

THE SKIN SANCTUARY

BY STACEY

TREATMENTS & PRICES

Personal, honest, no pressure

CLARIS DENTAL, ROSALIND FRANKLIN HOUSE
FORDHAM RD, NEWMARKET, SUFFOLK CB8 7XN
[THESKINSANTUARY-SM.CO.UK](http://theskinsanctuary-sm.co.uk)

A calm, private space for your skin

Personal skin and aesthetics in Newmarket. Unhurried appointments, honest advice and treatments carried out personally by Stacey.

The Skin Sanctuary sits inside Claris Dental at Rosalind Franklin House, one of the most established private practices in Newmarket. It is a quiet, discreet room set aside for skin, with no busy salon floor, no waiting area full of people and no sense of being rushed through.

Every appointment is one to one with Stacey. That means the person who talks through your skin at your consultation is the same person who plans your treatment and carries it out, and the same person you come back to afterwards.

This brochure sets out every treatment offered, what each one actually does, and exactly what it costs. Nothing is hidden and there are no add-on charges revealed on the day.

WHAT YOU CAN EXPECT

Honest advice	You will always be told what is genuinely right for your skin, including when the answer is no treatment at all.
No pressure, ever	Take your time deciding, ask anything, and never feel any pressure to book.
Private one-to-one time	Every appointment is calm and unhurried. Just you and Stacey.
Free consultation	Every treatment begins with a free, no-obligation consultation. There is never a charge to come and talk.

What happens when you visit

Three simple steps, starting with a conversation that costs you nothing.

01 Your free consultation

A relaxed, no-pressure chat. We talk through your skin, your concerns and what you would like to achieve, go over your medical history, and Stacey will honestly recommend whether a treatment is right for you and which one. There is never any obligation to book.

02 Your treatment

Carried out personally by Stacey in a private room, at a pace that suits you. Most people find treatments very manageable. Any discomfort is usually mild and brief, and where it helps a numbing cream or a product containing anaesthetic is used to keep you comfortable. You will always be talked through what to expect first.

03 Your aftercare

Clear, simple aftercare advice before you leave, so you know exactly what to do and what to expect over the next few days. Follow-ups and top-ups are planned around you, never sold to you.

SUITABILITY

Some treatments are not suitable during pregnancy or breastfeeding, or alongside certain medical conditions and medications. Your health and history are gone through carefully at your consultation, and a treatment only goes ahead if it is right and safe for you.

Your treatments

Every treatment offered at The Skin Sanctuary, with the full price list on page 30.

Questions people ask	31

A woman with long dark hair is sitting in a light-colored armchair, looking out a large window. She is wearing a light-colored sweater and pants. The room has a modern feel with vertical blinds and a round mirror on a dark surface to the right.

THE TREATMENTS

Twelve ways to look after your skin

Each one explained plainly, with what it costs, what it involves and how long it lasts, so you can decide in your own time.

INJECTABLE TREATMENTS

Anti-Wrinkle Injections

Softening the lines that form from years of expression, without freezing the face that makes them.

WHAT IT IS

Anti-wrinkle injections relax the small muscles behind repeated expressions such as frowning and squinting. As those muscles soften, the lines they crease into the skin settle and the skin above looks smoother.

The aim is never a frozen look. Doses are planned around your face and the movement you want to keep.

AREAS THAT CAN BE TREATED

Frown lines The vertical lines between the brows.

Forehead lines The horizontal lines across the brow.

Crow's feet The fine lines fanning out from the eyes.

Bunny lines The creases along the top of the nose.

Lip flip A subtle roll of the upper lip.

Chin dimples Softening a dimpled chin.

CHOOSING BETWEEN THE TWO

Alluzience is the premium option: visible within a day or two rather than building over a fortnight, and it lasts longer.

