The **Blaiklock** Story.

Built On **Experience**.
Defined By **Responsibility**.

Blaiklock began with a single project.
A complex logistics challenge that required
ownership, expertise and complete accountability.

What started as a one-off opportunity became the
foundation of a business built on control, consistency
and confidence.

Today, Blaiklock supports clients across global supply
chains while maintaining the same principles that
shaped the company from day one.

Headquarters

Three principles. **One Promise.**

Three principles guide every decision we make, every shipment we manage, and every commitment we deliver. Together, they form the foundation of the Blaiklock approach.

A handwritten signature in blue ink that reads 'M. Conquer'.

Marc Conquer
Founder & CEO

01

CONTROL

Control in complexity

Control in delivery. We take ownership, make decisions clearly, and stay proactive when conditions change.

02

CONSISTENCY

**Consistency in how
we deliver**

Clients rely on us to perform under pressure with clear communication, operational discipline and dependable execution at every stage.

03

CONFIDENCE

Confidence in execution

Through intelligent visibility, accountability and experience, we create confidence across every part of the supply chain.

When Failure Isn't An **Option**.

Some shipments carry more than cargo. They carry deadlines, commitments and expectations. When supply chains face pressure, businesses need a logistics partner that can respond quickly, communicate clearly and maintain control at every stage. That's where Blaiklock comes in. By combining operational expertise with complete visibility, we help organisations navigate complexity with confidence, especially when failure isn't an option.

What's At Stake?

- Production lines waiting for critical components
- Customer commitments that cannot move
- Project deadlines measured in hours, not days
- High-value cargo requiring complete visibility
- Supply chains depending on a single delivery

Why Businesses **Choose Blaiklock.**

For over 20 years, Blaiklock has supported organisations operating in demanding, time-sensitive and highly regulated environments. Our clients trust us because we combine operational expertise, global reach and complete visibility with a level of accountability that only comes from a family-owned business.

When supply chains become complex, priorities change or deadlines come under pressure, we remain focused on one thing: maintaining control and keeping shipments moving.

Dedicated Account Management

One point of contact.
Complete accountability.

Global Network

Worldwide reach
with local expertise.

Customs Expertise

Reducing delays and
simplifying compliance.

Visibility & Tracking

Real-time insight
across every shipment.

Operational Control

Structured processes designed
to reduce risk.

Family-Owned Accountability

Relationships built on trust,
not transactions.

Complex Industries. Simple Solutions.

Some sectors demand strict compliance and time-critical coordination. Others require complex international movement, specialist handling, or visibility across multiple stakeholders.

