

**SECURING
ENERGY SUPPLY.**
TAKING
RESPONSIBILITY

ELG

WHO WE ARE

Erdöl-Lagergesellschaft m.b.H. (ELG) is Austria's central stockholding entity. As part of the country's critical infrastructure, we make a key contribution to safeguarding energy supply in times of crisis.

Our mission is clear.

We ensure that Austria has sufficient strategic reserves of crude oil, petroleum products, as well as biogenic raw materials and fuels at all times.

OUR MISSION

- Safeguarding Austria's energy supply in times of crisis
- Fulfilling national and international stockholding obligations
- Ensuring government oversight of and access to strategic energy reserves in an emergency
- Contributing to Austria's economic defence and resilience

ELG operates under a public mandate and ensures that security of supply is maintained at all times.

OUR STATUTORY MANDATE

Our activities are based on the Austrian Oil Stockholding Act (EBG), which requires importers to maintain compulsory emergency reserves.

- ELG manages stockholding on behalf of importers and ensures efficient, centralized organization.
- These strategic reserves provide approximately 90 days of supply security.

In this way, ELG makes a significant contribution to the stability and security of energy supply in Austria and across Europe.

INTER- NATIONAL RESPONSI- BILITY

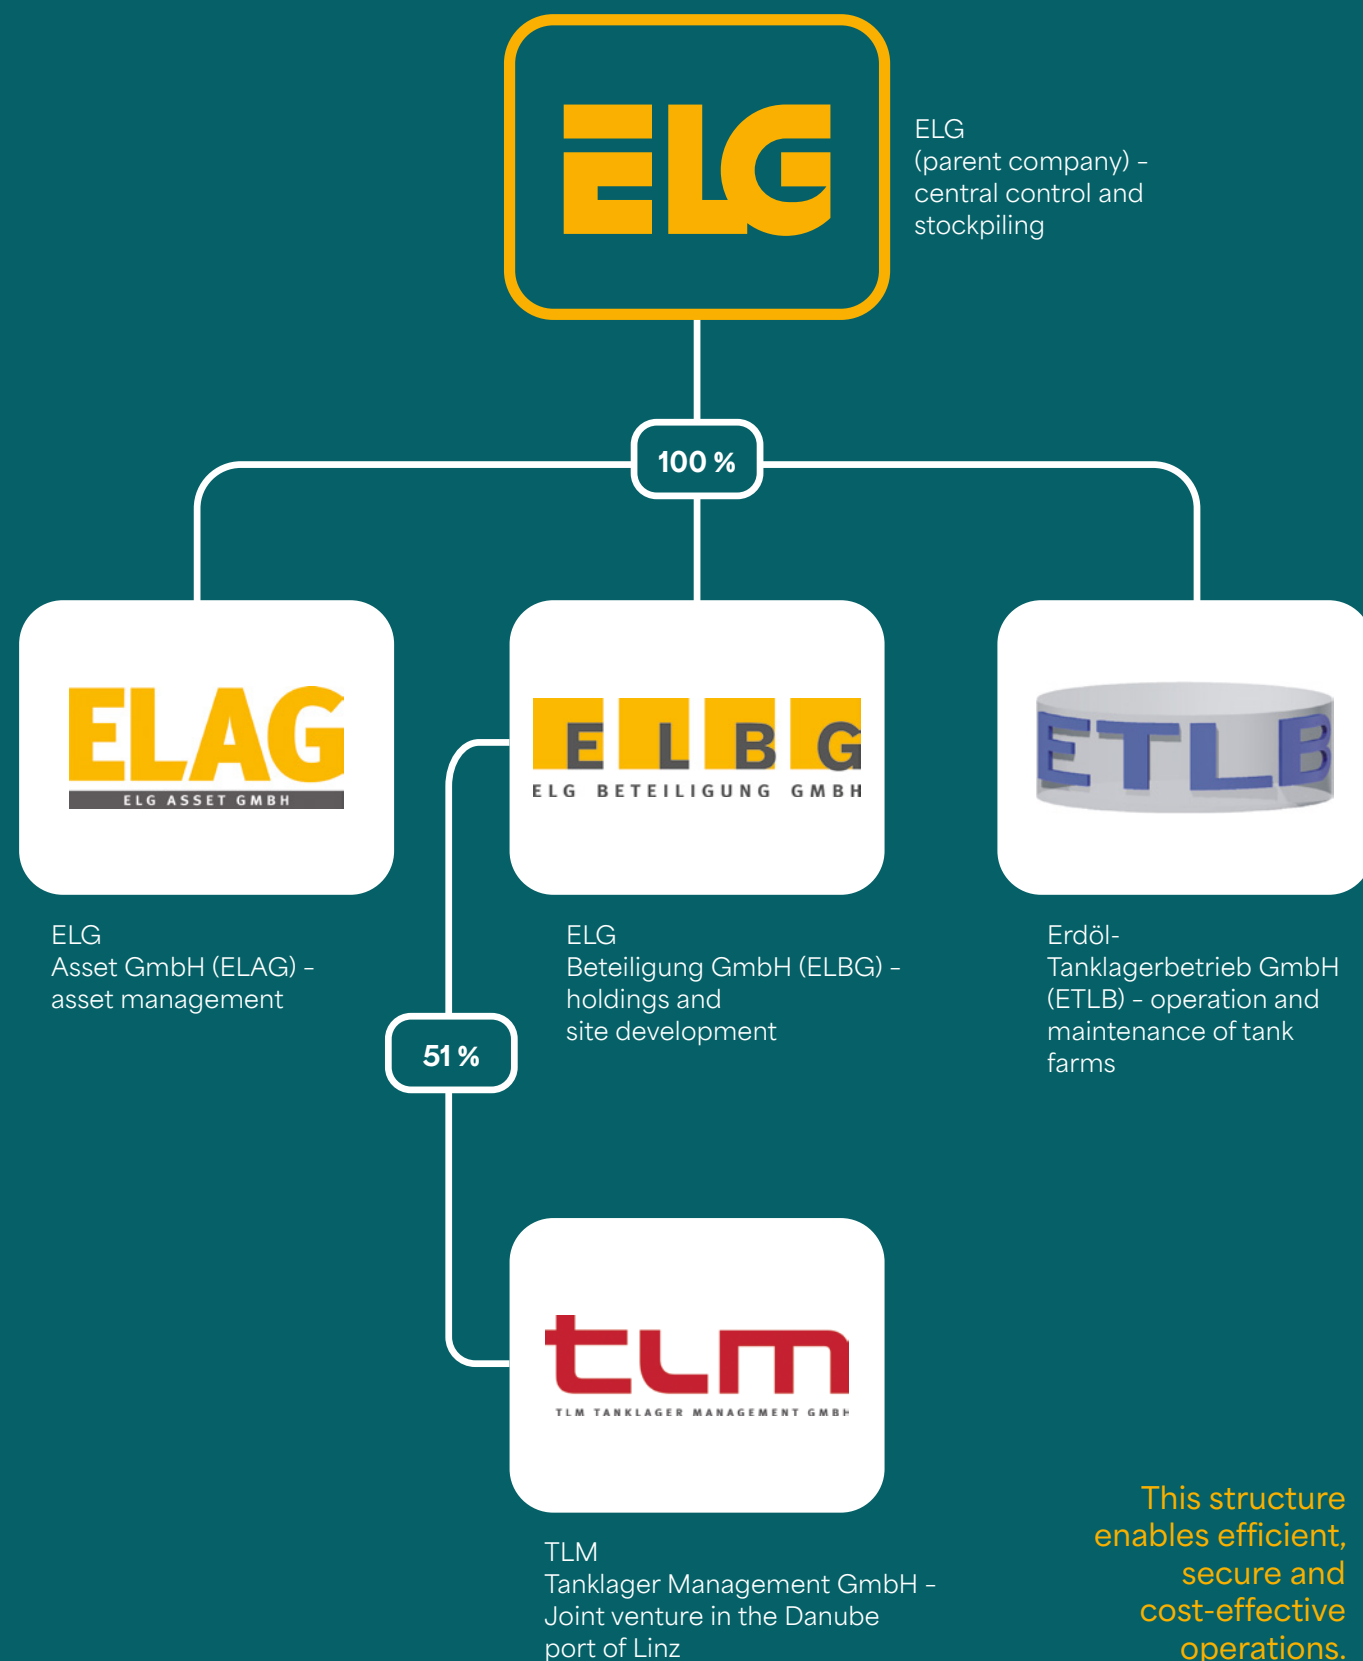

Austria is part of European and global energy security frameworks:

- IEA (International Energy Agency): Obligation to maintain 90-day reserves based on imports
- EU Directive 2009/119/EC: Minimum stocks for crisis preparedness

In Austria, this is executed through a central stockholding entity - ELG.

