octopus renewables infrastructure trust

Q1 2023 Presentation

Important information

This document is issued by Octopus Renewables Limited (trading as Octopus Energy Generation) ("Octopus") in connection with Octopus Renewables Infrastructure Trust plc (the "Company") for information purposes only for the confidential use of only those persons to whom it is distributed and is not to be reproduced, distributed or used for any other purpose. By accepting delivery of this document, each recipient agrees to treat this document as strictly confidential and not to reproduce, distribute or otherwise use this document or any of its contents without the prior written consent of Octopus.

Neither past performance nor any forecast should be considered a reliable indicator of future results. This document is for information purposes only. It contains information that is based on unverified and unaudited information. The information and opinions contained in this document are for background purposes only and do not purport to be full or complete. No reliance may be placed for any purpose on the information or opinions contained in this document or their accuracy or completeness. This document contains information from third party sources.

All information contained herein is subject to updating, revision and/or amendment (although there shall be no obligation to do so). No representation is made, assurance is given, or reliance may be placed, in any respect, that such information is correct and no responsibility is accepted by the Company or Octopus or any of their respective officers, agents or advisers as to the accuracy, sufficiency or completeness of any of the information or opinions, or for any errors, omissions or misstatements, negligent or otherwise, contained in or excluded from this

document or for any direct, indirect or consequential loss or damage suffered or incurred by any person in connection with the information contained herein (except to the extent that such liability arises out of fraud or fraudulent misrepresentation).

This document contains certain forward-looking statements. In some cases forward looking statements can be identified by the use of terms such as "believes", "estimates", "anticipates", "projects", "expects", "intends", "may", "will", "seeks" or "should" or variations thereof, or by discussions of strategy, plans, objectives, goals, future events or intentions. By their nature, forward-looking statements involve risk and uncertainty because they relate to future events and circumstances. Actual outcomes and results may differ materially from any outcomes or results expressed or implied by such forward-looking statements.

The Company's investment strategy may see investment risk concentrated in specific assets, geographies, and technologies or to specific counterparties. This means that the overall performance of the Company may be more sensitive to the returns in respect to those assets, geographies, types of assets, and / or counterparty.

No advice has been sought on any legal or taxation matters relating to the information set out in this document and recipients should seek their own legal, tax and financial advice in connection with the information contained herein. Nothing contained herein constitutes either an offer to sell or an invitation to purchase any assets, shares or other securities or capital or to enter into any agreement or arrangement in relation to matters

discussed in this document. Nothing herein should be taken as a recommendation to enter into any transaction.

The dividend and return targets stated are targets only and not profit forecasts. There can be no assurance that these targets will be met, or that the Company will make any distributions at all and they should not be taken as an indication of the Company's expected future results. The Company's actual returns will depend upon a number of factors, including but not limited to the Company's net income and level of ongoing charges. Accordingly, persons who have access to this document should not place any reliance on these targets and should decide for themselves whether or not the target dividend and target net total shareholder return are reasonable or achievable. Investors should note that references to dividends are intended to cover both dividend income and income which is designated as an interest distribution for UK tax purposes and therefore subject to the interest streaming regime applicable to investment trusts.

Important information

This document should only be accessed by persons (i) who are residents in the United Kingdom, or (ii) who qualify as a 'professional client' as defined in Directive 2016/65/EU on Markets in Financial Instruments ("MiFID II") and are residents in Ireland (Persons with (i) and (ii) being 'Relevant Persons'). If you are not a Relevant Person or are in any doubt as to whether you are a Relevant Person, please disregard this document. This document is not directed at, nor should it be accessed by persons who are not Relevant Persons, including without limitation any persons located in the United States, Australia, Canada, South Africa, New Zealand or any other jurisdiction where it would be unlawful to do so.

This document has been prepared by Octopus for information purposes only and does not constitute an offer to sell, or the solicitation of an offer to acquire or subscribe for, securities issued by Octopus Renewables Infrastructure Trust plc (the "Company") in any jurisdiction.

The offer and sale of securities in the Company have not been and will not be registered under the applicable securities laws of the United States, Australia, Canada, South Africa, New Zealand or Japan. This document does not constitute any form of financial opinion or recommendation on the part of the Company or Octopus and is not intended to be an offer, or the solicitation of any offer, to buy or sell any securities in any jurisdiction.