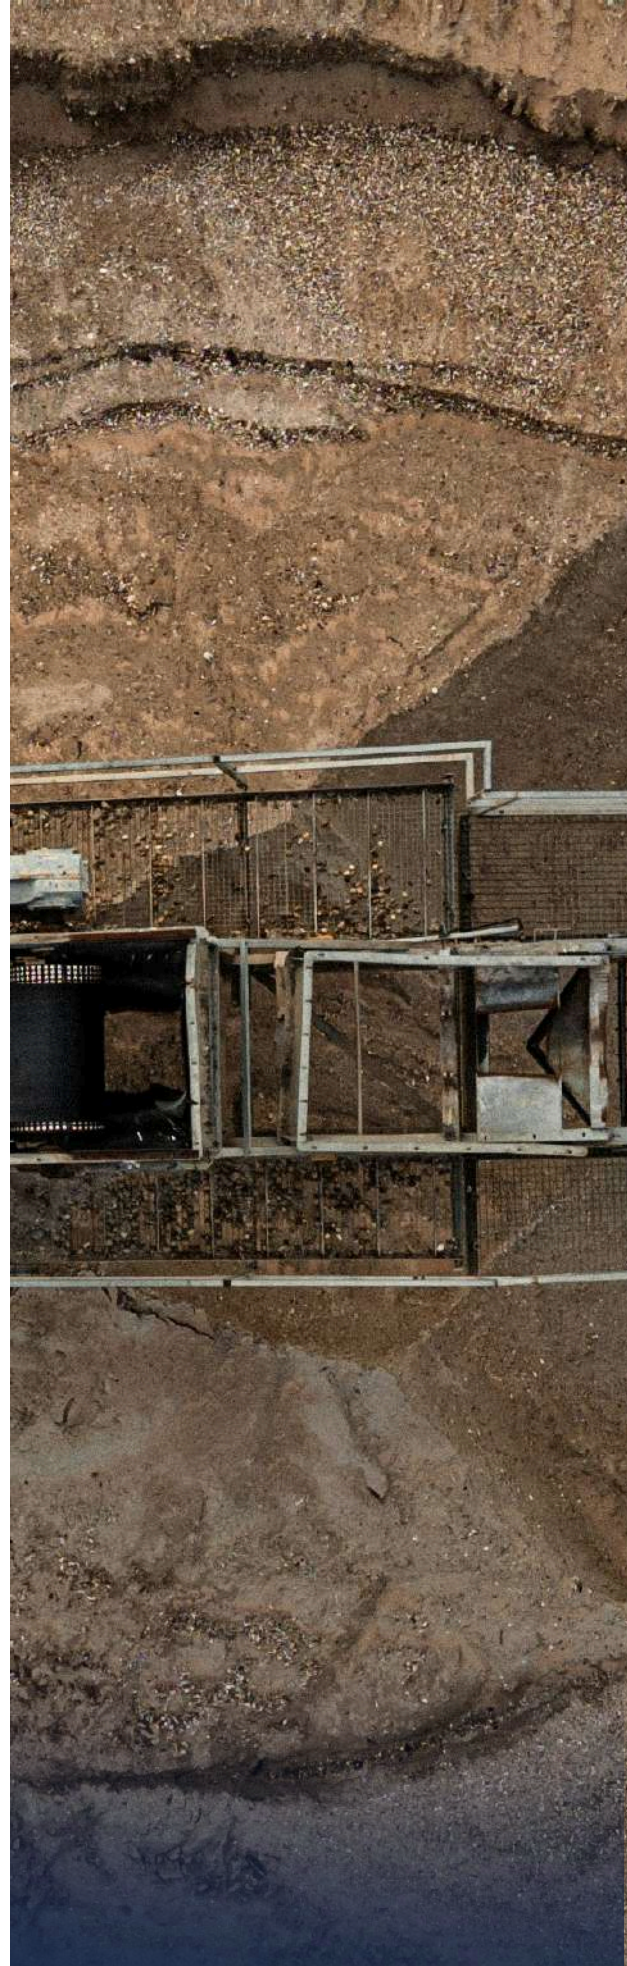

At Blaiklock, we adapt our logistics solutions around the operational pressures, timelines and commercial realities of each client.

A vertical photograph of a wind turbine on a grassy hill under a clear sky. The turbine is white with three blades, and the hill is covered in green grass. The sky is a clear, pale blue.

Cargo

Air Freight

Control **at altitude.**

Fast-moving, time-critical shipments managed with precision, visibility and confidence across global networks.

Capabilities:

- Express & Priority Air Freight
- Charter Solutions
- Dangerous Goods
- Import & Export Services
- Door-to-Door Delivery

Sea Freight

Across **every tide.**

Flexible ocean freight solutions designed to keep global supply chains moving efficiently and reliably.

Capabilities:

- FCL & LCL Services
- Import & Export Management
- Customs Coordination
- Global Carrier Network
- Project Cargo

Road Freight

Ready at **every turn.**

Reliable UK and European transport solutions supported by proactive communication and operational control.

Capabilities:

- UK Distribution
- European Road Freight
- Groupage Services
- Full & Part Loads
- Express Deliveries

Rail Freight

Precision on **every track**.

Efficient rail solutions providing reliable long-distance freight movement with reduced environmental impact.

Capabilities:

- International Rail Freight
- Intermodal Solutions
- Container Transport
- Long-Distance Distribution
- Multimodal Integration

Customs Solutions

Cleared at **every border**.

Expert customs support that simplifies compliance, reduces delays and keeps goods moving across borders.

Capabilities:

- Customs Clearance
- Import & Export Declarations
- Duty Management
- Commodity Code Guidance
- Compliance Support

Warehousing Solutions

Space to scale.

Flexible storage and distribution solutions designed around the needs of your operation.

Capabilities:

- Secure Storage
- Inventory Management
- Pick & Pack Services
- Fulfilment Solutions
- Distribution Support

Urgent Solutions

Against **the clock**.

Rapid-response logistics solutions designed for critical shipments where every minute matters.

Capabilities:

- Same-Day Solutions
- Emergency Logistics
- Dedicated Vehicles
- Out-of-Hours Support
- Real-Time Tracking

Project Cargo

Handling every lift.

Specialist planning and execution for oversized, high-value and complex cargo movements.

Capabilities:

- Heavy Lift Cargo
- Oversized Shipments
- Route Planning
- Specialist Handling
- Multi-Modal Coordination

Visibility where it matters.

Our in-house intelligent technology gives you complete visibility and control of your shipments, anytime, anywhere.

- ✓ Live shipment tracking
- ✓ Access to documents & invoices
- ✓ Proof of delivery (POD)
- ✓ Historical data and reporting
- ✓ CO2 emissions reporting

Proven in complex environments.