Prices

STANDARD ANTI-WRINKLE TREATMENT

2 areas	£235
3 areas	£260
4 areas	£300
5 areas	£340

ALLUZIENCE, THE PREMIUM OPTION

2 areas	£265
3 areas	£290
4 areas	£330

GOOD TO KNOW

Appointment	About 15 minutes, plus time to talk it through first
Comfort	A few very fine injections. Most people describe a quick scratch, and numbing is not usually needed
Downtime	None for most people. Small pinprick marks or slight redness settle within the hour
When you'll see it	Standard toxin develops over up to 2 weeks. Alluzience can be seen in as little as 24 to 48 hours
How long it lasts	Up to 4 months (standard) or up to 6 months (Alluzience)
Aftercare	Stay upright for 4 hours. No rubbing or massaging the area, and no gym, sauna or facials for 24 hours
Not suitable if	You are pregnant or breastfeeding, or have certain neuromuscular conditions. All of this is checked at consultation
Planning ahead	Allow 2 weeks before an event. Most people repeat every 3 to 4 months

Every treatment begins with a free consultation

THESKINSANTUARY-SM.CO.UK

INJECTABLE TREATMENTS

More Anti-Wrinkle Treatments

The same treatment, used cleverly for the neck, the brow, a heavy jaw, or sweating that will not settle.

WHAT IT IS

The same muscle-relaxing treatment used on expression lines can be used with real precision elsewhere on the face and body. Each of these is a specific technique with a specific aim, and each is planned individually at your consultation.

THE FOUR TREATMENTS

Nefertiti Neck Lift Treats the platysma bands running down the neck, easing the downward pull on the jawline so the neck and lower face look tidier and more defined.

Brow Lift A small, carefully placed dose that relaxes the muscles pulling the brow down, allowing it to sit a little higher and opening up a heavy or hooded eye area.

Excessive Underarm Sweating Reduces sweat production in the underarms for people who find it genuinely affects daily life, clothing and confidence.

Masseters (jaw slimming) Relaxes the large chewing muscles at the jaw. Softens a squared or heavy lower face over time and can ease the tension that comes with clenching and grinding.

WORTH ASKING ABOUT

Jaw slimming is the one people have not heard of and end up most pleased with, especially if you clench or grind at night.

Prices

PER TREATMENT

Nefertiti Neck Lift	£290
Brow Lift	£235
Excessive Underarm Sweating	£290
Masseters (jaw slimming)	£290

GOOD TO KNOW

Appointment	15 to 30 minutes depending on the area
Comfort	Fine injections. Underarm treatment uses more injection points, but each one is quick
Downtime	None for most people
When you'll see it	Over up to 2 weeks. Jaw slimming is slower, with the shape changing over 2 to 3 months
How long it lasts	Typically 3 to 4 months. Masseter and sweating treatments often last longer
Aftercare	Stay upright for 4 hours. Avoid rubbing the area, exercise, saunas and alcohol for 24 hours
Not suitable if	You are pregnant or breastfeeding, or have certain neuromuscular conditions
Planning ahead	Jaw slimming usually needs 2 to 3 rounds before the effect is obvious. Sweating treatment is best booked before summer

Every treatment begins with a free consultation

THESKINSANTUARY-SM.CO.UK

INJECTABLE TREATMENTS

Dermal Fillers

Restoring the volume that quietly disappears with time, and softening the folds it leaves behind.

WHAT IT IS

Hyaluronic-acid dermal fillers are a gel-based treatment used to restore lost volume and softly define your natural features. Hyaluronic acid is a substance the skin already produces, which is part of why it is so well established and well researched.

Filler is placed precisely, in small amounts, where support has been lost. Done well it should look rested rather than treated.

AREAS THAT CAN BE TREATED

Cheeks Restores volume and softens a tired or flattened mid-face.

Jawline Adds gentle definition and balance to the lower face.

Nasolabial folds Softens the lines running from nose to mouth.

Marionette lines Eases the lines running down from the corners of the mouth.

Smokers' lines Softens the fine vertical lines above the lip.