This document does not constitute a part of the prospectus

and recipients should not construe the contents of this document as financial, legal, accounting, tax or investment advice.

The securities in the Company have not been nor will be registered under the U.S. Securities Act of 1933, as amended (the "U.S. Securities Act") or with any securities regulatory authority of any state or other jurisdiction of the United States and such securities may not be offered, sold, exercised, resold, transferred or delivered, directly or indirectly, within the United States or to, or for the account or benefit of, U.S. Persons (as defined in Regulation S under the U.S. Securities Act), except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act and in compliance with any applicable securities laws of any state or other jurisdiction in the United States. The Company has not been and will not be registered under the U.S. Investment Company Act of 1940, as amended (the "U.S. Investment Company Act") and investors in the Company are not entitled to the benefits of the U.S. Investment Company Act.

This document is provided by Octopus Renewables Limited (trading as Octopus Energy Generation), which is authorised and regulated by the UK Financial Conduct Authority (FCA reference number 473797), registered

Neither FTSE nor its licensors accept any liability for any errors or omissions in the FTSE indices and/or FTSE ratings or underlying data.

Key Investor Risks

A decision to invest in the Company should take into all of its objectives as described in the Prospectus. A list of relevant risks can be found in the Prospectus, Annual Report and KIID on the Company website

1. An investment in the Company will place capital at risk. The value of investments can go down as well as up, so investors could get back less than the amount invested.
2. Neither past performance nor any forecasts should be considered a reliable indicator of future results.
3. The Company may not meet its investment objective and there is no guarantee that the Company's target level of dividends and other distributions and/or target returns, as may be from time to time, will be met.
4. The Company's investment strategy sees investment risk concentrated in specific assets, geographies and technologies or to specific counterparties. This means that the overall performance of the Company is more sensitive to the returns in respect of those assets, geographies, types of asset and/or counterparties.
5. The Company invests in renewable energy assets which are under construction and, therefore is exposed to certain risks, such as permit risks, cost overruns, construction delay and construction defects, which may be outside the Company's control.
6. Renewable energy assets which are under development may be exposed to risks such as delays in obtaining or the failure to obtain the requisite grid access rights, land consents, planning and/or regulatory consents, and cost overruns which may be outside the Company's control. In certain scenarios it may not be possible for a development to proceed or a development may become unviable for the Company. The Company may not be able to fully recover the value of its investment where a project does not advance beyond the development phase.
7. Renewable energy assets are illiquid and may prove difficult to sell. The price achieved on any realisation may be at a discount to the prevailing valuation of the relevant renewable energy asset(s). This may have an adverse effect on the Company's profitability, the net asset value, and/or the price of the Company's shares.
8. The Company makes investments which are based in countries whose local currency is not Sterling, and makes and/or receives payments that are denominated in currencies other than Sterling. Changes in exchange rates will, therefore, affect the net income and net asset value of the Company.
9. The Company and members of its Group may use borrowings for multiple purposes, including for investment purposes. While the use of borrowings should enhance the total return on the Shares, where the return on the Company's portfolio of Renewable Energy Assets exceeds the cost of borrowing, it will have the opposite effect where the return on the Company's portfolio of Renewable Energy Assets is lower than the cost of borrowing.
10. The Company makes investments in projects and concessions with revenue exposure to power prices. The market price of electricity is volatile and is affected by a variety of factors, including market demand for electricity, the generation mix of power plants, government support for various forms of power generation, as well as fluctuations in the market prices of commodities and foreign exchange. Whilst some of the Company's portfolio of Renewable Energy Assets benefit from fixed price arrangements for a period of time, others have revenue which is based on prevailing power prices.

**FTSE
250**
3 Years since
IPO

- Mar-23 unaudited NAV of 107.7p/share, decreased by 1.7p/share since Dec-22 mainly due to a significant reduction in forward power prices over Q1 2023³
- 10.5% increase in the dividend target for 2023; Q1 2023 dividend declared of 1.44p per ordinary share payable on 2 June 2023 to shareholders on the register on 19 May 2023 (the dividend target stated is a target only and not a profit forecast)⁴
- Highly covered dividend allows ORIT to focus on acquiring new construction assets, delivering additional NAV growth potential

Notes:

1. Includes assets in construction and fully-funded conditional acquisitions
2. Successfully delivered through construction to date
3. See Q1 2023 Factsheet and NAV RNS announcement dated 9 May 2023 for further details
4. The dividend target stated is a target only and not a profit forecast. There can be no assurance that it will be met or that the Company will make any distributions at all and it should not be taken as an indication of the Company's expected future results. Accordingly, potential investors should not place any reliance on this target in deciding whether or not to invest in the Company and should decide for themselves whether or not the target dividend is reasonable or achievable
5. Net of amortising debt payments

About ORIT

ORIT aims to provide investors with an attractive and sustainable level of income returns, with an element of capital growth, by investing in a diversified portfolio of Renewable Energy Assets

Gross Asset Value, including outstanding commitments

■ Onshore wind
■ Solar
■ Offshore wind
■ Developer
■ Battery

Managed by **expert team** of >110 renewable specialists

Diversification by geography and technology reduces risk and volatility

Return enhancement and **additionality** through construction allocation

Developer investments bring **optionality** through proprietary pipeline

Impact and ESG embedded into all investments, ORIT is an **SFDR Article 9** product

¹Excludes conditional acquisitions in Spain (176MW).

Octopus Energy Generation – ORIT portfolio management team

An experienced team of >110 renewable energy specialists

Note: All data as at 31 March 2023

Diversification

ORIT is highly diversified by geography and technology to reduce risk and volatility

- Diversification, as a fundamental risk management approach, is as crucial within renewables as it is within other asset classes
- ORIT has a high level of geographical and technological diversification compared with other renewable generation investment trusts
- Broad mandate allows for origination across a wider opportunity set in order to identify best value

TECHNOLOGY

- There is an **anti-correlation effect between wind and solar generation profiles**, which helps to dampen the generation volatility within mixed technology portfolios
- ORIT's portfolio includes **solar, battery, onshore wind and offshore wind**. ORIT is also partnering with developers.
- It maintains a relatively even (currently 60:40) ratio of wind:solar.

GEOGRAPHY

- Geographical diversification reduces the concentration of risks related to **weather pattern, power market price and regulatory change**
- ORIT's portfolio spans **7 countries**, not including the conditional acquisition of the Spanish solar sites

Why do we do construction?

- Octopus Energy Generation team has been managing the construction of large scale renewable energy assets in the UK, Europe and Australia for over 12 years – delivering additional generation capacity onto the grid is core to the team's mission
- Currently has 8 dedicated construction specialists with decades of experience across a variety of technologies. These specialists have a sole focus to ensure the assets are built of the highest quality
- ORIT has acquired operational assets in order to deliver on the IPO dividend targets, alongside funding 181MW at construction stage (plus 73MW remaining to be completed during 2023)
- With strong dividend cover from the operational portfolio, ORIT can now focus additional capital on construction assets which deliver incremental NAV growth
- Successful construction has provided a £14.5m uplift to NAV since IPO, with £2.3m from Cumberhead wind farm during Q1 2023. The Breach solar farm and Woburn Road battery remain in construction, with potential gains from de-risking these assets still to be fully included in the Company's NAV.

Completed
construction

48MW

Ljungbyholm Wind Farm (Sweden)

Construction started in April 2020
with site operational in June 2021

59MW

**Kuslin &
Krzecin Wind Farms (Poland)**

Krzecin & Kuslin fully operational
since February 2022 & June 2022

24MW

Cerisou Wind Farm (France)

Construction started in August 2021
with site fully operational in October
2022

50MW

Cumberhead Wind Farm (UK)

Construction started in September
2021 and is now considered fully
operational as at 31 March 2023

67MW

Breach Solar Farm (UK)

Completion expected in September
2023
Construction underway in Q1
2023 and progressing well

**12MW
(6MW)²**

Woburn Road battery (UK)

Completion expected in 2024
Procurement activities underway

In construction

¹ £2.3m uplift recognised during Q1 2023 in relation to the Cumberhead site through reduction in the risk premium applied to the discount rate. ² 6 MW pro-rated by ownership.

Development investment

Investment in developers brings optionality over future investment opportunities at construction-ready stage

- €13.75m (c.15.5% stake) invested into Simply Blue, developing floating offshore wind

28GW
pipeline

- £2.5m invested
- Additional up to £7.5m of development funding to be provided to progress 9 UK onshore wind farms

900MW
pipeline

- €3.5m invested to set up Nordic Renewables Limited
- Specialist developer focused on the Finnish market

720MW
pipeline

£4.1m¹
NAV uplift
since
inception

ORIT will have preferential access to fund construction-ready sites arising from these development pipelines;
Provides valuable optionality for future expansion

¹ £4.1m development gain recognised during FY22 due to increased valuation arising from the follow-on investment into Simply Blue.

