VOICE LESSON PHILOSOPHY:

My goal is to help every student become a more confident and effective communicator through music. I believe that developing musicality strengthens both artistic expression and interpersonal skills. Through a text-based approach that puts communication first, I help students discover a free, authentic sound in both practice and performance. Lessons often incorporate movement, acting, and music theory, and are always shaped around each student's unique voice and personal goals, because no two voices, and no two lessons, are ever the same.

WHAT YOU'LL LEARN:

Every lesson is customized to the individual student, creating a collaborative learning experience that grows with your voice, your goals, and your artistry.

- Develop a healthy, authentic, and expressive singing voice
- Goal-setting and individualized mentorship to support long-term vocal and artistic development
- Strengthen technique through individualized vocal warmups and additional exercises
- Learn efficient practice techniques that encourage lasting growth
- Explore movement, acting, and musical storytelling in practice and performance
- Gain practical music theory skills that support performance
- Gain practical performance experience with access to studio recitals, workshops, and more!
