Highlights

- July 2020 - Acquisition of a 100% interest in a portfolio of operational solar PV assets located across France for a cash consideration of €58.9m (£53.4m). The portfolio consists of 14 fully operational solar PV assets with a total installed capacity of 119.5MW which all benefit from feed-in-tariffs ("FiT") for 100% of their output and was acquired with €99m of existing debt in place.
- September 2020 - Acquisition of a 100% interest in a portfolio of 4 solar PV assets located in Southern Spain, with completion of the acquisition conditional on the assets becoming ready to build, expected by January 2023. The acquisition cost is €37.8m (£34.5m) which will be due once the portfolio is construction ready.
- As at 30 September 2020, the Company had committed approximately 85% of the net proceeds raised at its IPO in December 2019.
- Post the period end the Company announced the acquisition of a 100% interest in a construction ready wind farm in France with a capacity of 24MW and total acquisition and construction cost of €56m (£50m) meaning the IPO proceeds are now fully committed.

Dividends

- Dividend of 1.06p per share declared in respect of Q3 2020 payable on 27 November 2020 to shareholders on the register on 13 November 2020. Total dividend declared year to date is 2.12p, in line with the Company's stated target.
- The Company is targeting an initial annualised dividend yield of 3% by reference to the IPO price, equating to 3.18 pence per Ordinary Share for FY 2020 (10 December 2019 to 31 December 2020), rising to a target annualised dividend yield of 5% in FY2021, with a progressive dividend policy thereafter¹.

Investment Policy

The Company intends to invest both in a geographically and technologically diversified spread of Renewable Energy Assets and, over the long term, it is expected that:

- investments located in the UK will represent less than 50% of Gross Asset Value;
- investments in any single country other than the UK will represent no more than 40% of Gross Asset Value;
- investment in onshore wind farms will not exceed 60% of Gross Asset Value; and
- investment in solar PV parks will not exceed 60% of Gross Asset Value.

Our Impact Goal: Accelerate the transition to net zero

Investing in ORIT enables investors to contribute to climate change solutions. ORIT's investments into operational and construction renewable energy assets are part of the solution to meet global warming targets.

Our approach embeds ESG and impact into our investment strategy, considering all investments through the lenses of Performance, Planet and People. It is our intent to seek opportunities to enhance the environment and communities we operate in and we will measure and track the positive impact investments have for investors, the environment and society.

We are committed to being a responsible investor and our Investment Manager is a signatory of the UNPRI. ORIT has been awarded the Green Economy mark from the London Stock Exchange.

Octopus Renewables Infrastructure Trust plc (ORIT)

Factsheet - 30 September 2020

octopus renewables
A brighter way

Octopus Renewables

Octopus Renewables was set up in 2010 as the specialist renewable energy investment business within the Investment Manager based on the belief that investors can play a vital role in helping to avert climate change. Octopus Renewables' mission is simple: accelerate the transition to a clean energy future through unblocking investment into climate saving assets.

Key Risks

An investment in ORIT will place capital at risk. The value of investments, and any income, can go down as well as up, so investors could get back less than the amount invested.

Neither past performance nor any forecasts should be considered a reliable indicator of future results. Actual performance will, inter alia, depend on factors such as wholesale power prices, power purchase agreements, regulatory environment, government incentives, exchange rates, inflation, grid connections, asset concentrations site performance.

ORIT will invest in renewable energy assets which are under construction and, therefore, may be exposed to certain risks, such as cost overruns, construction delay and construction defects, which may be outside ORIT's control.

Investment valuation is based on financial projections for the Company's relevant Renewable Energy Assets. Projections will primarily be based on the Investment Manager's assessment and are only estimates of future results based on assumptions made at the time of the projection.

¹ The dividend and return targets stated are targets only and not profit forecasts. There can be no assurance that these targets will be met, or that the Company will make any distributions at all and they should not be taken as an indication of the Company's expected future results. The Company's actual returns will depend upon a number of factors, including but not limited to the Company's net income and level of ongoing charges. Accordingly, potential investors should not place any reliance on these targets and should decide for themselves whether or not the target dividend and target net total shareholder return are reasonable or achievable. Investors should note that references in this announcement to "dividends" and "distributions" are intended to cover both dividend income and income which is designated as an interest distribution for UK tax purposes and therefore subject to the interest streaming regime applicable to investment trusts.

² All metrics are calculated based on an estimated annual production of the whole portfolio once fully constructed.
