

# California Assembly Bill 1305 Seller Disclosures

---

Effective January 1, 2024, a business entity that is marketing or selling voluntary carbon offsets within the state of California shall disclose on the business entity's internet website all of the following information:

(a) Details regarding the applicable carbon offset project, including all of the following information:

1. The specific protocol used to estimate emissions reductions or removal benefits.
2. The location of the offset project site.
3. The project timeline.
4. The date when the project started or will start.
5. The dates and quantities when a specified quantity of emissions reductions or removals started or will start, or was modified or reversed.
6. The type of project, including whether the offsets from the project are derived from a carbon removal, an avoided emission, or, in the case of a project with both carbon removals and avoided emissions, the breakdown of offsets from each.
7. Whether the project meets any standards established by law or by a nonprofit entity.
8. The durability period for any project that the seller knows or should know that the durability of the project's greenhouse gas reductions or greenhouse gas removal enhancements is less than the atmospheric lifetime of carbon dioxide emissions.
9. Whether there is independent expert or third-party validation or verification of the project attributes.
10. Emissions reduced or carbon removed on an annual basis.

(b) Details regarding accountability measures if a project is not completed or does not meet the projected emissions reductions or removal benefits, including, but not limited to, details regarding what actions the entity, either directly or by contractual obligation, shall take under both of the following circumstances:

1. If carbon storage projects are reversed.
2. If future emissions reductions do not materialize.

(c) The pertinent data and calculation methods needed to independently reproduce and verify the number of emissions reduction or removal credits issued using the protocol.

| (3) The project timeline.                                                                                                                                                                            | 12/31/2003-12/30/2063                                                                                                                                                                                                                                                                                     |
| (4) The date when the project started or will start.                                                                                                                                                 | 12/31/2003                                                                                                                                                                                                                                                                                                |
| (5) The dates and quantities when a specified quantity of emissions reductions or removals started or will start, or was modified or reversed.                                                       | Reporting period 1/1/2204-7/1/2023: Not yet issued                                                                                                                                                                                                                                                        |
| (6) The type of project.                                                                                                                                                                             | Carbon removal                                                                                                                                                                                                                                                                                            |
| (7) Whether the project meets any standards established by law or by a nonprofit entity.                                                                                                             | Expected Verified Carbon Standard (VCS); Not yet issued                                                                                                                                                                                                                                                   |
| (8) The durability period for any project that the seller knows:                                                                                                                                     | 30 years                                                                                                                                                                                                                                                                                                  |
| (9) Whether there is independent expert or third-party validation or verification.                                                                                                                   | Expected                                                                                                                                                                                                                                                                                                  |
| (10) Emissions reduced or carbon removed on an annual basis.                                                                                                                                         | 649,750 (Estimated average annual emission reductions and carbon dioxide removals)                                                                                                                                                                                                                        |
| (b) Details regarding accountability measures:                                                                                                                                                       |                                                                                                                                                                                                                                                                                                           |
| (1) If carbon storage projects are reversed.                                                                                                                                                         | The VCS Program addresses the risk of reversal by requiring projects to set aside non-tradable buffer credits to cover unforeseen losses in carbon stocks. The buffer credits from all projects are held in a single buffer account, which can be drawn upon in the event of a reversal in carbon stocks. |
| (2) If future emissions reductions do not materialize.                                                                                                                                               | Relae will try to help buyers find alternate credits if credits are not delivered as scheduled. If alternate credits can not be found, mitigation measures will depend on contractual terms and/or the particular situation. Please refer to your contract with Relae for details.                        |
| (c) The pertinent data and calculation methods needed to independently reproduce and verify the number of emissions reduction or removal credits issued using the protocol: <a href="#">VCS 4646</a> |                                                                                                                                                                                                                                                                                                           |