A WORD ON QUANTITY

More filler is not better filler. Cheeks and jawline are best built gradually. It looks more natural, and you see how your face responds first.

Prices

BY AREA

Cheeks, 1ml	£260
Cheeks, 2ml	£450
Jaw, 1ml	£260
Jaw, 2ml	£450
Nasolabial folds	£260
Marionette lines	£260
Smokers' lines	£260

GOOD TO KNOW

Appointment	30 to 45 minutes including numbing and planning
Comfort	Numbing cream is applied first, and the products themselves contain anaesthetic
Downtime	Swelling and tenderness for a few days. Bruising is possible and more likely on the lips and around the mouth
When you'll see it	Immediately, but judge the result at 2 weeks once swelling has fully settled
How long it lasts	Typically 6 to 18 months, depending on the area and how quickly you metabolise it
Aftercare	No make-up for 12 hours. No exercise, alcohol, saunas or facials for 24 to 48 hours, and avoid pressing the area
Not suitable if	You are pregnant or breastfeeding, or have an active skin infection or breakout in the area
Planning ahead	Leave 2 to 3 weeks before a wedding, holiday or event. Build gradually rather than all in one appointment

Every treatment begins with a free consultation

THESKINSANTUARY-SM.CO.UK

INJECTABLE TREATMENTS

Lip Enhancement

Subtle volume and a cleaner edge, designed around your lip shape rather than somebody else's.

WHAT IT IS

Lip enhancement uses hyaluronic-acid dermal filler to add subtle volume and definition, tailored to your face shape and personal preference.

Technique matters more than product. The plan starts from the lips you already have, their shape and their balance, and works with them rather than against them.

WHY CLIENTS CHOOSE IT

Planned around your face Every treatment is planned around your face shape and what you would like to achieve.

Enhance, not alter Careful, considered technique designed to enhance rather than change your natural lip shape.

Quality products Trusted, quality hyaluronic-acid based products for a soft, natural feel.

Comfort throughout Comfort measures are used throughout, and you are talked through each stage.

BEFORE AN EVENT

Never book lips in the week before an occasion. Leave two to three weeks so swelling has settled and you see the real result.

Prices

TREATMENT

Lip filler, 1ml	£260
Consultation	Free
Top-up appointments	Quoted at consultation

GOOD TO KNOW

Appointment	About 45 minutes including numbing
Comfort	Numbing cream first, and the filler contains anaesthetic. Lips are sensitive, but it is brief
Downtime	Swelling is normal and can be marked for 24 to 72 hours. Bruising is possible
When you'll see it	Immediately, but lips look fuller and uneven at first. The real result is at 2 weeks
How long it lasts	Typically 6 to 12 months. Lips move constantly, so they tend to go faster than other areas
Aftercare	No lip make-up or products for 12 hours. No exercise, alcohol or heat for 24 to 48 hours, and no massaging
Not suitable if	You get cold sores. Treatment can trigger one, so say so beforehand and it can be planned around
Planning ahead	Never in the week before an event. Allow 2 to 3 weeks so swelling has completely gone

Every treatment begins with a free consultation

THESKINSANTUARY-SM.CO.UK

SKIN QUALITY & BOOSTERS

Profilo

Bio-remodelling for hydration and firmness from within, without adding volume.

WHAT IT IS

Profilo is an advanced bio-remodelling injectable that delivers one of the highest concentrations of hyaluronic acid available. Rather than adding volume the way a filler does, it spreads through the skin, hydrating it deeply and stimulating your own collagen and elastin.

That difference matters. Profilo is for skin that has lost its bounce and firmness rather than its shape. The lift it gives comes from better skin quality, not from filling.

WHY CLIENTS CHOOSE IT

Deep hydration Supports a fresher, more radiant appearance from within the skin.

Firmness & elasticity Stimulates the skin's own collagen and elastin production.

A subtle lift A gentle tightening effect, without volumising the face.

