DOE Student Accounts Overview

Student ID: **12345678**

Name: **John Smith**

Email: **johns43@nycstudents.net**

Username: **johns43**

Password: **Js12345678**

- All DOE student accounts have been updated to match these passwords.
- If you are unsure of the last name initial, it is the last letter of their username.
- The username/email is NOT case sensitive; meaning the uppercase and lowercase do not matter.
- While they can enter devices with just the username to save time and avoid spelling errors, that is the only exception - most organizations require the full email address to be entered.
- **I DO NOT advise changing/resetting Student DOE passwords,** especially if students are not going to remember; Any password used in the past, including the one I've assigned, will become unusable.

If a student has changed/reset their password or cannot log in, please let the school tech coordinator know immediately for password reassignment.