Behind every shipment is a challenge, a solution and a result. Here are some of the ways Blaiklock has helped clients navigate complexity and maintain control.

Case Study.

Sector

Retail & Distribution

Route

Nationwide UK
Distribution

Cargo

Retail & commercial freight
movements

Services

Road Freight • Distribution Support •
Dedicated Transport • Operational
Coordination

The Challenge

Managing increased delivery volumes and changing operational requirements while maintaining reliable, time-sensitive transport coverage across the UK.

The Solution

Blaiklock implemented a scalable logistics support model designed to increase flexibility, maintain responsiveness, and support day-to-day operational continuity during peak demand periods.

- Flexible nationwide transport support
- Dedicated delivery coordination
- Responsive scheduling management
- Real-time operational communication
- Additional fleet capacity support
- Time-sensitive delivery planning

Case Study.

Sector

Renewable Energy

Route

China → Houston →
USA & Puerto Rico

Cargo

Inverters • Batteries • Data
Loggers

Services

Sea Freight • Customs Clearance •
Warehouse Coordination • Regional
Distribution

The Challenge

Supporting the international movement of critical renewable energy infrastructure across the USA and Puerto Rico during a period of global shipping disruption and operational uncertainty.

The Solution

Blaiklock implemented a proactive freight and customs strategy designed to maintain shipment continuity, reduce delays, and keep all parties aligned throughout the project lifecycle.

- International ocean freight management
- Customs documentation coordination
- Port of Discharge optimisation
- Warehouse devanning support
- USA regional distribution
- Puerto Rico final-mile coordination

Case Study.

Sector

Data Centres & Critical Infrastructure

Route

Bedford, UK → Texas, USA

Cargo

Production-critical engineering components

Services

Air Freight • Customs Clearance • Real-Time Tracking • Final-Mile Delivery • 24/7 Operational Support

The Challenge

Delivering production-critical engineering components from the UK to Texas within a strict 72-hour delivery window — helping maintain operational continuity across a large-scale data centre infrastructure programme.

The Solution

Blaiklock implemented a dedicated airfreight control strategy designed around speed, visibility, and contingency planning — helping maintain operational continuity despite the pressure of time-sensitive manufacturing schedules.

- Daily dedicated UK collections
- Priority airfreight coordination
- UK export & USA import customs clearance
- Real-time shipment tracking
- Backup routing support
- Direct Texas final-mile delivery

Behind Every Shipment Is **A Team That Understands** What's At Stake.

Logistics is built on people.

Behind every shipment is a team of specialists working together to maintain visibility, solve problems and keep supply chains moving.

From account managers and customs experts to freight specialists and operations teams, every member of Blaiklock plays a role in delivering confidence for our clients.

Because great logistics isn't just about systems. It's about people who take ownership.

Global Network.

Worldwide **Movement.**

One Point Of **Control.**

Global supply chains demand expertise, coordination and visibility.

Through our international network of trusted partners and logistics specialists, we provide seamless movement across borders, continents and transport modes.

One Shipment.

One Team.

**One point of
accountability.**

Sustainability System.

Measured **Impact.**

Managed **Responsibility.**

At Blaklock, we believe sustainability begins with making better logistics decisions. By combining intelligent route planning, operational efficiency and responsible supply chain management, we help clients reduce environmental impact while maintaining the control and performance their businesses require. Our approach focuses on practical improvements that deliver measurable benefits today while supporting a more sustainable future for tomorrow. Because responsible logistics should never come at the expense of operational excellence.

01

Cleaner Transport Partners

Working with road partners focussed on lower emissions.

02

Biofuel Shipping Initiatives

Partnering with leading shipping lines investing in biofuel.

03

Sustainable Aviation Fuel (SAF)

Supporting airlines using SAF to reduce carbon emissions.

04

Measuring & Reporting Scope 3

Tracking, reporting and reducing emissions across our value chain.

Confidence at Every Stage.

From first enquiry to final delivery, Blaiklock manages every stage of the logistics journey with clarity, responsiveness, and operational control - keeping stakeholders aligned and supply chains moving efficiently.

01

INQUIRY

We listen to your needs and understand what matters most.

02

PLANNING

We design the right solution with clear costs and timelines.

03

COORDINATION

We organise every detail and keep all parties aligned.

04

IN TRANSIT

Real time visibility and proactive updates throughout the journey.

05

DELIVERY

We ensure secure, on-time delivery at destination.

06

REPORTING

Full visibility and insights for complete clarity.

“Confidence isn't what we promise.
It's what we deliver.””