Builds gradually The improvement develops gently across the course rather than all at once.

Minimal downtime Most people carry on with their normal routine quickly afterwards.

WHY A COURSE OF TWO

Profilo is designed as a two-session protocol. The course of two is both the better outcome and the better price.

Prices

FACE

Single session ————— £270

Course of 2 (recommended) ————— £500

BODY

Neck, arms, abdomen or combinations ————— At consultation

GOOD TO KNOW

Appointment	About 30 minutes
Comfort	Ten injection points across the face, five each side. Quick and generally well tolerated
Downtime	Small raised bumps at each injection point, settling within a few hours
When you'll see it	Hydration early on. Firmness and that subtle lift build across the course and the weeks after
The course	2 sessions, about 4 weeks apart. The second session is what builds the result
Aftercare	No make-up for 12 hours. Do not rub the area, and avoid exercise, saunas and facials for 24 hours
Not suitable if	You are pregnant or breastfeeding, or have an active skin infection
Top-ups	Most people repeat the course every 6 to 9 months to maintain it

Every treatment begins with a free consultation

THESKINSANTUARY-SM.CO.UK

SKIN QUALITY & BOOSTERS

Skin Boosters

Seventy Hyal, hydration delivered where moisturiser cannot reach.

WHAT IT IS

Seventy Hyal is an injectable hyaluronic acid skin booster, designed to work beneath the surface to support deep hydration and help improve the appearance of skin quality and glow.

Skincare works on the surface. A skin booster puts hydration into the layer of skin that no cream can reach, using a series of fine micro-injections across the treatment area. It is one of the best options for skin that simply looks dull, dry and flat rather than lined.

WHY CLIENTS CHOOSE IT

Deep hydration Replenishes moisture, leaving skin feeling softer and more supple.

Quality & glow Reduces dullness for a fresher, healthier-looking finish.

Fine lines & texture May help soften fine lines and uneven texture. Results vary.

A gentle introduction One of the easiest injectable treatments to start with.

BOOSTER OR PROFHILO?

Boosters lead on hydration and glow; Profhilo leads on firmness and lift. Unsure which you need? That is what the consultation is for.

Prices

TREATMENT & COURSES

Single treatment	£160
Course of 2	£300
Course of 3 (best value)	£450

GOOD TO KNOW

Appointment	About 30 minutes
Comfort	A series of fine micro-injections across the area. Numbing cream is available
Downtime	Small bumps and mild redness, usually settling within a few hours
When you'll see it	Hydration is felt early. Glow and skin quality build across the course
The course	2 to 3 sessions, about 4 weeks apart
Aftercare	No make-up for 12 hours. Avoid exercise, heat and facials for 24 hours
Not suitable if	You are pregnant or breastfeeding, or have an active skin infection
Top-ups	Every 6 to 12 months once a course is complete

Every treatment begins with a free consultation

THESKINSANTUARY-SM.CO.UK

SKIN QUALITY & BOOSTERS

Polynucleotides

Vitaran, a repair-led treatment for thin, crepey and tired skin.

WHAT IT IS

Vitaran polynucleotides act as a biostimulatory scaffold within the dermis, delivered through a series of small, superficial injections. They help the skin hold water, calm inflammation and stimulate fibroblast activity, the cells responsible for rebuilding skin structure.

This is a treatment about skin quality rather than shape. It suits crepey texture, thin skin, and areas that need rebuilding rather than filling, which is why it works so well around the eyes.

WHY CLIENTS CHOOSE IT

Texture & fine lines Supports collagen and elastin production for firmer, smoother skin.

Face, neck & décolletage Rejuvenates the areas that show age earliest.

Delicate eye area Gently improves skin quality where the skin is thinnest.

Hands, scarring & hair Also used for hands, acne scarring and hair thinning via scalp mesotherapy.

Microcirculation Elasticity and circulation improve across the course.

