

Poster

Multi-use display, easy to move & install.

Foldable

High-precision

Left-right
splicing

Thin-light

Efficient
Heat-dissipation

Up and Down folding

Thickness 55mm, lightweight body, folding design, convenient for moving in elevators, suitable for various mobile scenarios;

Multi-scenario compatibility

Supports single display, or can be combined on both sides to form a large screen display, balancing advertising benefits and small-scale events;

Plug-and-play

Hassle-free setup. Front-access quick disassembly (5-second module replacement); GOB glue-sealed for shock and dust resistance.

Mobile / computer remote control

Timed on/off and split-screen playback. USB/cloud dual-mode content update, one-click operation for staff.

Cost efficiency

Zero paper consumption cuts printing/replacement costs; low energy use reduces long-term operating expenses.

Custom optional

Tailor size, brightness, and functions (battery/foldable) to match brand and scenario needs.

▶ Application

Commercial retail

Catering and accommodation

Public services

Transportation hubs

Cultural and entertainment Event