THE ELG GROUP

ELG is part of a powerful corporate group:

This structure enables efficient, secure and cost-effective operations.

QUALITY MANAGEMENT

BECAUSE SAFETY IS OUR TOP PRIORITY

Every one of our decisions is guided by a clear goal: protecting people, preserving assets and securing supply. For us, safety is more than an obligation – it is an attitude. Whether at the workplace, in our facilities or in digital systems: We create an environment in which our employees feel safe and our customers can rely on us.

As a mineral oil industry company, we bear a special responsibility – for people, facilities, and security of supply. Safety is our top priority: from occupational safety and the health of our employees to the protection of our technical facilities and on to cyber and supply security.

We act with foresight, work to the highest standards and build trust through consistent, safe actions – every day.

INTEGRATED HSSEQ MANAGEMENT SYSTEM

Our management systems are combined in an integrated HSSEQ approach.

QUALITY POLICY (ISO 9001)

Ensuring the supply of crude oil, petroleum products and biogenic raw materials and fuels in market-compliant quality and availability is ELG's core mandate.

- We are committed to consistently complying with all relevant legal, regulatory and customer-specific requirements and to continuously developing our processes.
- Through a process-oriented quality management system certified to ISO 9001, we ensure that all operational procedures are clearly defined, transparently documented, and effectively monitored.

- The continuous improvement of our services and the sustainable assurance of customer satisfaction are at the centre of our actions.

ENVIRONMENTAL POLICY (ISO 14001)

The protection of the environment and natural resources is an integral part of our corporate management.

- We are committed to complying with all environmental regulations and to continuously improving our environmental performance. Our facilities and processes reflect the state of the art and are designed to minimise environmental impacts and prevent incidents.
- Through preventive measures, technical monitoring systems, and targeted investments, we reduce emissions, prevent environmental pollution, and sustainably protect soil and groundwater.

SAFETY AND HEALTH POLICY (ISO 45001)