Investing for a positive impact

Our aim is to accelerate the transition to net zero through our investments to help facilitate the transition to a more sustainable future

The Company has a clear Impact Strategy and aims to enhance impact where possible through initiatives aligned with three responsible investment lenses:

Article 9

Impact Fund
under SFDR

522k

Equivalent homes
powered

580k

Estimated tonnes of
carbon avoided

2.9m

Equiv. new trees to
avoid same carbon

Impact Initiatives and KPIs

Beyond accelerating the transition to net zero, ORIT seeks to generate additional impact and contribution to a broader set of SDGs through impact initiatives

Notes:¹Total asset value including debt and equity commitments. ²669MWh of which has and will be additional generation from construction assets; metric calculated based on an estimated annual production of the construction portfolio once fully constructed (excluding condition acquisitions). ³Metrics based on an estimated annual production of the whole portfolio once fully constructed. Carbon avoided is calculated using the International Financial Institution’s approach for harmonised GHG accounting.

Current Portfolio

Current Portfolio

The Company has successfully committed over £1.3bn¹ into an increasingly diversified portfolio

Note: All data as at 31 March 2023. ¹ Gross Asset Value of investments including outstanding commitments. ² Pro-rated by ownership. ³ Excludes conditional acquisitions.

Key Milestones

Portfolio Composition

The Company holds investments at £609m NAV and c.£1.1bn GAV¹. The total value of investments increases to over £1.3bn² once fully invested including forward purchases

Portfolio composition broken down by **total invested basis**^{1,2,3} in accordance with the Company's investment policy and therefore includes the amounts committed to the conditional acquisitions of the Spanish and Irish solar PV assets and other commitment obligations which have been committed but not yet incurred.

Portfolio Value

Total value of all investments is £1,329m with a GAV of £1,082m and outstanding commitments of £248m as at 31 March 2023.

Debt Breakdown

Notes: ¹Based on each Renewable Energy Asset's contribution to the Company's unaudited valuation as at 31 March 2023. ²Investments valued on an unlevered basis and including amounts committed but not yet incurred. ³Percentages may not total 100% due to rounding. ⁴As at 31 March 2023. GAV is a measure of total asset value including debt held in unconsolidated subsidiaries.

Market Outlook

Acceleration of transition to renewables now driven by security, cost and decarbonisation

The energy generation industry continues to navigate through a turbulent period, with the **effects of the Russia-Ukraine war looking set to continue for some time**

Rapid expansion of renewable generation capacity is key to eliminating European reliance on Russian gas for electricity generation

Ambitious European targets for green hydrogen and electrification of home heating and transport will drive an **increase in electricity demand in the medium term**

There is high investor demand for existing assets, but **funding gap remains for new generation capacity**, aligning with ORIT mandate focus on delivering genuine additionality

Diversified mandate reduces concentration of risk arising from regulatory change to address high energy costs, as well as enabling ORIT to pursue opportunities in the sectors and countries best positioned to capitalise on the growth ahead as regulatory uncertainty clears

Other technologies

Deployment of new renewable generation will increasingly be complemented by other technologies

Battery storage

- As variable renewable generation becomes an increasing proportion of the capacity connected to power grids, energy storage is required to ensure supply and demand remain matched
- Lithium-ion batteries are the dominant technology used for new storage capacity in recent years
- The UK has been a leading market for battery capacity, but other European markets are now introducing mechanisms to encourage investment
- ORIT made its first investment into battery storage in June 2022, and has the option to construct a further project at the Breach Solar Farm

Hydrogen electrolysis

- Electricity can be used to 'split' water into hydrogen and oxygen; where renewable energy is used this is known as 'green hydrogen'
- Green hydrogen could be used to replace fossil fuels in manufacturing, chemical and fertiliser production and heavy transport or as a form of energy storage
- The EU is targeting 10 million metric tons of domestically produced hydrogen by 2030 to replace natural gas, requiring 200-450GW of wind or solar capacity and up to 60 GW of electrolyser capacity
- Octopus Energy Generation have agreed a partnership with RES to develop electrolyzers to supply large commercial and industrial customers

In conclusion...

