

Product Overview

FieldMark is a liquid spray pattern indicator which can be added to a spray tank alongside herbicides, fungicides, insecticides, liquid fertilisers or biostimulants.

As the treatment is applied, FieldMark colours the sprayed surface, giving the operator a clear, real-time view of exactly where it has been sprayed — and where it hasn't — so overlaps, gaps and drift are visible and can be avoided or corrected.

The colour then fades naturally through sunlight, rain and normal wear, leaving no lasting mark on turf, crops or soil.

Features

- Confirms spray coverage in real time removing guesswork over missed or overlapped areas.
- Highlights drift as it happens, helping protect buffer zones, watercourses and neighbouring land.
- Fades naturally after use with no lasting staining on turf, crops or soil.
- Non-toxic formulation. Suitable for use with all UK-authorized Plant Protection Products.
- Washes out with the standard tank rinsate with no special cleaning required.

Typical Applications

- Golf course & sports turf spraying
- Amenity & public land spraying
- Arable & grassland farming
- Boom sprayers, backpack sprayers & handheld equipment

Typical Treatment Properties

APPLICATION RATE	
Mankar ULV sprayers	20-40ml per litre
Mounted & handheld hydraulic sprayers	1.0–2.5ml per litre

Tolbest Limited, 8 Aston Court, Kingsland Grange, Warrington, WA1 4SG

Registered in England & Wales number 02354044 | VAT Registration 098 678 87

MIXING ORDER	
Method	1. Add half the desired water to the spray tank. 2. Add the Plant Protection Product, fertiliser or biostimulant, following the manufacturer's instructions. 3. Add the required amount of FieldMark. 4. Top up with the remaining water.
APPLICATION TEMPERATURE	
Recommended range	Ambient, 5°C – 30°C

Pack Sizes & Format

COLOUR	
Available colours	Blue
PACK SIZES	
Sizes	5 litres – other sizes available on request
FORMAT	
Type	Liquid concentrate

Safety & Handling

Hazard classification	• Not classified under CLP (Regulation (EC) No 1272/2008) — no hazard labelling required
Eye protection	• Safety glasses (EN 166)
Hand protection	• Chemical-resistant gloves — nitrile, butyl rubber, latex, PVC or neoprene (EN ISO 374)
Respiratory protection	• Particle filter device (Type P1/P2/P3) if ventilation is inadequate (EN 149)
Hygiene	• Wash hands after handling; wash contaminated clothing before reuse; wash thoroughly before breaks and at the end of the working day.
Skin & clothing contact	• May temporarily stain skin or clothing on contact.
Overspray	• Avoid overspray drying onto hard surfaces — wash off with clean water as soon as possible.

Storage incompatibilities	Keep away from strong acids, strong bases and sources of ignition
