AY26–27 ASME Elevator Pitch Rules & Prizes

An elevator pitch is a brief, persuasive speech that you use to spark interest in what you and/or your organization does. It is designed to create interest in a project, idea, product—or in yourself.

What is the ASME Elevator Pitch Competition?

An elevator pitch of 90 seconds or less is intended to “sell” your ideas and skillset to a potential employer, decision maker, or influencer. You only need to provide enough details during the presentation to entice your audience to meet with you again for a more detailed conversation. In other words, you want to compel the audience to bring you back for a further conversation.

Do you want to show off your speaking skills and/or power of persuasion? Do you want to introduce an idea succinctly? If yes, then show us your imagination and join us for the ASME Elevator Pitch Competition.

Prizes

1st place	$250.00
2nd place	$150.00
3rd place	$75.00

Winners also receive an ASME Digital Badge. Learn more about digital badges.