OFTEN PAIRED

Polynucleotides improve the skin itself while something else addresses lines or volume. Combinations are sequenced at your consultation.

Prices

PER AREA, PER SESSION

Face	£230
Neck	£230
Eyes	£230
Décolletage	£230

GOOD TO KNOW

Appointment	About 30 minutes per area
Comfort	Multiple small, superficial injections. Numbing cream is used around the eyes
Downtime	Small bumps at the injection points, usually gone within a few hours
When you'll see it	Gradually, across the course, as collagen and elastin production increases
The course	Planned at consultation, typically several sessions 2 to 4 weeks apart
Aftercare	No make-up for 12 hours. Avoid exercise, saunas and facials for 24 hours
Not suitable if	You are pregnant or breastfeeding, or have an active skin infection in the area
Often paired	Sits well alongside treatments that address lines or volume, and the sequencing is planned for you

Every treatment begins with a free consultation

THESKINSANTUARY-SM.CO.UK

SKIN QUALITY & BOOSTERS

SuneKos Under-Eye

The treatment of choice for tired, shadowed eyes, with an honest note about what it can and cannot fix.

WHAT IT IS

SuneKos 200 is an injectable treatment combining low-molecular-weight hyaluronic acid with a patented mix of amino acids. Delivered as gentle micro-injections into the delicate under-eye skin, it hydrates immediately and stimulates collagen and elastin over the weeks that follow.

The under-eye is the hardest area on the face to treat well, because the skin there is thin and unforgiving. SuneKos works by improving the quality of that skin rather than filling underneath it.

WHY CLIENTS CHOOSE IT

Brightening support Softens the look of dark circles for a fresher appearance.

Skin quality Improves thin, crepey texture, fine lines, hydration and elasticity.

Collagen & elastin The amino acid complex encourages natural collagen and elastin formation.

Prices

TREATMENT & COURSE

Per session	£250
Consultation	Free

GOOD TO KNOW

Appointment	About 30 minutes
Comfort	Very fine micro-injections into thin skin. Numbing cream is used
Downtime	Small bumps and possible mild bruising under the eye for a day or two
When you'll see it	Hydration early. Skin quality builds over the weeks following each session
The course	3 sessions, 2 weeks apart
Aftercare	No eye make-up for 12 hours. Do not rub the area, and avoid exercise and heat for 24 hours
Not suitable if	You are pregnant or breastfeeding, or have an active infection around the eye
Top-ups	Usually every 6 to 12 months once the course is complete

AN HONEST NOTE

SuneKos works best where dark circles come from skin quality. Where the cause is pigment or visible blood vessels, it will do less, and it is not a substitute for tear-trough filler. Stacey will tell you honestly at your consultation which category you fall into and whether this is the right treatment for you.

Every treatment begins with a free consultation

THESKINSANTUARY-SM.CO.UK

SKIN QUALITY & BOOSTERS

DermaEye 2.0

For under-eye bags and puffiness. A draining treatment, not a filler.

WHAT IT IS

DermaEye 2.0 is an injectable cosmetic cocktail designed specifically for under-eye bags and puffiness. It works by draining rather than filling, improving microcirculation and stimulating lymphatic drainage to target fluid-filled puffiness at its source.

That distinction is the point. If the problem under your eyes is fluid and swelling rather than hollowing or shadow, adding filler makes it worse. This does the opposite.

THE FORMULA

Acetyl Hexapeptide-30 Supports the appearance of the delicate under-eye area.

Caffeine Long used to reduce the look of puffiness and fluid.

Artichoke extract Supports microcirculation and drainage.

Vitamin C Supports brightness and skin texture around the eye.

BAGS OR HOLLOWS?

Bags and hollows look alike in the mirror and need opposite treatments. Getting that diagnosis right is most of the result.

