

A New Approach to Take-Home Methadone

We know increasing access to take-home methadone improves retention and does not result in increased overdoses. We also know OTPs often limit the availability of take-homes because of safety or engagement concerns.

Patients need a way to overcome barriers to achieving their treatment goals, without losing the opportunity to engage with their care teams. **So, how can OTPs maximize the safety of take-home methadone doses?**

Sonara's hybrid care platform makes it easier for providers to effectively treat their patients, anytime, anywhere.

Virtual Dosing Window™

Take-home dose recording and virtual callbacks/diversion checks.

Expanded access and engagement

A powerful toolset for remote counseling, intakes, and messaging.

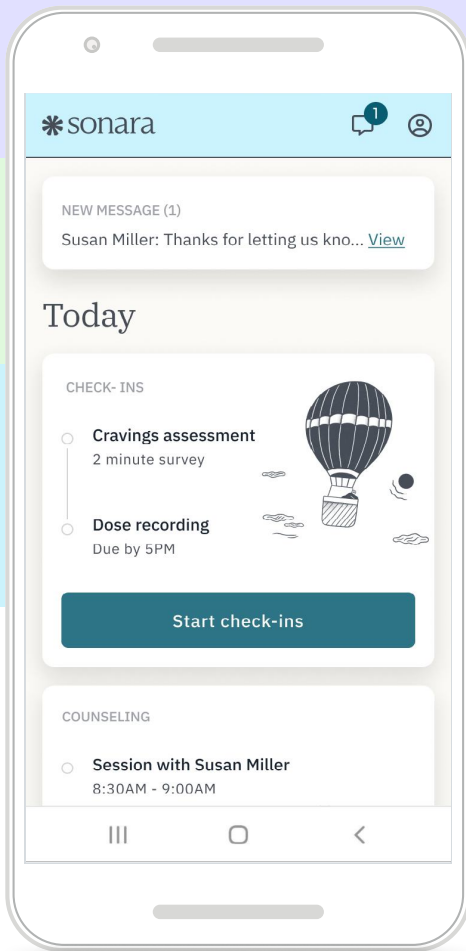

Evidence-based patient outcomes

Enabling providers to make data-informed care decisions for each patient.

Our Design

Sonara's equity-led design supports a diverse patient population, with:

- No app download required
- Works on any device with a camera and a 2G mobile or internet connection
- Language at a 2nd grade reading level
- HIPAA compliant, Class I Medical Device

Better Access. Greater Trust. Improved Outcomes.

Sonara's clinician platform helps OTPs and patients build trust, enabling increased take-homes without putting patients at risk.

89% of clinicians agree
Sonara added value*

Together, We Can:

- Safely increase access to take-home methadone.
- Improve patient retention, engagement, and satisfaction.
- Enhance trust between patients and providers.
- Reduce patient wait times and improve staff productivity.

Partner with us to remove barriers to life-saving methadone treatment and empower your patients to reach their treatment goals.

Implement Sonara in Minutes to Treat Patients Where They Are.

1. Enroll patients in Sonara.
2. Add Sonara's tamper-aware labels to each take-home methadone bottle.
3. The patient records video of their take-home doses using Sonara.
4. Review the take-home videos asynchronously to ensure proper dosing.

Contact Phil Beck at phil@sonarahealth.com for a demo.

"This truly has changed my life in so many ways. I've been able to focus on the things I need to stay clean. Thank you so much Sonara for this wonderful, life-changing program."

OTP Patient Enrolled in Sonara

"Sonara has provided not just increased access for our patients, but has given our providers more security in feeling like they can expand take-homes. It's just the level of support they needed."

Nicole Ross

Regional Director at BHG
