keep the view and soften glare.

- Lets in natural light while reducing glare
- Gives daytime privacy while keeping the outlook open
- Helps reduce heat build-up from direct sun
- Offers some UV protection
- Suits bright living spaces
- Easy to maintain

Which fabric suits which room?

Bedrooms
Usually best with Blockout or Bonded blinds.

Living areas
Often suit Transparent or Translucent blinds, depending on glare and privacy.

Media rooms
Usually best with Blockout or Bonded blinds.

Kitchens and dining areas
Often suit Translucent blinds, or Transparent if keeping the view matters most.

Translucent Fabrics

Best for rooms where you want a balance of light and privacy.

- Softens natural light
- Reduces glare without fully darkening the room
- Provides privacy while still letting light through
- Helps reduce sun damage to interiors
- Can help manage heat from direct sun
- Suits living rooms, dining areas, kitchens and bedrooms
- Easy to maintain

Bonded Fabrics

Best for rooms where you want full blockout with a more tailored finish.

- Provides full light blockout
- Combines face fabric with a bonded backing for added strength
- Gives you more flexibility in fabric choice
- Helps improve insulation
- Can help reduce outside noise
- Offers strong UV protection
- Easy to keep clean

2 Choose How the Blind is Fitted

Decide how you would like to place the blinds on the window frame

Recess Fit

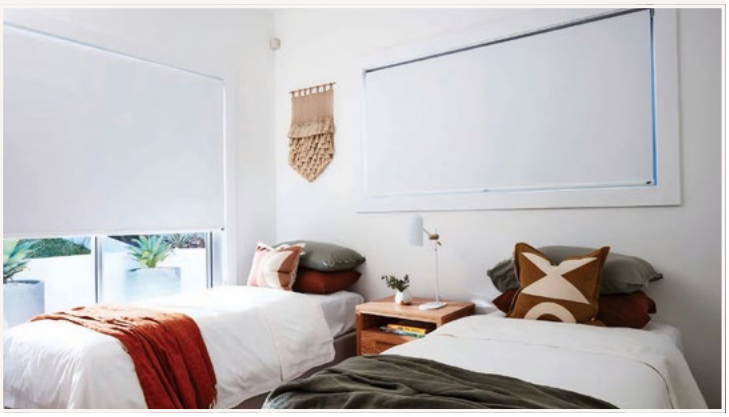
The blind sits inside the window frame.

- Gives a neat, built-in look
- Saves space
- Keeps the window lines clean
- Works well with curtains if you want a layered look

Face Fit

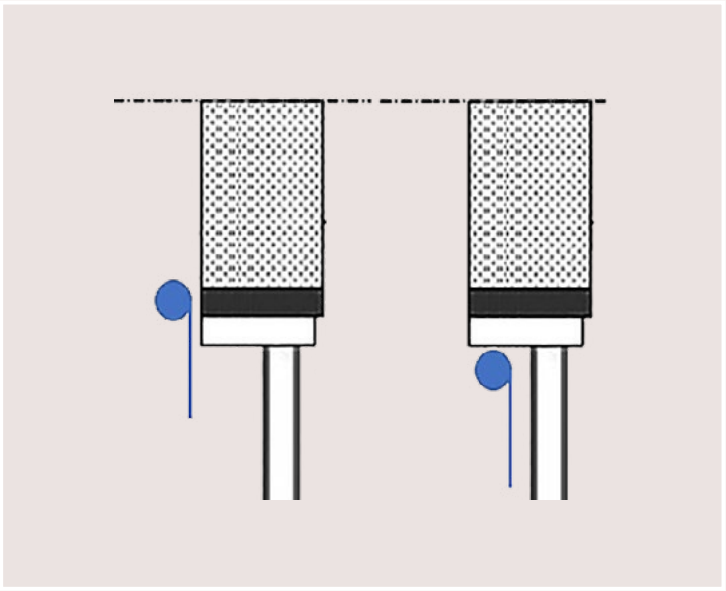
The blind sits outside the window frame.

- Helps reduce light gaps
- Lets the blind lift clear of the full window
- Works well for shallow or uneven recesses
- Can be fitted higher and wider to make the window feel larger



3 Choose the Roll Direction

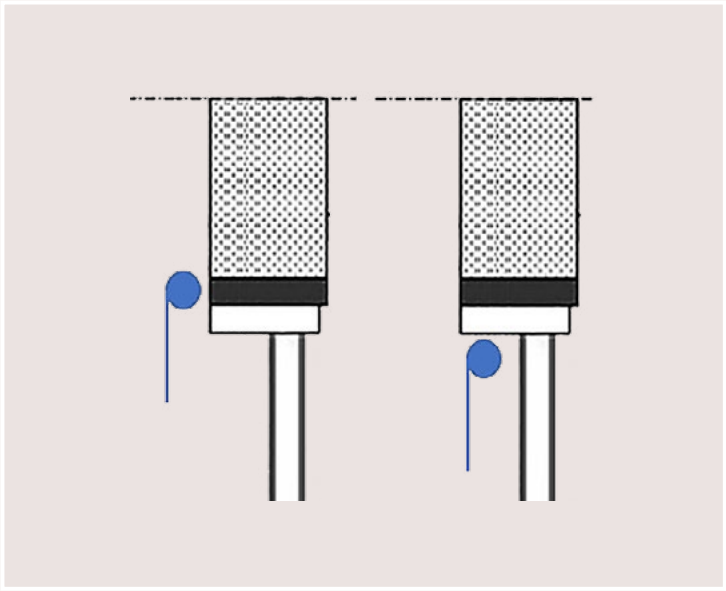
Your choice may be dictated by the handles, locks, and other mechanisms on your window.