Prices

TREATMENT & COURSES

Single session	£150
Course of 3	£400
Course of 5 (best value)	£650

GOOD TO KNOW

Appointment	About 30 minutes
Comfort	Small, superficial injections under the eye. Generally very well tolerated
Downtime	None expected for most people
When you'll see it	Puffiness eases across the course rather than after a single session
The course	Typically 2 to 5 sessions, about every 2 weeks
Aftercare	No eye make-up for 12 hours. Avoid rubbing, heat and strenuous exercise for 24 hours
Not suitable if	You are pregnant or breastfeeding, or have an active infection around the eye
Top-ups	Every 6 to 9 months helps hold the result

Every treatment begins with a free consultation

THESKINSANTUARY-SM.CO.UK

SKIN QUALITY & BOOSTERS

Mesotherapy

A cocktail built for your skin, delivered into the layer where it can work.

WHAT IT IS

Mesotherapy involves injecting small amounts of vitamins, minerals, amino acids or other active ingredients directly into the mid-layer of the skin, known as the mesoderm.

Because the blend is chosen rather than fixed, mesotherapy is the most adaptable treatment offered here. The formula is selected at your consultation based on what your skin needs, which is why the price is quoted individually rather than listed.

WHY CLIENTS CHOOSE IT

Hydration support Delivers hyaluronic acid and nutrients to boost hydration, elasticity and radiance.

Targeted treatment Addresses specific concerns such as fine lines, dullness and under-eye hollowing, without affecting surrounding areas.

Collagen stimulation Some formulations encourage the skin's own collagen and elastin production.

Minimal downtime Far less invasive than surgical options, with little to no recovery for most people.

ALSO USED FOR SCALP

Scalp mesotherapy delivers actives directly into the scalp for hair thinning. Ask at your consultation if that is your concern.

Prices

TREATMENT

Mesotherapy	Tailored
Consultation	Free

GOOD TO KNOW

Pricing	Tailored to your skin and confirmed at your free consultation, before anything is booked
Appointment	30 to 45 minutes
Comfort	Very fine, superficial injections. Numbing cream is available
Downtime	Typically minimal, with mild redness or small bumps for a few hours
When you'll see it	Builds over a course. The blend is reviewed as your skin responds
Aftercare	No make-up for 12 hours. Avoid exercise, saunas and facials for 24 hours
Not suitable if	You are pregnant or breastfeeding, or have an active skin infection
Also for scalp	Scalp mesotherapy is used for hair thinning. Ask at your consultation

Every treatment begins with a free consultation

THESKINSANTUARY-SM.CO.UK

SKIN TREATMENTS

Microneedling

Prompting the skin to repair itself, and rebuild the structure underneath.

WHAT IT IS

Microneedling uses a series of fine needles to create controlled micro-channels in the skin, prompting its natural repair process and triggering new collagen and elastin production from within.

Nothing is added. The skin is asked to remodel itself, which is why the results build over a course rather than appearing after one session, and why it works so well on texture, scarring and enlarged pores.

WHY CLIENTS CHOOSE IT

Rebuilds collagen & elastin Controlled micro-channels prompt the skin's own repair response.

Refines texture & scarring Softens acne scars, enlarged pores and fine lines.

Evens out tone Cell turnover improves, reducing the look of pigmentation and dullness.

Lets serums go deeper Actives are carried past the surface layer rather than sitting on top of it.

WHY A COURSE

Collagen remodelling is slow work. One session freshens the skin, while scarring and texture need a course, which is why five is the best value.

Prices

TREATMENT & COURSES

Single session	£90
Course of 3	£250
Course of 5 (best value)	£410

GOOD TO KNOW

Appointment	45 to 60 minutes including numbing
Comfort	Numbing cream for 20 to 30 minutes first. Most describe a prickly, warm sensation
Downtime	Redness like mild sunburn for 24 to 48 hours, sometimes with dryness or light flaking after
When you'll see it	A glow within a week. Texture and scarring improve across a course as collagen remodels
The course	3 to 5 sessions, around 4 weeks apart, is where the real change happens
Aftercare	No make-up for 24 hours. No exercise, saunas or swimming for 48 hours. Gentle cleansing and daily SPF
Not suitable if	You are pregnant, have active acne, eczema or infection in the area, or have recently taken oral acne medication
Next steps	Maintenance every 6 to 12 months once a course is complete

Every treatment begins with a free consultation

THESKINSANTUARY-SM.CO.UK

SKIN TREATMENTS

Chemical Peels

Resurfacing done properly, with the strength chosen for your skin rather than off a menu.

