Q3 2025 Highlights

- **September:** ORIT launched its **five-year strategic roadmap 'ORIT 2030'** built around four priorities: **Grow:** Invest for NAV growth through deployment into higher-return construction and developer opportunities; **Scale:** Target £1 billion NAV by 2030 through organic and inorganic growth, to create a more investable company; **Return:** Target total returns of 9-11% through a combination of capital growth and income; **Impact:** Scale with purpose adding new clean capacity and supporting the energy transition.
- **September:** Simply Blue Group's Canadian sustainable fuel project was carved out to form Nova Sustainable Fuels, as previously reported.
- **August:** The Board and AIFM entered into a revised AIFM agreement resulting in a reduced investment management fee. Effective 1 November 2025, the fee will be based on a 50:50 blend of average market capitalisation and NAV.
- **Post-period:** ORIT completed the sale of its 25% stake in UK green hydrogen developer, HYRO Energy Limited, for total expected proceeds in line with its latest valuation, enabling the reallocation of capital towards wind, solar and complementary technologies.
- **Post-period:** ORIT's investee company Simply Blue Holdings signed a Share Subscription Agreement with Kansai Electric Power Company, Incorporated, to acquire an 80% stake in Simply Blue Group's offshore wind development arm.
- During Q3 2025, ORIT repurchased 11.8 million shares for approximately £8.2m at an average price of 69.4 pence per Ordinary Share. These share buybacks contributed +0.7 pence to ORIT's Net Asset Value per Ordinary Share over the quarter. As at 30 September 2025, ORIT had spent c. £23.6m out of its total £30m buyback programme.

Dividends

A dividend of 1.54p per share (or £8.3 million) was declared in respect of Q2 2025 and paid on 29 August 2025.

A dividend of **1.54p per share has been declared in respect of Q3 2025**, payable on 28 November 2025 to shareholders on the register on 14 November 2025.

In line with its progressive dividend policy, the Company is targeting a dividend of **6.17p for FY 2025²**, an **increase of 2.5%** over FY 2024. This marks the fourth consecutive year that ORIT's Board has increased its dividend target in line with inflation.

Investment Policy

The Company intends to invest both in a geographically and technologically diversified spread of Renewable Energy Assets and, over the long term, it is expected that:

- Investments located in the UK will represent less than 50% of the total value of all investments³.
- Investments in any single country other than the UK will represent no more than 40% of the total value of all investments.
- Investment in (i) onshore and offshore wind farms and (ii) solar PV parks will each not exceed 60% of the total value of all investments.

Investments that are under development will represent less than 5% of Gross Asset Value⁴.

Our full Investment Policy is available [here](#) and on our website.

A decision to invest in ORIT should consider all its investment objectives and risks as described in the Annual Report and Key Information Document. Please read these before taking any investment decision. Copies can be obtained from: <https://octopusrenewablesinfrastructure.com>, orit@octopusenergygeneration.com.

ORIT's impact goal: accelerate the transition to net zero

ORIT classifies itself as an impact fund with a core objective to accelerate the transition to net zero through its investments - building and operating a diversified portfolio of renewable energy assets. As a Sustainable Finance Disclosure Regulation ("SFDR") Article 9 product, ORIT targets 100% EU Taxonomy-aligned investments, with a set minimum threshold of 85%, assessed by the Investment Manager with the support of external tools, but not formally audited or independently verified. This enables its investors to contribute to the 'Just Transition', encouraging wider and fairer distribution of benefits as the world switches to clean energy. ORIT's Impact Strategy reflects its culture, values and activities through three lenses: Performance, Planet and People - ensuring ESG risk integration and maximising environmental and social benefits beyond climate mitigation. **Note:** The decision to invest should consider all characteristics and objectives of the fund as described in its legal documentation.

Performance:

- At Mingay Farm, ORIT completed a panel re-shuffling project to address degradation-related issues, recovering c.7% of lost generation and expected to deliver >£200k annually. This forms part of a broader strategy to optimise generation while a long-term panel replacement plan is developed.
- Helios is now utilising a 100% green energy import tariff; something that was difficult to acquire in Ireland for 200MW of solar.

Planet:

- At Westerfield, necessary tree works were safely completed and repurposed on-site to create five hibernaculums, demonstrating a cost-effective, sustainable approach to enhancing biodiversity while maintaining site safety.
- At Ermine Street, a variety of bird, bat, and insect boxes and nest holes were installed to support on-site biodiversity and provide tailored habitats for local wildlife.

People:

- We are developing a tailored climate education programme with Bonanza Creative, that will engage secondary schools near ORIT's Scottish wind farms through interactive workshops and a student-led environmental solutions competition.
- In partnership with Generation, the Solar Installer Program kicked off in September in London, helping retrain individuals facing barriers to employment into green jobs.

