

Simplify Surcharging in NetSuite

Surcharging allows businesses to recoup credit card processing fees by adding the cost to a customer's total bill when they pay with a credit card. This added cost helps offset credit card processing expenses, while still allowing customers to avoid it by choosing another payment method.

InterPayments, a Managed Surcharge Provider, has partnered with [Code of the North](#) to enable businesses to implement, manage, and reconcile compliant surcharging directly within NetSuite. By integrating with NetSuite's invoicing and payment transactions, InterPayments allows businesses to recover transaction costs without the need to replace existing payment processes or vendors. Our solution powers surcharging for various NetSuite transactions, including phone orders, invoices, recurring billing, sales orders, and more. This integration supports the Cybersource payment gateway configuration.

Compliance Guaranteed

Automatically calculate and apply surcharges when applicable while maintaining full compliance with state/provincial, federal, and card brand regulations, backed by indemnification

Seamless Implementation

We provide expert consultative services and a dedicated compliance team to support your surcharge implementation every step of the way – before, during, and after you go live

Selective Surcharging

Target fee recovery on payments that create the most margin pressure, such as specific customer types, product lines, and geographies

Auditing Tools

Be in the know with 24/7/365 real-time data on surcharged transactions and savings

InterPayments Certification

Get certified on all applicable laws and regulations around surcharging, with annual re-certifications

Surcharging with NetSuite + InterPayments

- 1 Service Rep Begins Order in NetSuite
- 2 Order is sent to InterPayments to get Surcharge Amount
- 3 Surcharge Amount is shown as a Line item on the Transaction
- 4 Customer is informed of the Amount of the Surcharge
- 5 Record is Stored InterPayments and in NetSuite
- 6 Collect the Surcharge

Together, **InterPayments** and **Code of the North** help businesses lower costs and achieve significant savings without raising prices for their customers. Our solution puts customers first by empowering all teams involved in surcharging, enabling businesses to provide full payment transparency. We deliver convenient and efficient surcharging with minimal operational overhead.
