

GROUNDLINE

**VERIFICATION AND
DESIGN ASSURANCE**

WHAT WE DO

VERIFICATION AND DESIGN ASSURANCE

Independent verification and peer review are not overhead they're insurance. Groundline provides third-party verification services, carried out by independent experts, that reduce the risk of costly mistakes and oversights and provide defensible evidence that a design is safe, code-compliant, and constructible, remaining sound long after we've gone. With our global reach and ongoing investment in training and upskilling, we bring a comprehensive understanding of local standards together with international best practice on every project.

OUR SERVICES

- Independent verification of structural, electrical, and foundation design
- Peer review of design documentation, calculations, and construction packages
- Design assurance across project lifecycle from concept through to IQA
- Standards compliance review across IEC, IEEE, CIGRE, and jurisdiction-specific codes
- Technical audit support for network owners and asset managers

Let's Get to Work.