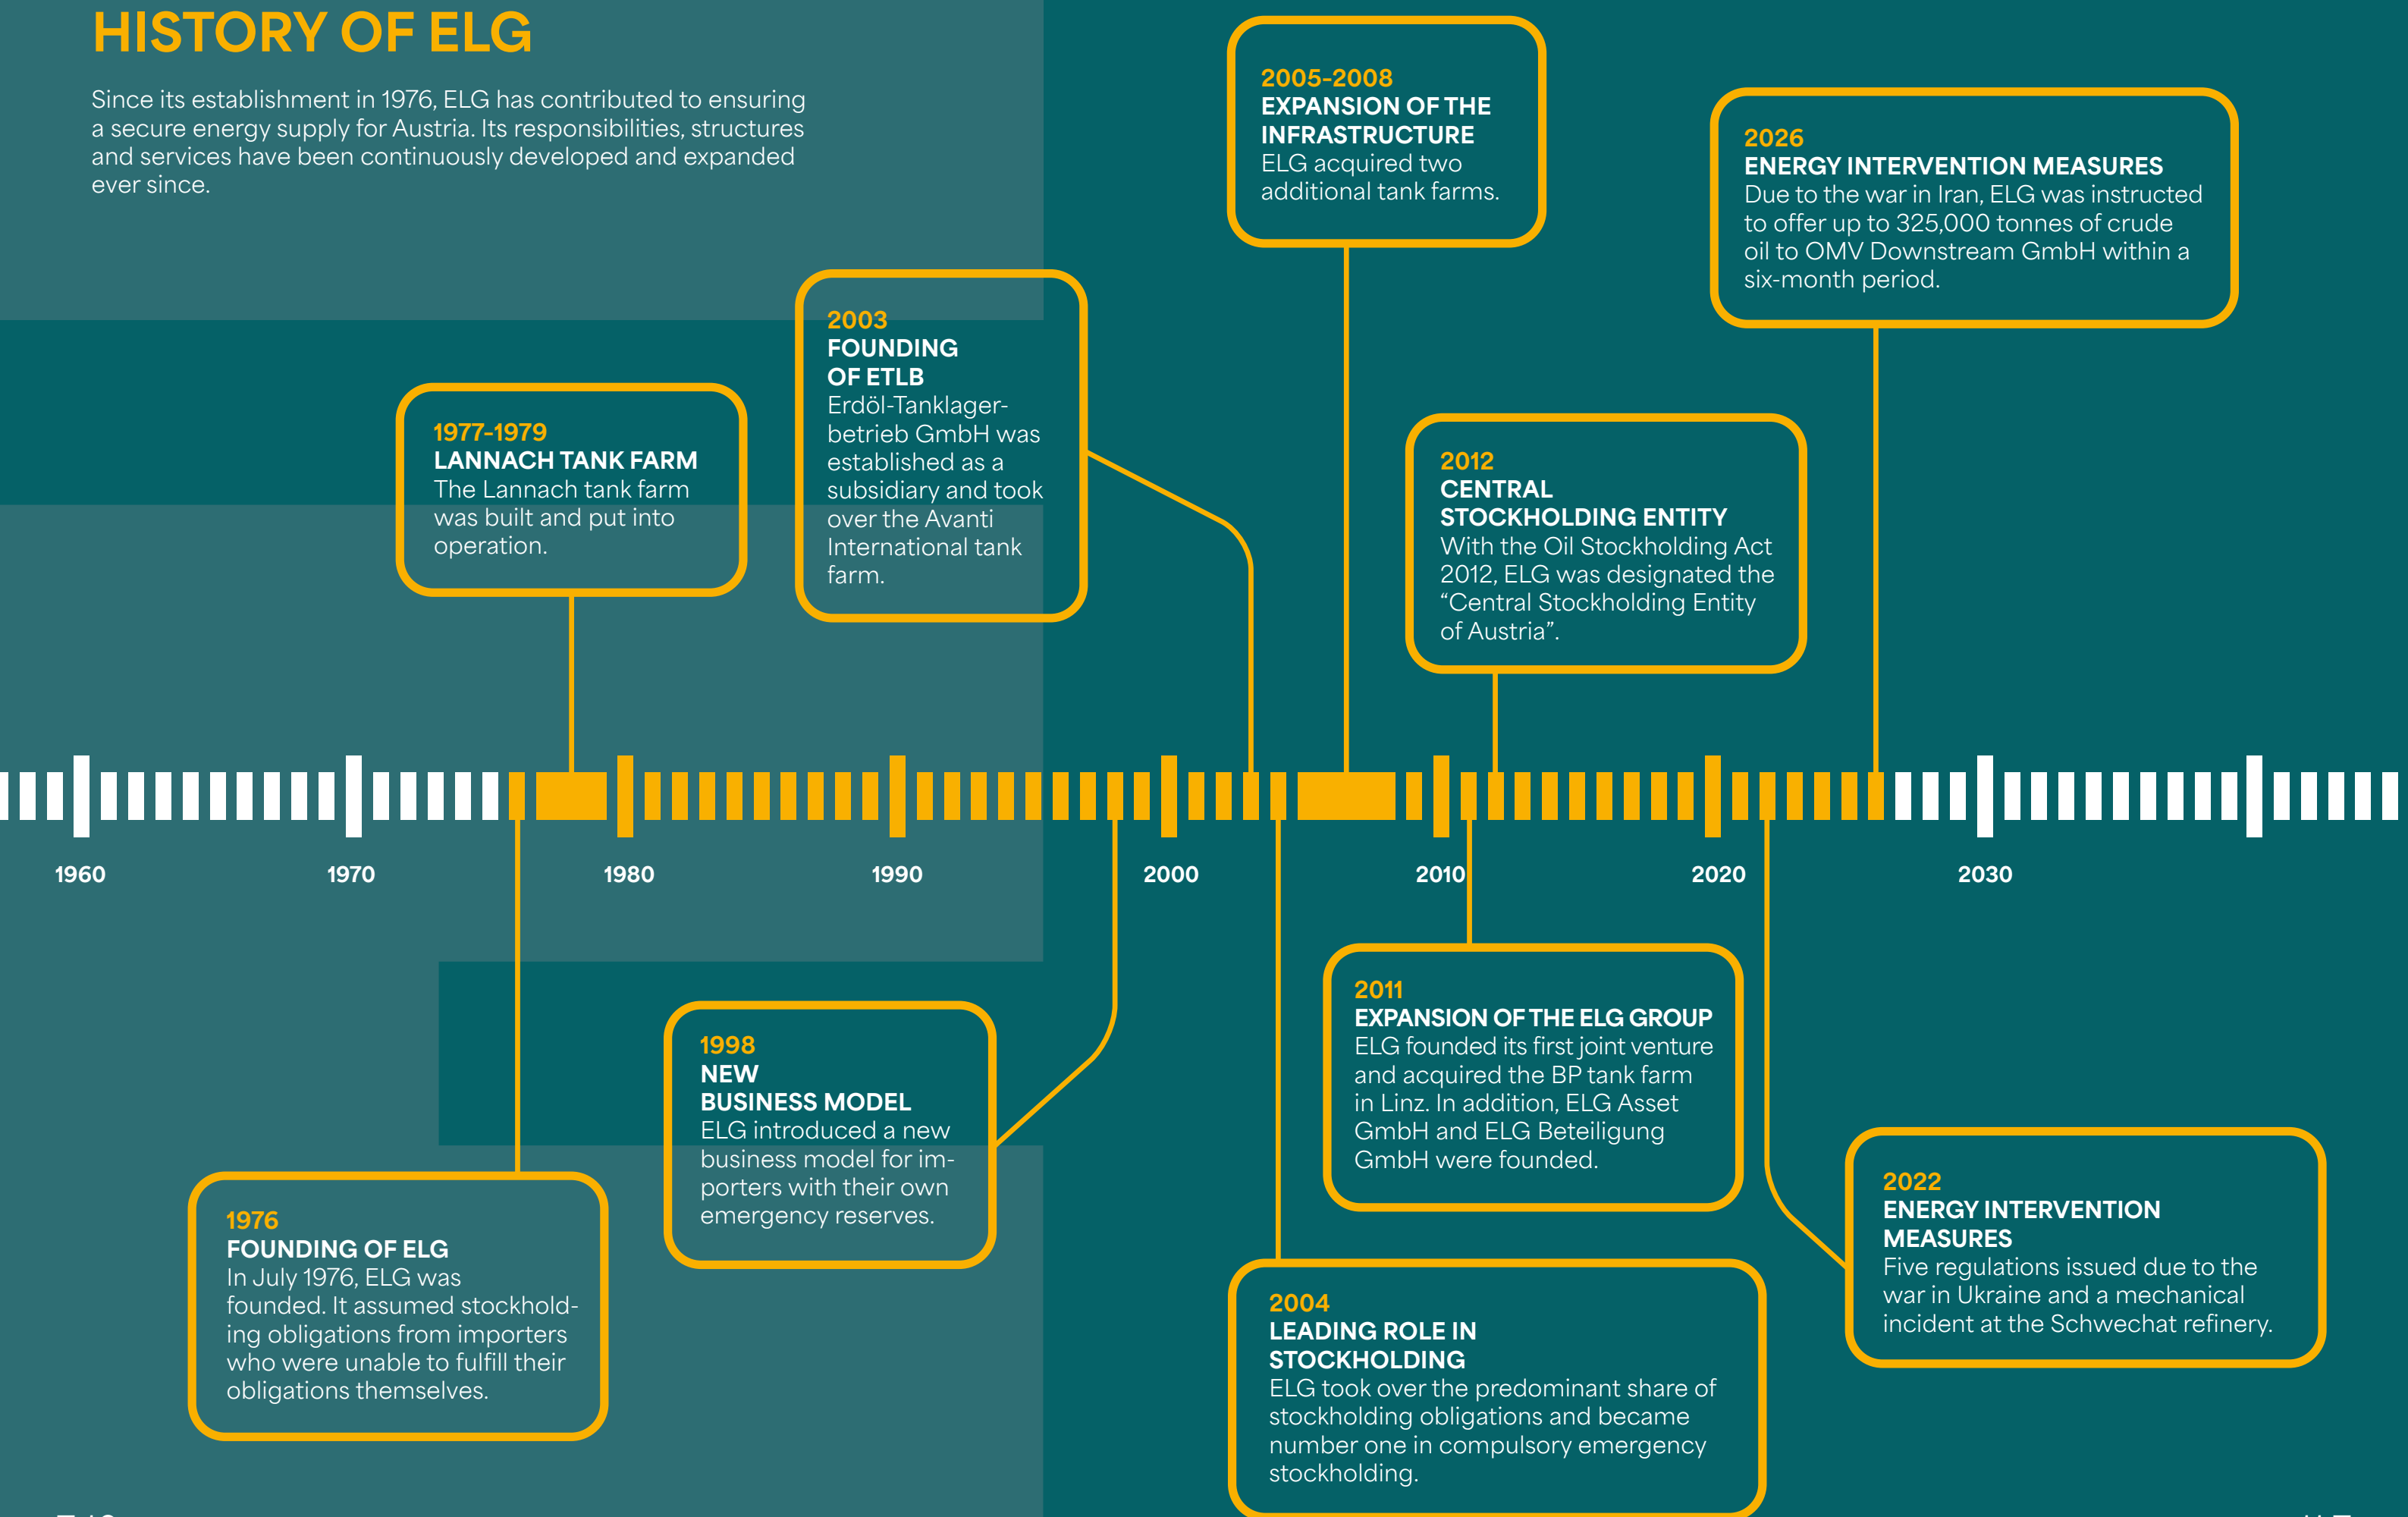

The protection of the lives and health of our employees, partners and third parties has top priority.

- We operate a systematic occupational health and safety management system in accordance with ISO 45001, based on risk assessment, prevention and continuous improvement.
- Hazards are systematically identified, assessed and minimised through appropriate measures. Our safety culture is strengthened through regular training, clear responsibilities and consistent reviews.
- Our goal is accident-free operation and the sustainable promotion of health and safety at all sites.

Through regular audits, training and management reviews, we ensure that our system remains effective and continues to develop.

HISTORY OF ELG

Since its establishment in 1976, ELG has contributed to ensuring a secure energy supply for Austria. Its responsibilities, structures and services have been continuously developed and expanded ever since.

OVERVIEW OF STOCK VOLUMES

