

AI READINESS ASSESSMENT

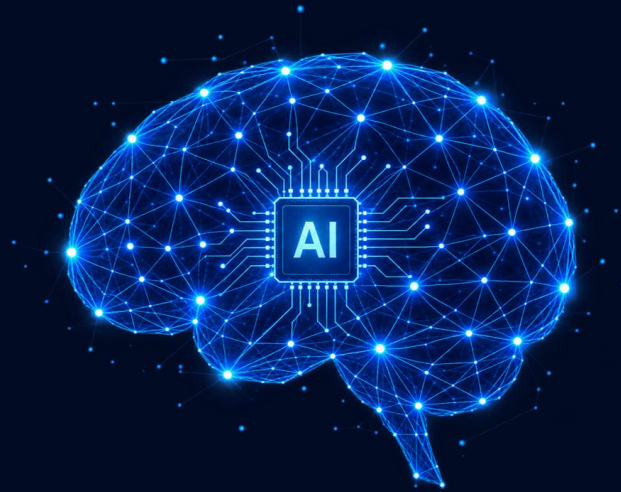

Understand your readiness Unlock your potential

Helping organisations understand, prepare for and adopt AI with confidence — identifying practical opportunities and creating a clear path from readiness to real-world value.

Executive Overview

www.vryiylabs.com

Why AI Readiness Matters

Artificial Intelligence is rapidly becoming a core business capability. Yet many organisations struggle to move beyond experimentation into practical, secure and scalable adoption.

Three questions every organisation should be able to answer:

1. Are we investing in the right AI opportunities?
2. Are our people ready to adopt AI confidently?
3. Do we understand the risks as well as the opportunities?

Understanding the answers to these questions is critical to successful AI adoption. The Vryiy Labs AI Readiness Assessment provides an independent view of your organisation's readiness, helping identify strengths, address gaps and prioritise where to focus first.

HOW IT WORKS

From discovery to a clear AI Roadmap

In as little as a day, we assess your organisation's AI readiness, identify where you are today and create a practical path forward.

01 — Discover

Business goals, current AI usage and key challenges.

02 — Assess

Readiness across six critical dimensions.

03 — Score

V-Score™, complexity rating and readiness band.

04 — Blueprint

Priorities, recommendations and a practical 90-day roadmap.

WHAT WE ASSESS

01 — Leadership & Strategy

We assess whether your organisation has the leadership alignment, strategic direction and sponsorship needed to turn AI ambition into measurable business value.

Strategic Alignment

Are AI priorities connected to genuine business objectives and measurable outcomes?

Leadership & Sponsorship

Is there clear executive ownership, accountability and support for AI adoption?

Investment & Priorities

Does the organisation understand where AI can create value and where investment should be focused first?

WHAT WE ARE LOOKING FOR

Clear direction • Executive sponsorship • Prioritised opportunities • Measurable outcomes

WHAT WE ASSESS

02 — People & Adoption

We assess whether your people have the awareness, skills and support needed to understand, adopt and use AI confidently and effectively in their everyday work.

AI Awareness & Skills

Do people understand what AI can do, where it can add value and how to use it effectively?

Enablement & Training

Are the right learning, guidance and support mechanisms in place to build confidence and capability?

Adoption & Change Readiness

Is the organisation prepared to manage the behavioural and cultural change required for successful AI adoption?

WHAT WE ARE LOOKING FOR

AI awareness • Relevant skills • Adoption readiness • Sustainable capability

WHAT WE ASSESS

03 — Process & Workflows

We assess how work gets done today, where friction or inefficiency exists, and where AI and automation could simplify processes and create measurable business value.

Process & Workflow Opportunities

Which processes contain repetitive, manual or time-consuming activities that could benefit from AI or automation?

Value & Prioritisation

Which opportunities offer the strongest combination of business value, feasibility and practical impact?

Process Readiness

Are existing workflows sufficiently understood, structured and stable to support successful AI-enabled change?

WHAT WE ARE LOOKING FOR

High-value opportunities • Reduced friction • Practical automation • Measurable improvement

WHAT WE ASSESS

04 — Data & Information

We assess whether your organisation's data, information and knowledge are accessible, reliable and sufficiently governed to support effective and trustworthy AI.

Data Quality & Accessibility

Is the information AI may rely on accurate, current, accessible and appropriate for its intended use?

