

Everything moves through MachShip

Product Guide

MachShip brings your entire operation into a single platform, giving logistics teams measurable improvements in efficiency, control and visibility. From dispatch and delivery to tracking, reconciliation and the decisions in between, it is the supply chain orchestration platform that ties it all together.

Launched in 2014 by a team of transport, logistics and software specialists, MachShip now gives businesses one platform to manage carriers, move consignments, shape the delivery experience and act on their data.

MachShip helps supply chain professionals

1

Shed manual processes and disparate systems, allowing them to grow and scale

2

Get visibility across your entire operation, from carrier performance to live shipment status

3

Automate the decisions and checks that used to eat their time, from carrier selection to reconciling every invoice

25,000

MachShip customers

2.6x

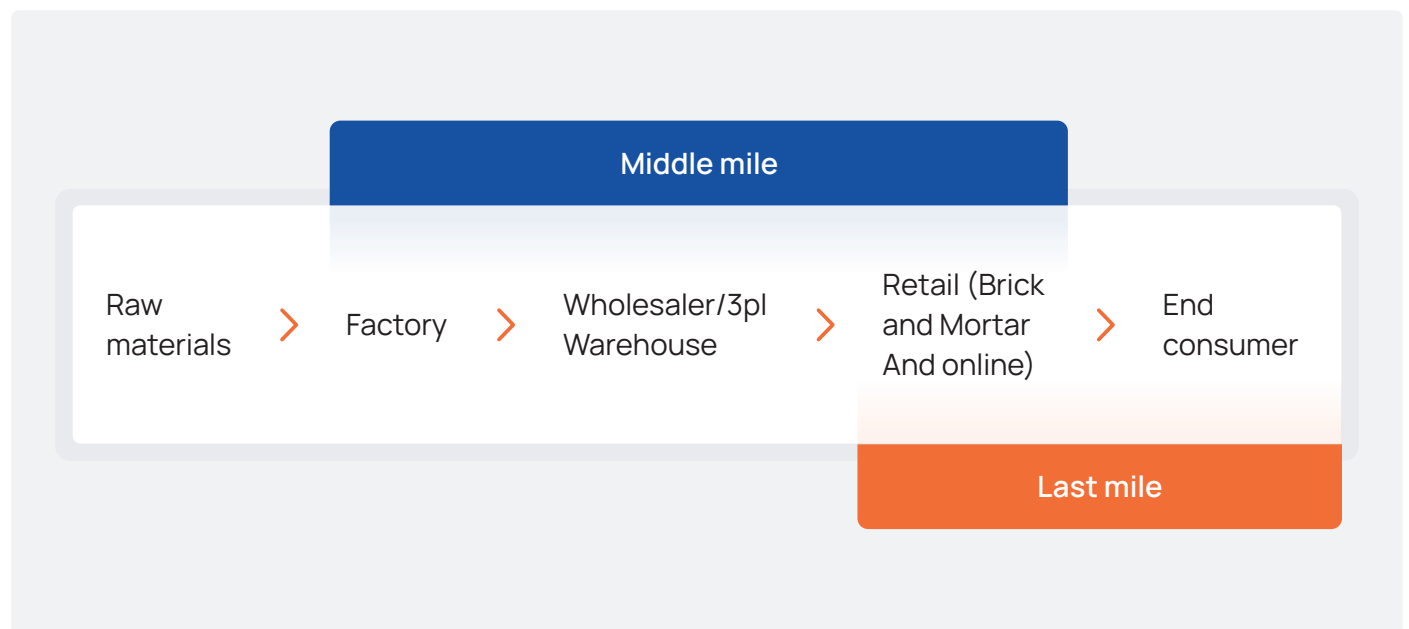

From invoice reconciliation alone our customers experience a 2.6x return on investment

“MachShip went above and beyond to facilitate our integration and set-up, and were constantly available for support. Their platform was easy to use and enabled us to work through 45,000 Big Freeze Beanie orders in less than 4 weeks. It would not have been possible without them. We can not thank them enough.”

Adam Kinross
Fight MND

MachShip brings single-system efficiency and deep integrations to the middle mile, and gives you control over the last mile and the post-purchase experience your customers see.

Efficiency

- Eliminate disparate and manual processes
- Access all your carriers and manage your entire operation in the one place
- From quoting and consigning through to tracking, reconciliation and the post-purchase delivery experience, it all runs in one place
- Seamlessly integrate with your existing ERP, CRM or eCommerce platforms

Control

- Always know the best carrier for the job
- Auto manifest consignments at the right time
- Make MachShip your single source of truth, so every decision is backed by your own operational data

Visibility

- At a glance, get a snapshot of the current state of all your tracking statuses and transport statistics, including real time tracking, fiscal reports, operational reports and work-flow notifications to the user
- Run what-if analysis to model the economic impact of changes in your freight profile over time
- Turn that visibility into action with live dashboards, scheduled reports and insights that flag what needs attention

“MachShip has substantially improved the accuracy of carrier service selection and our visibility over freight once it has left the warehouse. The system, with its easy to use, logical workflow has provided us with a single source of truth over the management of our freight and transport operations allowing us make more informed decisions on cost management and customer service.”

Joe Guthrie
Zenexus

“What I enjoy most, is how quickly I can go from Quote to Booking with no hassles. The “Ready to Go” freight quote gives me information about cost, times and ETA which allows me to provide detailed information to our customers and team.

MachShip’s tracking system saves a huge amount of time when a customer calls in and is chasing their item because I can see exactly where it is. I can easily track when an item has been picked up, in transit and delivered. They also provide information on any delays or cancellations.”
