CASE STUDY: Marine Installation

CalMac CCTV Franmework—Design, Supply & Installation for Four Ferries

MJR Deliver CCTV System Upgrades for CalMac Fleet Including new marine cameras, servers and network installation.

CalMac Ferries are the UK's Largest Ferry Operator , with over 30 vessels operating 29 Routes across the West Coast of Scotland.

MJR Power & Automation were contracted by CalMac Ferries to design, install and commission new marine CCTV system on the Caledonian Isle, Isle of Mull and the Lock Shira . The cable installations were carried out while ferries were in service with the CCTV equipment installed during scheduled dry docking maintenance period.
