Highlights

- April 2022 – The Company committed to invest up to €3.5 million to set up Nordic Renewables Limited, a new development platform focused on onshore wind farms and solar PV assets in Finland.
- May 2022 - ORIT acquired a 7.75% ownership interest in the Lincs Offshore Wind Farm, which has an installed capacity of 270MW, made up of 75 turbines each of 3.6 MW.
- June 2022 - The Company acquired Breach Solar Farm, a c.68MW ready-to-build solar PV project in Cambridgeshire, UK. The acquisition also gives the Company the right to construct a battery storage project which is expected to be ready-to-build later in 2022, with a capacity of 50MW/100MWh.
- June 2022 - ORIT agreed to acquire a 50% stake in a 12MW/24MWh ready-to-build battery storage project in Bedfordshire, UK,
- Following an increase in power prices observed over recent months, the Company has fixed pricing on a significant portion of ouput for the remainder of 2022 and 2023 at the Saunamaa and Suolakangas wind farms in Finland and Penhale solar farm in the UK. As at 30 June 2022, 60% of ORIT's forecast revenues over the period to 30 June 2024 are fixed (56% over the period to 31 March 2024 as at 31 March 2022).

Dividends

- Dividend of 1.31p per share declared in respect of Q2 2022 payable on 26 August 2022 to shareholders on the register on 12 August 2022. The Company has a progressive dividend policy and is targeting a dividend of 5.24p for FY 2022[1].

Investment Policy

The Company intends to invest both in a geographically and technologically diversified spread of Renewable Energy Assets and, over the long term, it is expected that:

- Investments located in the UK will represent less than 50% of the total value of all investments[2];
- Investments in any single country other than the UK will represent no more than 40% of the total value of all investments; and
- Investment in (i) onshore and offshore* wind farms and (ii) solar PV parks will not exceed 60% of the total value of all investments.

Investments that are under development will represent less than 5% Gross Asset Value[3]. Our full Investment Policy is available on our website.

**The inclusion of offshore wind in the core wind allocation was approved by Shareholders on 28 July 2022.*

1,510GWh
Estimated annual production of electricity[4]

440k
Equivalent homes powered by clean energy[4]

481k
Estimated tonnes of carbon avoided[4]

2,360k
Equivalent new trees required to avoid the same carbon[4]

Our Impact Goal: Accelerate the transition to net zero

Investing in ORIT enables investors to contribute to climate change solutions. ORIT's investments into operational and construction renewable energy assets are part of the solution to meet global warming targets.

Our approach embeds ESG and impact into our investment strategy, considering all investments through the lenses of Performance, Planet and People. It is our intent to seek opportunities to enhance the environment and communities we operate in and we will measure and track the positive impact investments have for investors, the environment and society.

We are committed to being a responsible investor and our Investment Manager is a signatory of the UNPRI. ORIT has been awarded the Green Economy mark from the London Stock Exchange.

Octopus Renewables

Octopus Renewables was set up in 2010 as the specialist renewable energy investment business within the Investment Manager based on the belief that investors can play a vital role in helping to avert climate change. Octopus Renewables' mission is simple: accelerate the transition to a clean energy future through unblocking investment into climate saving assets.

Key Risks

An investment in ORIT will place capital at risk. The value of investments, and any income, can go down as well as up, so investors could get back less than the amount invested.

Neither past performance nor any forecasts should be considered a reliable indicator of future results. Actual performance will, inter alia, depend on factors such as wholesale power prices, power purchase agreements, regulatory environment, government incentives, exchange rates, inflation, grid connections, asset concentrations site performance.

ORIT will invest in renewable energy assets which are in development or under construction and, therefore, may be exposed to certain risks, such as permit rejection, lack of grid capacity, cost overruns, construction delay and construction defects, which may be outside ORIT's control.

Investment valuation is based on financial projections for the Company's relevant Renewable Energy Assets. Projections will primarily be based on the Investment Manager's assessment and are only estimates based on assumptions made at the time of the projection.

[1] The dividend targets stated are targets only and not profit forecasts. There can be no assurance that these targets will be met, or that the Company will make any distributions at all and they should not be taken as an indication of the Company's expected future results. The Company's actual returns will depend upon a number of factors, including but not limited to the Company's net income and level of ongoing charges. Accordingly, potential investors should not place any reliance on these targets and should decide for themselves whether or not the target dividend is reasonable or achievable. Investors should note that references in this announcement to "dividends" and "distributions" are intended to cover both dividend income and income which is designated as an interest distribution for UK tax purposes and therefore subject to the interest streaming regime applicable to investment trusts
[2] For the purposes of this paragraph, the "total value of all investments" shall (i) be valued on an unlevered basis, (ii) include amounts committed but not yet incurred and (iii) include Cash and Cash Equivalents to the extent not already included in the value of investments or amounts committed but not yet incurred.
[3] "Gross Asset Value" means the aggregate of (i) the fair value if the Company's underlying investments (whether or not subsidiaries), valued on an unlevered basis, (ii) the relevant assets and liabilities of the Company (including cash) valued at fair value (other than third party borrowings) to the extent not included in (i) or (ii) above.
[4] All metrics are calculated based on an estimated annual production of the whole portfolio once fully constructed.
[5] Excludes conditional acquisitions.
[6] Portfolio composition on a total invested basis in line with the Company's investment policy (including the amount committed to the conditional acquisition of the Spanish and Irish solar PV assets and Woburn Road Battery) as at 30 June 2022. The investments are valued on an unlevered basis and including amounts committed but not yet incurred.
[7] Portfolio composition by MW on a current invested basis (and therefore exclude the amount committed to the conditional acquisition of the Spanish and Irish solar PV assets and Woburn Road Battery) as at 30 June 2022.
[8] EV= Deployed Enterprise Value; Octopus Renewables, 31 March 2022.
[9] As at 31 March 2022. Total committed EV of assets either currently in construction or constructed under Octopus management. Some of these assets are now operational within our portfolio.