Positive outlook: ORIT delivering strong dividend growth with cover underpinned by fixed revenues – 78% fixed over next two years

Diversified portfolio and pipeline: portfolio has grown to 668MW; geography and technology mix reduces risk and volatility

Construction additionality: construction allocation delivers returns enhancement above the attractive dividend yield with £14.5m delivered since inception

Developer investments will bring future optionality through proprietary pipeline accessible to ORIT in order to capitalise on the strong tailwinds in the sector

Impact and ESG embedded into all investments: ORIT is an SFDR Article 9 product

Appendices

Q1 2023 NAV Update

ORIT NAV as at 31 March 2023 of 107.7p, -1.7p versus prior quarter (109.4p)

Net Asset Value
(p/share)

107.7p
(Dec-22: 109.4p)

Net Asset Value
(£m)

£608.6m
(Dec-22: £618.3m)

- The total unaudited plc NAV as at 31 March 2023 was £608.6m million or 107.7 pence per Ordinary Share
- Net impact of updating power prices was -2.9p. This movement was made up of the following:
 - Since 31-Dec, short term forecast (2023-2025) wholesale power prices across Europe have decreased significantly affecting assets with merchant exposure
 - Offset by (i) removal of 20% additional discount to short term prices, and (ii) reduction in the UK EGL tax liability.
- Inflation forecasts in the UK and Poland have decreased, offset by minor increases in wider Europe resulting in a valuation decrease of -0.6p
- +0.4p realised from the unwind of the Cumberhead construction premium as it has achieved operational status
- Other movements of +2.7p include strong cash generation

Valuation Assumptions: Inflation

Since the end of Q4 2022, short-term inflation assumptions have decreased in the UK and Poland and increased further across the European markets where the Company's portfolio of assets is located.

UK annual average RPI (HMT Consensus)	2022	2023	2024	2025	2026
31-Mar-23	11.6%	9.3%	4.0%	3.3%	3.2%
31-Dec-22	11.3%	9.8%	4.2%	3.9%	3.5%
French CPI (European Commission)	2022	2023	2024	2025	2026
31-Mar-23	5.9%	5.2%	2.5%	0.7%	1.2%
31-Dec-22	5.8%	4.4%	2.2%	0.7%	1.2%
Polish CPI (European Commission)	2022	2023	2024	2025	2026
31-Mar-23	14.4%	11.7%	4.4%	3.5%	2.9%
31-Dec-21	13.3%	13.8%	4.9%	3.5%	2.9%

56%

Inflation-linked
revenues over
10Y period

Since the end of Q4 2022, short-term inflation assumptions have decreased in the UK and Poland and increased further across other European markets, resulting in a net decrease in the valuation of -£3.0 million or -0.6p/share.

Valuation Assumptions: Power Prices

Decreases in power price assumptions over the quarter to a -2.9 p/share decrease in valuation

Near-mid term power prices are high and are expected to remain so for several years

- Record-high prices observed across Europe in 2022, due to gas price linkage
- Q1 has seen some significant softening of short-term power pricing
- Impact of the Ukraine war expected to persist for a number of years

Government Measures

- 31-Dec NAV included discount to the prevailing forward prices of 20% over the 2023 to 2025 period. Given prices have softened, this discount has now been removed.
- 31-Mar NAV includes the impact of EU price caps (assuming they persist until 2025) and the UK Electricity Generator Levy

ORIT has a high proportion of fixed revenues, while retaining some exposure to variable merchant revenues

- c.78% fixed revenues over the period to December 2024¹
- Fixed revenues expected to cover dividends for a period of 5 years

Octopus Renewables Infrastructure Trust plc

To provide investors with an attractive and sustainable level of income returns, with an element of capital growth, by investing in a diversified portfolio of Renewable Energy Assets in UK, Europe and Australia

Investment Highlights	Description
Manager	• Octopus Renewables Limited (trading as Octopus Energy Generation)
Key Investment Policy	• Deliver an attractive and sustainable level of income returns with an element of capital growth through acquiring operational, construction ready, in construction and development renewable assets • Invest in diversified portfolio across Europe and Australia • Focus on solar PV, onshore and offshore wind with no more than 20% of GAV allowed in other renewable assets
Target Net Total Return	• 7-8% p.a. over the medium to long-term¹
Dividend	• Announced and paid quarterly • Progressive dividend policy • Target is 5.79p in FY 2023¹
Typical Asset Return	• Operational assets: 5.5-8.0%², construction assets: 8-10%²