Together with its contractual partners, ELG maintains strategic reserves equivalent to approximately 2.5 million tonnes of crude oil equivalent as of July 2026. These reserves provide for around 90 days of emergency supply.

ELG fulfills the stockholding obligations it has assumed through a combination of stocks held in its own facilities and stocks held by third parties. Third-party stocks are maintained by our contractual partners at their storage facilities. The reserves comprise a broad product mix, ranging from crude oil and intermediate products to finished products such as gasoline, diesel, kerosene and extra-light heating oil.

Through these stocks, ELG fulfills both Austria's national and international stockholding obligations.

BUNDESGESETZBLATT FÜR DIE REPUBLIK ÖSTERREICH

Jahrgang 2022 Ausgegeben am 23. September 2022 Teil II

349. Verordnung: Energie-Lenkungsmaßnahmen-Verordnung Erdöl

349. Verordnung der Bundesministerin für Klimaschutz, Umwelt, Energie, Mobilität, Innovation und Technologie über Lenkungsmaßnahmen für feste und flüssige Energieträger (Energie-Lenkungsmaßnahmen-Verordnung Erdöl)

§ 2. (1) Die Erdöl-Lagergesellschaft m.b.H. wird angewiesen, innerhalb eines Zeitraums von drei Wochen ab dem Inkrafttreten dieser Verordnung aus ihren Erdölproduktbeständen oder aus Erdölproduktbeständen, die von einem Dritten für die Erdöl-Lagergesellschaft m.b.H. gemäß § 7 Abs. 1 Z 3 EBG 2012 gelagert werden, 60.000 Tonnen Diesel dem inländischen Mineralölmarkt gemäß Abs. 2 zur Verwendung anzubieten.

(2) Die Freigabe gemäß Abs. 1 hat an die Vorratspflichtigen gemäß § 4 EBG 2012 mit aufrechtem Vertragsverhältnis zur Erdöl-Lagergesellschaft m.b.H. in jenem Verhältnis zu erfolgen, welches ihrem Anteil an der an die Erdöl-Lagergesellschaft m.b.H. übertragenen Gesamtverratspflicht der Bevorratungsperiode 2022/23 entspricht.

ungestörten Gütererzeugung und Leistungserstellung sowie die Versorgung der Bevölkerung und sonstiger Bedarfsträger sicherstellen.