WHAT IT IS

A chemical peel is a controlled, professional application of a solution that gently removes damaged outer layers of skin, encouraging exfoliation and stimulating the skin's regeneration response.

The strength is chosen for your skin type and what you are trying to change. That is the difference between a peel that works and one that does nothing or goes too far.

WHY CLIENTS CHOOSE IT

Texture & pores Smooths rough or uneven texture and reduces the appearance of enlarged pores.

Sun damage Improves uneven pigmentation and dull complexions.

Lines, acne & scarring Can reduce fine lines and wrinkles, help acne and soften acne scars.

Tailored strength The strength is selected for your individual skin type.

SUN AND PEELS

Peels and strong sun do not mix. Daily SPF afterwards is not optional, and courses are best planned outside high summer.

Prices

TREATMENT & COURSES

Single session	£90
Course of 3	£250
Course of 5 (best value)	£400

GOOD TO KNOW

Appointment	About 30 minutes
Comfort	Mild warmth or tingling while the solution is on. It is neutralised before you leave
Downtime	Redness, tightness and light flaking for 2 to 5 days, depending on the strength used
When you'll see it	Brightness within a week. Pigmentation and texture improve across a course
The course	3 to 5 sessions, spaced to let the skin fully recover between treatments
Aftercare	No make-up for 24 hours. Do not pick or pull flaking skin. No exercise or saunas for 48 hours. Daily SPF
Not suitable if	You are pregnant, get cold sores, have recently been in strong sun or on a sunbed, or have recently taken oral acne medication
Next steps	Maintenance peels every few months, ideally planned outside the height of summer

Every treatment begins with a free consultation

CONSULTATION

Skin consultation	Free
-------------------	------

COURSES, PAYMENT & GIFTING

Courses

Available on most treatments and spaced to suit you. Course prices sit below the individual session cost.

Payment

Taken at your appointment and discussed openly at your free consultation, never on the spot.

Gift vouchers

Available for any treatment or as a set amount, and made out for a specific occasion.

Before you book

What happens at a free consultation?

It is a relaxed, no-pressure chat. We talk through your skin, your concerns and what you would like to achieve, go over your medical history, and Stacey will honestly recommend whether a treatment is right for you and which one. There is never any obligation to book.

Do the treatments hurt?

Most people find them very manageable. Any discomfort is usually mild and brief, and where it helps a numbing cream or products containing anaesthetic are used to keep you comfortable.

Will I need any downtime?

It depends on the treatment. Anti-wrinkle injections and skin boosters let you carry on with your day. Microneedling and peels can leave you a little red or flushed for a day or two. The likely downtime is always explained beforehand.

How long do the results last?

This varies by treatment and by person. As a guide, anti-wrinkle injections tend to last around three to four months and dermal fillers around six to eighteen months, while Profhilo, peels and microneedling build their results gradually over a course.

Who will carry out my treatment?

Every treatment is carried out personally by Stacey, in a private, calm space inside Claris Dental, so you are always in experienced, one-to-one care.

How do I know if a treatment is suitable for me?

That is exactly what the free consultation is for. Your health and history are gone through carefully, and a treatment only goes ahead if it is right and safe for you.

How do I book?

The easiest way is to book a free consultation through the website, and we take it from there.

PLEASE NOTE

Prices correct at the time of printing and subject to change. Results vary from person to person and there are no guarantees. An honest, realistic idea of what to expect is given at your free consultation.