Back Rolled

The fabric rolls closer to the glass.

- Reduces light gaps
- Improves light control
- Can help with insulation
- Creates a neat, close-fitting look



Front Rolled

The fabric rolls away from the glass.

- Clears handles, locks and other obstructions
- Gives the blind a softer look
- Can work better for bay windows and angled windows

4 Choose How to Operate Your Blinds

Choose between four types of blind operation

Traditional Spring

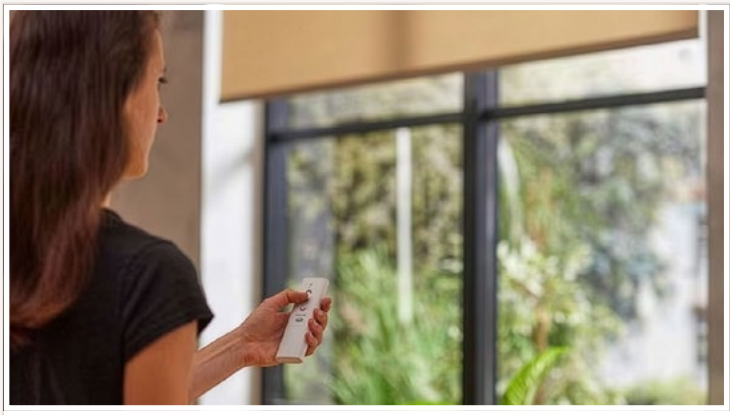
A simple manual option. Pull the blind down and stop it where you want it.

Chain

A smooth, reliable option with precise control. Our chain-operated blinds use a patented ball bearing clutch and stainless steel chain, and larger blinds include spring assistance to make lifting easier.

TouchRise Chainless

A chain-free option for a cleaner look and improved child and pet safety. Adjust the blind with a light touch on the base rail.



Motorised

Available in wired or rechargeable battery options. Control your blinds by wall switch, remote, or smart home integration.

5 Select Single or Dual Blinds

Choose between the simplicity and low cost of single blinds or the flexibility and control of dual blinds

Single Blinds

A simple, practical choice.

- One blind, one fabric
- Clean, minimal look
- Available in blockout, translucent and transparent fabrics
- Good when you want a straightforward solution

Dual Blinds

The more flexible option.

- Two blinds on one window
- Often combines a lighter fabric for daytime with blockout for night
- Gives more control over light and privacy
- Works especially well in bedrooms and living areas

6 Finish Off with Base Rails and Pelmets

Add the finishing touches to your new blinds

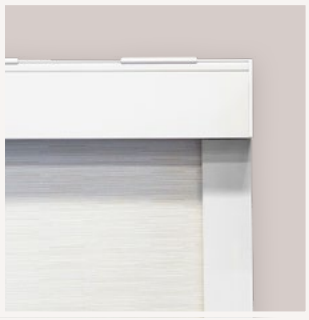
Pelmet Options

Single Aluminium Fascia Pelmet

A neat, modern finish that conceals brackets and hardware.

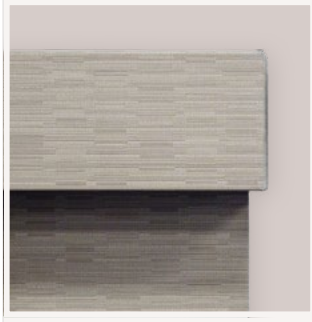
Dual Slimline Aluminium Fascia Pelmet

Designed for dual blinds, with a slim profile



Enclosed Square Pelmet

With side channels designed to reduce light gaps and improve blockout performance.



Fabric-covered Pelmet

A softer decorative finish in matching or contrasting fabric.

Base Rail Options

Aluminium Base Rail

Available in Rectangular or 25mm Classic Tear Drop profiles, both with a bumper detail to reduce tapping against the sill. Available in a wide range of colours.

Fabric-wrapped Base Rail

A softer, more seamless finish with a sewn-in metal base rail wrapped in matching fabric.

Classic Shaped Finish

A more traditional finish if you want to suit an older or more decorative interior. Available in a range of cut and trim options.

Bring it All Together

Let us help you design a solution that is tailored to your home and not just fitted to your window!

You have now worked through the key decisions involved in choosing your roller blinds: selecting the right fabric type for light and privacy, deciding how the blinds will be fitted, choosing the roll direction, selecting how they will operate, considering whether single or dual blinds are the best fit, and adding the finishing details that complete the look.

With the main decisions in place, the next step is refining the details: colours, textures, pelmets, base rails, and the practical needs of your space. Our team will help you compare options, view samples in person, and make sure everything is measured and specified properly so the finished result looks right and works the way it should.

Book a No-Obligation Consultation

Visit our showroom or arrange a measure and consultation with our team.

Seeing full fabric samples, rolling systems and installation options in person makes decision-making far easier.

To make your appointment more productive, consider bringing:

- Photos of the room and windows
- Approximate window measurements
- Flooring or paint samples
- Inspiration images you like
- Any plans if you are building or renovating

If you are unsure about anything, just bring what you have and we will guide you through the rest.