## 02 TIST Program in Uganda, VCS-CCB 011

A business entity that is marketing or selling voluntary carbon offsets within the state shall disclose on the business entity's internet website all of the following information:

| (a) Details regarding the applicable carbon offset project, including all of the following information:                                                                                     |                                                                                                                                                                                                                                                                                                           |

| (9) Whether there is independent expert or third-party validation or verification.                                                                                                          | Yes, AENOR CONFIA, S.A. (UNIPERSONAL)                                                                                                                                                                                                                                                                     |
| (10) Emissions reduced or carbon removed on an annual basis.                                                                                                                                | 121,978 (Estimated average annual emission reductions and carbon dioxide removals)                                                                                                                                                                                                                        |
| (b) Details regarding accountability measures:                                                                                                                                              |                                                                                                                                                                                                                                                                                                           |
| (1) If carbon storage projects are reversed.                                                                                                                                                | The VCS Program addresses the risk of reversal by requiring projects to set aside non-tradable buffer credits to cover unforeseen losses in carbon stocks. The buffer credits from all projects are held in a single buffer account, which can be drawn upon in the event of a reversal in carbon stocks. |
| (2) If future emissions reductions do not materialize.                                                                                                                                      | Relae will try to help buyers find alternate credits if credits are not delivered as scheduled. If alternate credits can not be found, mitigation measures will depend on contractual terms and/or the particular situation. Please refer to your contract with Relae for details.                        |
| (c) The pertinent data and calculation methods needed to independently reproduce and verify the number of emissions reduction or removal credits issued using the protocol: <u>VCS 2497</u> |                                                                                                                                                                                                                                                                                                           |

## 03 Unidad Topia - Salto de Camellones

A business entity that is marketing or selling voluntary carbon offsets within the state shall disclose on the business entity's internet website all of the following information:

| (a) Details regarding the applicable carbon offset project, including all of the following information:                                                                                              |                                                                                                                                                                                                                                                                                                                                                                              |

| (10) Emissions reduced or carbon removed on an annual basis.                                                                                                                                         | 47,564                                                                                                                                                                                                                                                                                                                                                                       |
| (b) Details regarding accountability measures:                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                              |
| (1) If carbon storage projects are reversed.                                                                                                                                                         | Climate Action Reserve (CAR) maintains a buffer pool composed of credits from project types with identified risk of unavoidable reversal. Generally, the Reserve requires that Climate Reserve Tonnes (CRTs) be retired in proportion to any reversals, such that the total number of issued CRTs does not exceed the total quantity of CO <sub>2</sub> stored by a project. |
| (2) If future emissions reductions do not materialize.                                                                                                                                               | Relae will try to help buyers find alternate credits if credits are not delivered as scheduled. If alternate credits can not be found, mitigation measures will depend on contractual terms and/or the particular situation. Please refer to your contract with Relae for details.                                                                                           |
| (c) The pertinent data and calculation methods needed to independently reproduce and verify the number of emissions reduction or removal credits issued using the protocol: <a href="#">CAR 1497</a> |                                                                                                                                                                                                                                                                                                                                                                              |

## 04 BRET - Petcacab

A business entity that is marketing or selling voluntary carbon offsets within the state shall disclose on the business entity's internet website all of the following information:

| (a) Details regarding the applicable carbon offset project, including all of the following information:                                                                                     |                                                                                                                                                                                                                                                                                                                                                                              |

| (10) Emissions reduced or carbon removed on an annual basis.                                                                                                                                         | 97,758                                                                                                                                                                                                                                                                                                                                                                       |
| (b) Details regarding accountability measures:                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                              |
| (1) If carbon storage projects are reversed.                                                                                                                                                         | Climate Action Reserve (CAR) maintains a buffer pool composed of credits from project types with identified risk of unavoidable reversal. Generally, the Reserve requires that Climate Reserve Tonnes (CRTs) be retired in proportion to any reversals, such that the total number of issued CRTs does not exceed the total quantity of CO <sub>2</sub> stored by a project. |
| (2) If future emissions reductions do not materialize.                                                                                                                                               | Relae will try to help buyers find alternate credits if credits are not delivered as scheduled. If alternate credits can not be found, mitigation measures will depend on contractual terms and/or the particular situation. Please refer to your contract with Relae for details.                                                                                           |
| (c) The pertinent data and calculation methods needed to independently reproduce and verify the number of emissions reduction or removal credits issued using the protocol: <a href="#">CAR 1859</a> |                                                                                                                                                                                                                                                                                                                                                                              |

## 06 Weyerhaeuser - Kibby Skinner IFM Project

A business entity that is marketing or selling voluntary carbon offsets within the state shall disclose on the business entity's internet website all of the following information:

| (a) Details regarding the applicable carbon offset project, including all of the following information:                                                                                             |                                                                                                                                                                                                                                                                                    |
