

PROGRAM SUMMARY

Program	The FlipWork Sprint, an 8-week agentic AI capability program for established professionals
Provider	FlipWork, Inc. • EIN 39-3867347 • support@flipwork.ai • flipwork.ai FlipWork is the operating system for Agentic-Human Reinvention™.
Format	Live virtual cohort sessions, structured self-paced curriculum in FlipWork OS, and applied practicum completed in the participant's own work environment. Fully virtual, with no travel and no time out of office.
Duration	8 weeks at approximately 3 hours per week.
Investment	\$3,500 per participant. All materials, platform access, diagnostics, and credential included.
Payment	Corporate or personal card at enrollment. Stripe issues an itemized receipt automatically with provider name, program name, amount, and date.

WHY THIS PROGRAM

Established professionals are increasingly accountable for AI outcomes they have not personally produced: approving spend, evaluating vendors, and defending results to boards and executive committees. That is not a gap a webinar closes.

The FlipWork Sprint helps established professionals turn their personal context (the judgment, experience, and uniqueness no AI can generate) into deployed agentic workflows, 18 practical artifacts, and measurable proof of transformation. It opens with the FlipFactor™ diagnostic, which sets a measured readiness baseline, so the eight weeks close that individual's specific gap rather than covering general material. Flippy™, the AI change agent calibrated to the participant's FlipFactor result, works alongside the participant between sessions.

Learning objectives

- Establish a measured baseline of personal AI readiness using the FlipFactor™ diagnostic.
- Apply the AI Reinvention Curriculum to convert domain judgment and experience into agentic AI collaboration.
- Design, deploy, and document agentic workflows that reduce execution time and expand capacity for higher-value work.
- Build a role-specific AI toolkit and prompt library aligned to actual responsibilities.
- Develop an agentic leadership practice grounded in accountability, evaluation, and organizational trust.
- Evidence capability change through a FlipFactor retake, a calculated ROI measure, and the FlipWork Certified: Agentic Leader credential.

OUTCOMES AND DELIVERABLES

Deliverable	What it is	Verification
Reinvention Passport	A portable file of each leader's personal judgment, methods, and expertise packaged to scale their context across any AI system.	Generated in FlipWork OS at program close
Documented artifacts	14 curriculum-produced, 3 self-initiated in the participant's own environment, 1 capstone. The self-initiated artifacts are real work (a workflow redesign, a tool deployment) built against actual responsibilities.	Time-stamped in FlipWork OS
Measured readiness change	FlipFactor™ at enrollment and again at close. Produces archetype movement and a score delta, referenced against a global benchmark of non-participants over the same eight weeks.	System-generated, from the FlipFactor benchmark population
A calculated ROI measure	The participant selects the measure most relevant to their role (time saved, revenue influenced, or another job-relevant outcome), calculates it, and submits it with their program summary.	Documented in the program record
FlipWork Certified: Agentic Leader	Released automatically once all 18 artifacts, including the capstone, are submitted and the FlipFactor retake is complete. Valid 12 months.	Blockchain-verified badge, displayable on LinkedIn

TIME COMMITMENT

Component	Hours	Description
Live cohort sessions	8.0	One 60-minute live virtual session each week: kickoff, four curriculum arcs, two capstone working sessions, and a closing session
Structured curriculum	4.0	AI Reinvention Curriculum modules in FlipWork OS, one hour per week across the first half of the program
Diagnostic and onboarding	1.0	FlipFactor™ diagnostic, results interpretation, and platform setup
Applied practicum	10.0	Building the 18 artifacts, including the capstone, inside the participant's own work environment, weighted toward the second half of the program
Program close	1.0	FlipFactor retake, ROI calculation, and program summary
Total	24.0	8 weeks at approximately 3 hours per week

The FlipWork Certified: Agentic Leader credential is earned by submitting all 18 artifacts, including the capstone, and retaking the FlipFactor diagnostic. Eligibility is tracked automatically in FlipWork OS and the credential releases on completion, so what it certifies is finished work and a measured change in capability.

PROFESSIONAL RECERTIFICATION

Certificants can claim this program toward recertification by self-reporting it under their certifying body's own provisions. FlipWork issues a completion certificate carrying the record set those bodies require: name, program title, delivery format, dates, structured instructional hours, and learning objectives.

Credential	Credit basis	Hours	Credit value	How to report
SHRM-CP / SHRM-SCP	1 PDC per 60 minutes	13.0	13.0 PDCs	Certification Portal, Advance Your Education
HRCI (PHR, SPHR, GPHR)	1 credit per 60 minutes	13.0	13.0 credits	Recertification application, Continuing Education
PMI (PMP, PgMP, PMI-ACP)	1 PDU per 60 minutes	13.0	13.0 PDUs	CCRS, Education, Course or Training
ISACA (CISA, CISM, CRISC, CGEIT)	1 CPE per 50 minutes	13.0	15.50 CPE	myISACA, Manage My CPE
CPA / CMA	Set by state board	13.0	Determined by board	Accepted where non-Registry programs qualify. Confirm with your state board.

- **Credits are self-reported** rather than pre-assigned, and each body makes the final determination. The values above apply each body's published credit-hour basis to 13.0 structured instructional hours.
- **The figures cover structured instruction.** Where a body offers a category for applied work, such as SHRM's Advance Your Organization or PMI's Working as a Practitioner, practicum hours may be claimed there as well.
- **ISACA credits are rounded down** to the nearest half credit.
- **PMI Talent Triangle alignment:** Business Acumen and Ways of Working, with a Power Skills component.

ABOUT FLIPWORK

FlipWork is the operating system for Agentic-Human Reinvention™. We close the Exponential Divide between what AI can do and how ready people are to direct it, giving people greater agency to shape what comes next. Our mission is to equip every human to reinvent at the speed of change.
