

Give a tree planted in Iceland

Native trees planted at Fagrabrekka, a farm on the Ring Road in north-west Iceland, with a personal certificate and an e-card. With a copse or a woodland, the recipient is welcome to visit the trees, by arrangement with the landowner. A single tree comes without a visit.

GIFT	WHAT THEY GET	PRICE	BUY LINK
Give a tree	1 native tree, certificate and e-card	€14	reforesticeland.com/give-a-tree?gift=tree
Give a copse	5 native trees, certificate and e-card; visits welcome	€45	reforesticeland.com/give-a-tree?gift=copse
Give a woodland	10 native trees, certificate and e-card; visits welcome	€85	reforesticeland.com/give-a-tree?gift=woodland

One-off payment, nothing renews. Prices in EUR, VAT included. Digital delivery, no shipping. Visits are arranged with the landowner; travel is not included.

HOW IT WORKS

- The buyer adds the recipient's name, their own name and a dedication of up to 250 characters.
- A two-page A4 certificate (PDF) and an e-card arrive by email within one working day of confirmed payment.
- Our local team plants the trees at Fagrabrekka in spring 2027 (mid-May to end of June), or in the next window (late August to end of September) if the ground isn't ready.
- Species: native downy birch, rowan and willow. The trees are planted together on a plot and reported on as a plot, not as single trees.
- No carbon claim is made for trees bought by individuals.

CHRISTMAS DATES

Order by 23 December (Swiss time) and we email the recipient on Christmas Eve; order on 24 December for Christmas Day. Please pay by card: gifts go out once payment is confirmed.

ABOUT REFOREST ICELAND

When the first settlers arrived, woodland covered 25–40% of Iceland; today forest covers about 2%. Reforest Iceland restores native woodland on named Icelandic farms, together with local landowners and planting crews.

Its first planting, in September 2026, put 120 young trees into open heathland at Fagrabrekka: mostly native downy birch and rowan, with a few hardy larch on the poorest ground.

Co-founder and CEO Dr Ólafur Margeirsson is an economist by training. His family has been reforesting its own land at Mælifellsá in Skagafjörður since the early 1990s, and he grew up planting trees there with his parents.

Reforest Iceland AG is based in Uetikon am See, Switzerland; all planting happens in Iceland.

FOR COMPANIES

One order from 10 trees, with a certificate for each person carrying their name and the company's logo. Pay by card or invoice. reforesticeland.com/company-gifts
