Disposal Fees

WHAT YOU NEED TO KNOW

Frequently Asked Questions

WHAT ITEMS ARE NOT ACCEPTED AT THE LANDFILL?

Prohibited materials include liquid waste, PCB waste, contaminated soil, asbestos, abandoned vehicles and RVs, junk vehicles and RVs, and hazardous waste, such as toxins, corrosives, flammable materials, irritants, explosives, pathological wastes, batteries, and radioactive materials and chemicals.

HOW DO I SHOW PROOF OF NYE COUNTY RESIDENCY?

Customers may present a valid Government issued ID card, Driver's License, Military ID, or a current bill or other document that clearly shows customer name and current residential address, such as property tax bill, utility bill, phone bill, rental agreement, etc. to show proof of residency.

WHY CAN'T I PAY IN CASH?

We accept credit or debit card payments only. This is to streamline traffic at the scale house.

WHERE CAN I GET MORE INFORMATION ABOUT THE TIPPING FEES?

Contact the Nye County Department of Public Works at (775) 751-6262 or scan the QR code for more information.

COUNTY CODE

Reaching the End of a Landfill's Active Life

As the Nye County Landfill in Pahrump is nearing the end of its active life, the Nye County Department of Public Works is working with Southwest Environmental Services to prepare for its eventual closure, as well as determine future disposal options.

FINAL COVER

When a landfill nears capacity, preparations must be made for its closure. The entire landfill is required to have a final cover, usually a few feet of dirt, over the entire area where trash has been buried. This cover will protect against rainwater seepage and prevent erosion.

ONGOING AIR AND GROUND WATER MONITORING

Once a landfill is closed and the final cover is applied, the ongoing maintenance of the site begins, which includes quarterly air quality and ground water monitoring for approximately 30 years after closure. Remediation plans must also be prepared in case of future pollution issues.

FUNDS TO PAY FOR CLOSURE AND POST CLOSURE

Before a landfill closes, funds must be set aside to pay for this long-term, post-closure, maintenance monitoring, as well as to pay for any remediation that may be necessary.

DEVELOPMENT OF NEW DISPOSAL SITE

In addition to the eventual closure of the current landfill, development of a new (or expansion of the current) landfill is essential, as a new disposal area should be fully functional before closing the existing landfill.

Several legal and environmental procedures must be followed when constructing a new (or expanding a current) landfill, such as finding a suitable location, constructing a lining, installing a leachate collection system, installing a gas collection system, and establishing regular air quality and ground water monitoring.