Knowledge & Information

Is valuable organisational knowledge captured, structured and available in ways that AI can effectively use?

Governance & Ownership

Are clear controls, ownership and responsibilities in place for how data and information are managed and used?

WHAT WE ARE LOOKING FOR

Reliable information • Accessible knowledge • Clear ownership • Effective governance

WHAT WE ASSESS

05 — Technology & Tools

We assess whether your current technology environment, platforms and tools can support AI securely, effectively and at the scale your organisation requires.

Technology Landscape

What platforms, applications and capabilities are already available, and how well do they support your AI ambitions?

AI Tools & Integration

Are existing or planned AI capabilities able to integrate effectively with the systems, information and workflows they need?

Scalability & Operational Readiness

Can the technology environment support AI beyond experimentation into secure, reliable and sustainable use?

WHAT WE ARE LOOKING FOR

Suitable platforms • Effective integration • Operational readiness • Scalable capability

WHAT WE ASSESS

06 — Safety & Responsible AI

We assess whether the appropriate governance, security and responsible AI practices are in place to enable AI adoption while protecting your organisation, its people and its information.

Governance & Accountability

Are clear policies, ownership and decision-making responsibilities in place for how AI is selected, introduced and used?

Security, Risk & Compliance

Are AI-related security, privacy, regulatory and organisational risks understood and appropriately managed?

Responsible AI Use

Are people provided with clear guidance for using AI safely, ethically and appropriately in their everyday work?

WHAT WE ARE LOOKING FOR

Clear governance • Managed risk • Responsible use • Organisational confidence

YOUR DELIVERABLE

Your AI Readiness Blueprint™

Your assessment is translated into a practical executive Blueprint — combining your readiness position, key findings, priorities and recommended actions into one clear document.

Executive Summary

Your current position, key findings and areas requiring attention.

V-Score™ & Readiness Profile

Your overall readiness score, readiness band and view across the six assessment dimensions

Strengths, Gaps & opportunities

Where capability already exists, what could hold adoption back and where AI could create value.

Prioritised Recommendations

Clear recommendations ranked around value, readiness and practical impact.

Complexity & Dependencies

Key considerations that may influence effort, sequencing or implementation

90-Day Action Plan

Practical next steps to move from assessment into action.

ASSESSMENT OPTIONS

Choose the right starting point

Choose the level of assessment that best fits your organisation, priorities and ambitions.

01 — ESSENTIAL

Understand where you are.

- ✓ Full AI Readiness Assessment
- ✓ V-Score™ & readiness rating
- ✓ Strengths, gaps & priorities
- ✓ AI Readiness Blueprint™

£995 + VAT

FOUNDATION

02 — PROFESSIONAL

Know what to do next.

- ✓ Everything in Essential
- ✓ Detailed recommendations
- ✓ Prioritised actions & quick wins
- ✓ 90-day implementation plan

£1,995 + VAT

MOST POPULAR

03 — ENTERPRISE

Navigate enterprise complexity.

- ✓ Everything in Professional
- ✓ Extended implementation roadmap
- ✓ Cross-programme dependencies
- ✓ Business & technology alignment
- ✓ Governance & adoption planning
- ✓ Longer-term transformation priorities

WHY VRYIY LABS?

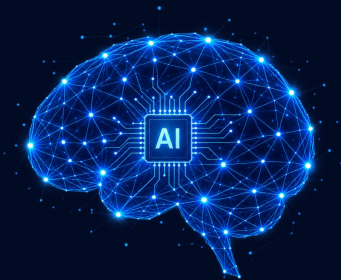

Experience behind the technology

Practical AI guidance built on more than 30 years of technology and transformation experience.

30+ Years Experience

- Digital transformation leadership
- Global Transformation programmes
- Technology & business change

Practical AI

- Business-first AI
- Actionable recommendations
- Measurable outcomes

Independent Advice

- Vendor-neutral guidance
- Tailored to your organisation
- Built around your priorities

We combine technology experience with a business-first approach to help organisations move from AI ambition to practical, measurable progress.

READY TO MOVE FORWARD?

Let's build **what's next.**

Whatever you're looking to transform, modernise or create, let's start with a conversation about what you want to achieve.

VRYIY LABS

Accelerate **Intelligence.**
