Dear Parent/Guardian,

We want to tell you about special advanced classes that have been offered at **The James Baldwin School** recently. These classes can help your student learn more, build important skills and get ready for the future.

Why Take Advanced Courses?

Students in advanced classes:

Learn harder and more interesting lessons.

- Get better at thinking and solving problems.
- Feel more confident about themselves.
- Show they are ready for college.
- May earn college credit before they finish high school.
- May spend less time and money in college.

Approved Advanced Classes offered at The James Baldwin School :

Biofuels, Bioplastics, Physical science & computing, Sugar, Colonial & Constitutional Foundations, Invasive Species, Math Modeling

If you would like your student to participate in any of these courses, please talk to a school counselor or administrator. They will be happy to explain the programming process and help your student choose the right classes.

We hope you will think about these great learning opportunities for your student. If you have questions, please contact **Melissa Jacobs** at mjacobs26@schools.nyc.gov.

Thank you for supporting your student's education.

Best,

Melissa Jacobs

Melissa Jacobs
