

TRAIN: Training and Certification

Every Hour Tracked. Every Cert Current.

TRAIN keeps your whole agency current. It holds your course catalog, assigns and tracks training, and manages every certification and its expiration date in one place. Built on COMS, training and certs attach to each member automatically, so requirements follow the person and their role. When an audit or a court date comes, you can prove exactly who was trained on what, and when.

The Problem

Training records are scattered, and compliance depends on someone remembering.

- **Certs expire quietly.** Expiration dates live in spreadsheets no one checks until it's too late.
- **Records don't match.** Training sits in binders, emails, and separate systems that never agree.
- **Audits are a scramble.** Proving who trained on what means digging through files for days.

Benefits

Keep every member trained, certified, and audit-ready.

- **One training catalog.** TRAIN holds your courses, disciplines, and requirements in one place.
- **Certs that never lapse.** Automatic reminders flag expiring certifications before they become a problem.
- **Assign and track.** Push training to the right people and see completion at a glance.
- **Proof on demand.** Pull a full, timestamped training record for any member in seconds.

Training That Knows Who Needs What.

A generic learning system stores courses. TRAIN manages compliance. Because it sits on COMS, it knows each member's rank, role, and assignment so that it can automatically tie the right requirements to the right people. A new K9 handler picks up the K9 requirements. A promotion adds the supervisor training. When a mandate or a due date is coming, TRAIN flags it before it lapses, so nobody falls out of compliance without anyone noticing.

How it Works

Set the requirements once, then let TRAIN keep score.

1. **Build your catalog.** Load your courses, disciplines, and certification requirements into one library.
2. **Assign by role.** TRAIN ties requirements to ranks and assignments, so the right training reaches the right people.
3. **Track completion.** See who's done, who's due, and who's overdue across the whole agency.
4. **Prove compliance.** Pull timestamped records for any member, unit, or requirement on demand.

Features

- **Course catalog.** Organize courses by discipline, category, and requirement.
- **Certification tracking.** Record every cert, its holder, and its expiration date.
- **Automatic reminders.** Flag expiring certs and upcoming due dates before they lapse.
- **Role-based assignment.** Tie requirements to rank and assignment through COMS.
- **Completion visibility.** See training status across members, units, and the agency.
- **Built on COMS.** Training and certs attach to each member's record automatically.
