OBJECTIVE

Seeking buyer for a profitable, sustainable, and growing membership-based website (www.ADHDDudeCourses.com) with 4,200 monthly subscribers, over 99K social media followers, and \$1M in annual revenue. The American Academy of Pediatrics treatment recommendations for children with ADHD include medication management in conjunction parent training. There are ways to obtain medication, but very few parental training resources. With 5% of the child population diagnosed with ADHD, there is an enormous gap in the ADHD treatment market that is filled with ADHD Dude's Parent Training programs. No other programs are ADHD-specific to educate parents on how to help their children. Ryan created the ADHD Dude methodology and innovative curriculum as an accomplished clinician, school social worker, program director and content creator with over 20 years of experience working with families and children with ADHD and other neurodevelopmental conditions.