Portfolio status

By having committed to or invested in 14 sites at the construction stage, ORIT is actively participating in adding new capacity to the sector, having built 517 MW* to date.

* This includes the exited Polish wind farms (59 MW) and Swedish wind farm (48 MW), and the six Irish solar sites (including the conditional acquisition, Irishtown - 274 MW) for which ORIT actively provided oversight of the construction.

Technology	Country	Sites	Capacity pro-rated by ownership (MW)	Average asset life remaining (years)	Status	Key information

Acquired at construction stage

octopus energy generation

Octopus Energy Generation, ORIT's Investment Manager and part of Octopus Energy Group, is driving the renewable energy agenda by building green power for the future.

ORIT benefits from its leading specialist renewable energy fund management team, which was set up in 2010 and invests in renewable energy assets and broader projects helping the energy transition, across operational, construction and development stages.

Key risks

An investment in ORIT will place capital at risk. The value of investments, and any income, can go down as well as up, so investors could get back less than the amount invested. Neither past performance nor any forecasts should be considered a reliable indicator of future results. Actual performance will, inter alia, depend on factors such as wholesale power prices, power purchase agreements, regulatory environment, government incentives, exchange rates, inflation, grid connections, asset concentrations site performance.

ORIT will invest in Renewable Energy Assets which are in development or under construction and, therefore, may be exposed to certain risks, such as permit rejection, lack of grid capacity, cost overruns, construction delay and construction defects, which may be outside ORIT's control. Investment valuation is based on financial projections for the Company's relevant Renewable Energy Assets. Projections will primarily be based on the Investment Manager's assessment and are only estimates based on assumptions made at the time of the projection.

1. Dividend Yield is calculated by dividing the target annual dividend per share of 6.17p for FY 2025 by the LSE closing share price as at 30 September 2025.
2. The dividend targets stated are targets only and not profit forecasts. There can be no assurance that these targets will be met, or that the Company will make any distributions at all and they should not be taken as an indication of the Company's expected future results. The Company's actual returns will depend upon a number of factors, including but not limited to the Company's net income and level of ongoing charges. Accordingly, potential investors should not place any reliance on these targets and should decide for themselves whether or not the target dividend is reasonable or achievable. Investors should note that references in this announcement to "dividends" and "distributions" are intended to cover both dividend income and income which is designated as an interest distribution for UK tax purposes and therefore subject to the interest streaming regime applicable to investment trusts.
3. For the purposes of this paragraph, the "total value of all investments" shall (i) be valued on an unlevered basis, (ii) include amounts committed but not yet incurred and (iii) include Cash and Cash

Equivalents to the extent not already included in the value of investments or amounts committed but not yet incurred.

4. "Gross Asset Value" means the aggregate of (i) the fair value of the Company's underlying investments (whether or not subsidiaries), valued on an unlevered basis, (ii) the relevant assets and liabilities of the Company (including cash) valued at fair value (other than third party borrowings) to the extent not included in (i) or (ii) above.
5. All metrics are calculated based on an estimated annual renewable energy generation of the investment portfolio once fully operational and on the basis of ORIT's equity stake. Metric is based on the latest "P50" yield assumptions for the next available full operational year (calculated biannually for operational assets unless changes to expected yield identified), including degradation that occurs naturally over the assets' lifetimes. Equivalent tonnes of carbon avoided are calculated using the 2021 International Financial Institution's approach for Common Default Grid Emission factors. Reference updated in January 2024 from 2019 to 2021 to reflect most recent emission factors available. Equivalent homes powered by clean energy are calculated based on most recent average household electricity usage values provided by Ofgem (UK) and Odyssee

(EU). References and methodology updated in January 2024. Equivalent new trees planted in the UK are calculated based on UK Woodland and Peatland carbon statistics (0.20 tCO₂/tree). References updated in January 2024 from 2021 to 2022 to reflect most recent full dataset across sources.

6. Portfolio composition on a total value of all investments basis in line with the Company's Investment Policy as at 30 June 2025. The investments are valued on an unlevered basis and including amounts committed but not yet incurred. Sum may not add up due to rounding.
7. Excludes Irishtown (Solar) conditional acquisition.
8. Total debt drawn (short-term and long-term) as a percentage of Gross Asset Value.
9. As at 30 June 2025. Assets under management defined as the sum of Gross Asset Value and capital committed to existing investments and signed (yet to be completed) deals and excludes capital available, yet to be deployed.
10. As at 30 June 2025. Number of countries includes countries of assets under management, countries in which asset investments have been exited, countries of head offices of developer company investments, and countries of presence for OEEN origination teams.

Disclaimer: Octopus Renewables Infrastructure Trust ("ORIT") is an investment trust and its Ordinary Shares are traded on the premium segment of the main market of the London Stock Exchange. A decision to invest in ORIT should consider all its investment objectives and risks as described in the Annual Report and Key Information Document.