2. Abschnitt

Lenkungsmaßnahmen für feste und flüssige Energieträger

Freigabe von Pflichtnotstandsreserven

§ 2. (1) Die Erdöl-Lagergesellschaft m.b.H. wird angewiesen, innerhalb eines Zeitraums von drei Wochen ab dem Inkrafttreten dieser Verordnung aus ihren Erdölproduktbeständen oder aus Erdölproduktbeständen, die von einem Dritten für die Erdöl-Lagergesellschaft m.b.H. gemäß § 7 Abs. 1 Z 3 EBG 2012 gelagert werden, 60.000 Tonnen Diesel dem inländischen Mineralölmarkt gemäß Abs. 2 zur Verwendung anzubieten.

(2) Die Freigabe gemäß Abs. 1 hat an die Vorratspflichtigen gemäß § 4 EBG 2012 mit aufrechtem Vertragsverhältnis zur Erdöl-Lagergesellschaft m.b.H. in jenem Verhältnis zu erfolgen, welches ihrem Anteil an der an die Erdöl-Lagergesellschaft m.b.H. übertragenen Gesamtverratspflicht der Bevorratungsperiode 2022/23 entspricht.

§ 3. Der Nachweis über den Abbau der Pflichtnotstandsreserven und die Zuführung dieser Mengen an den inländischen Mineralölmarkt gemäß § 2 Abs. 1 und 2 hat durch die Erdöl-Lagergesellschaft m.b.H. gegenüber der Bundesministerin für Klimaschutz, Umwelt, Energie, Mobilität, Innovation und Technologie zu erfolgen.

Vorschriften zur Verwendung der freigegebenen Pflichtnotstandsreserven

§ 4. Die nach dieser Verordnung freigegebenen Erdölprodukte dürfen gemäß § 7 Abs. 2 Z 2 und § 9 Abs. 1 EnLG 2012 nur auf dem Hoheitsgebiet der Republik Österreich abgegeben und bezogen werden.

ELG SITES

LANNACH TANK FARM

- Storage of crude oil and refined products
- Connected via a branch line to the Adria-Wien Pipeline, which runs from the oil terminal in Trieste to the Schwechat refinery

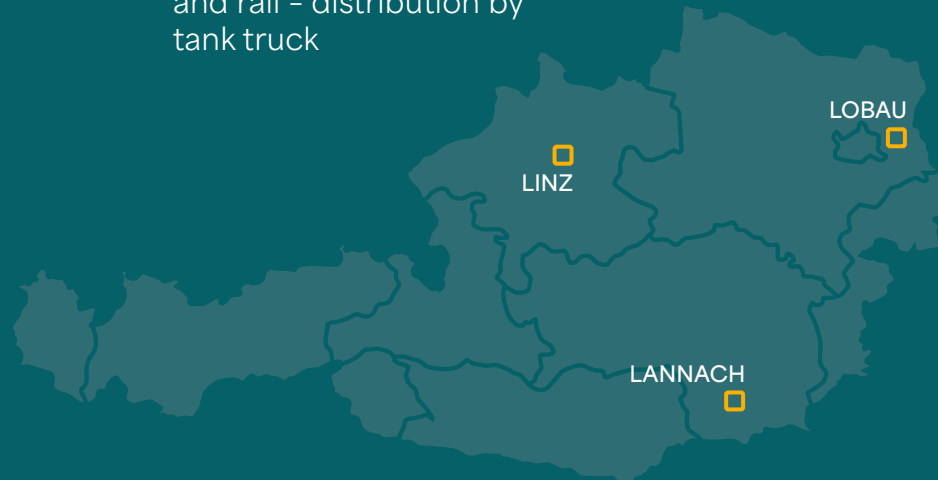

LINZ TANK FARM

- Storage of fuels
- Delivery by ship and rail – distribution by tank truck

LOBAU TANK FARM

- Storage of fuels
- Connections via pipeline, ship, rail and tank truck

WHAT SETS US APART

- High level of energy security for Austria
- Centralized management of strategic reserves
- State-of-the-art infrastructure and processes
- Strong national and international networks
- A reliable partner for business, government and society

RELIABILITY IN EVERY SITUATION

We stand for stability,
security and responsibility.

Securing energy supply.
Taking responsibility.