Investment Highlights	Description
Leverage	• Maximum 40% long-term structural debt & 25% short-term RCF
Exchange	• Official List, Premium listing segment of the Main Market of the London Stock Exchange • Awarded LSE Green Economy Mark • ISIN: GB00BJM02935, SEDOL: BJM0293 • Ticker: ORIT
Currency	• GBP
Shares in Issue	• 564,927,536
Financial Year End	• 31 December
Management Fee	• 95bps on NAV, reducing to 85bps on NAV above £500m. No performance or asset level fees
Board	• Independent board of non-executive directors
Website	• www.octopusrenewablesinfrastructure.com

Notes: ¹The dividend and total return are targets only and not profit forecasts. There can be no assurance that they will be met or that the Company will make any distributions at all and they should not be taken as an indication of the Company's expected future results. Accordingly, potential investors should not place any reliance on these targets in deciding whether or not to invest in the Company and should decide for themselves whether or not the target dividend and target net total shareholder return are reasonable or achievable. ²Typical returns based on the manager's experience and not profit forecasts. There can be no assurance that actual asset returns will be consistent with the above and they should not be taken as an indication of the Company's future results.

Board of Directors

Phil Austin, MBE

Non-executive Chair. Chair of the Nomination Committee

Spent most of career in banking with HSBC in London and, latterly, in Jersey as Deputy CEO of the Bank's Offshore business. Founding CEO of Jersey Finance Ltd, the body that represents and promotes the Island's finance industry, both at home, and internationally. Non-executive director of portfolio containing both private and publicly owned businesses. Chairman of Jersey Electricity plc. Fellow of the Chartered Institute of Bankers and a Fellow of the Chartered Management Institute. Awarded an honorary doctorate in business from the University of Plymouth (October 2015) and an MBE in the Queen's New Year's honours list (January 2016).

Audrey McNair

Non-executive Senior Independent Director and Chair of the Audit and Risk Committee

Non-executive director and Chair of Audit Committee for Round Hill Music Royalty Fund Limited. Executive career across buy and sell side in City of London, gaining extensive knowledge of regulatory, governance and investment management processes and products. Worked at Aberdeen Asset Management plc from May 2008 to March 2016, starting as Head of Internal Audit (EMEA) and becoming Global Head of Business Risk and responsible for the group's risk management framework and internal capital adequacy assessment

James Cameron

Non-executive Director and Chair of the Management Engagement Committee

An award-winning authority in the global climate change movement and a qualified Barrister with 30+ years' experience, James serves on a number of boards and advisory committees across business, finance, legal, academic and government organisations. James is an Honorary Senior Research Fellow in the Grantham Institute on Climate Change and Environment, Imperial College, London, Chairman of Crown Agents, a senior advisor to Pollination Global and a Director of Africa's fastestgrowing solar company, Ignite Power. He is a London Sustainable Development Commissioner and a Friend of COP26.

Elaina Elzinga, CFA

Non-executive Director and Chair of the Remuneration Committee

Currently a Principal in Investments at the Wellcome Trust, a global charity committed to improving human health and funded from a diverse, unconstrained portfolio of over £37 billion. Previously investment banker and investment manager at Goldman Sachs. Lead of Absolute Return, where she is responsible for Wellcome's partnerships with managers that have low equity market correlations, including multi-strategy and credit hedge funds, and their climate strategy. Covers the natural resources sector, with a strong interest in the energy transition, and led the development of Wellcome's net zero strategy for its investment portfolio. Member of the IC for Newnham College, Cambridge. CFA Charterholder and read History at the University of Cambridge.

Octopus Energy Group

A quadruple unicorn energy business, delivering the energy transition to nearly 5 million customers

Octopus Energy

- Octopus Energy is a global leader in the world's transition to green energy
- Operating in 13 countries including the UK, Germany, Japan, US, Australia and New Zealand
- Quadruple unicorn valuation following investment from Generation Investment Management and CPPIB in September 2021

Original backed by Octopus, now backed by two of the world's largest energy companies, a mission-led sustainable investment manager and a \$500bn institutional investor
