CASE STUDY

EXTENSION / LOFT CONVERSION

Cecil Road

Rear extension, dormer loft conversion and home remodel
South Wimbledon, London SW19

ABOUT BUILDSPACE

Building trust, one project at a time.

BuildSpace is a London-based design-and-build company, specialising in extensions, loft conversions and full home renovations — handling every project from initial design through to the final finish.

This case study takes a look inside one of our recent projects, showing the finished result in pictures.

Cecil Road

LOFT CONVERSIONS · EXTENSIONS · REFURBISHMENTS

01

Rear extension

A ground-floor rear extension opened up the back of the house into one large kitchen and dining space. A roof lantern and black-framed glazing bring daylight deep into the room, with the island kitchen at its centre and the dining table looking out to the garden.

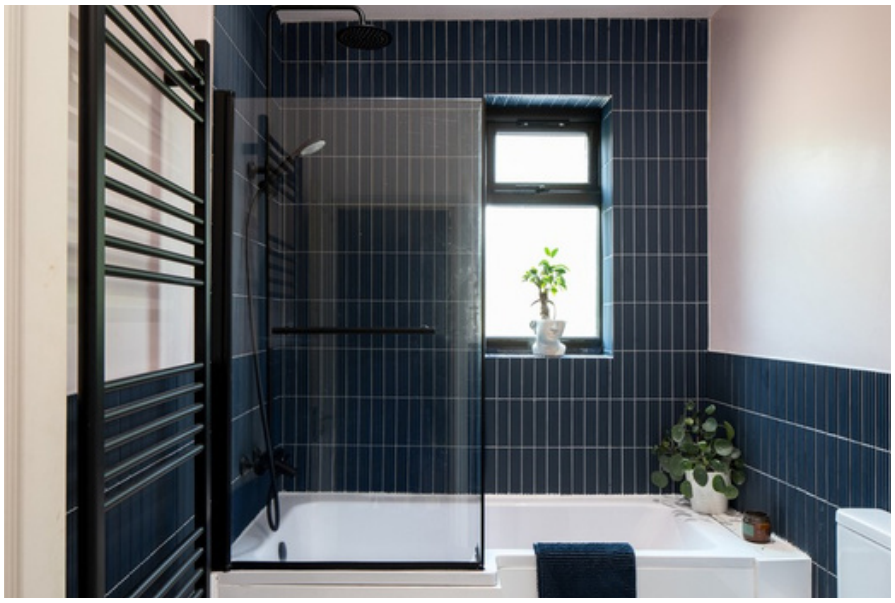

02

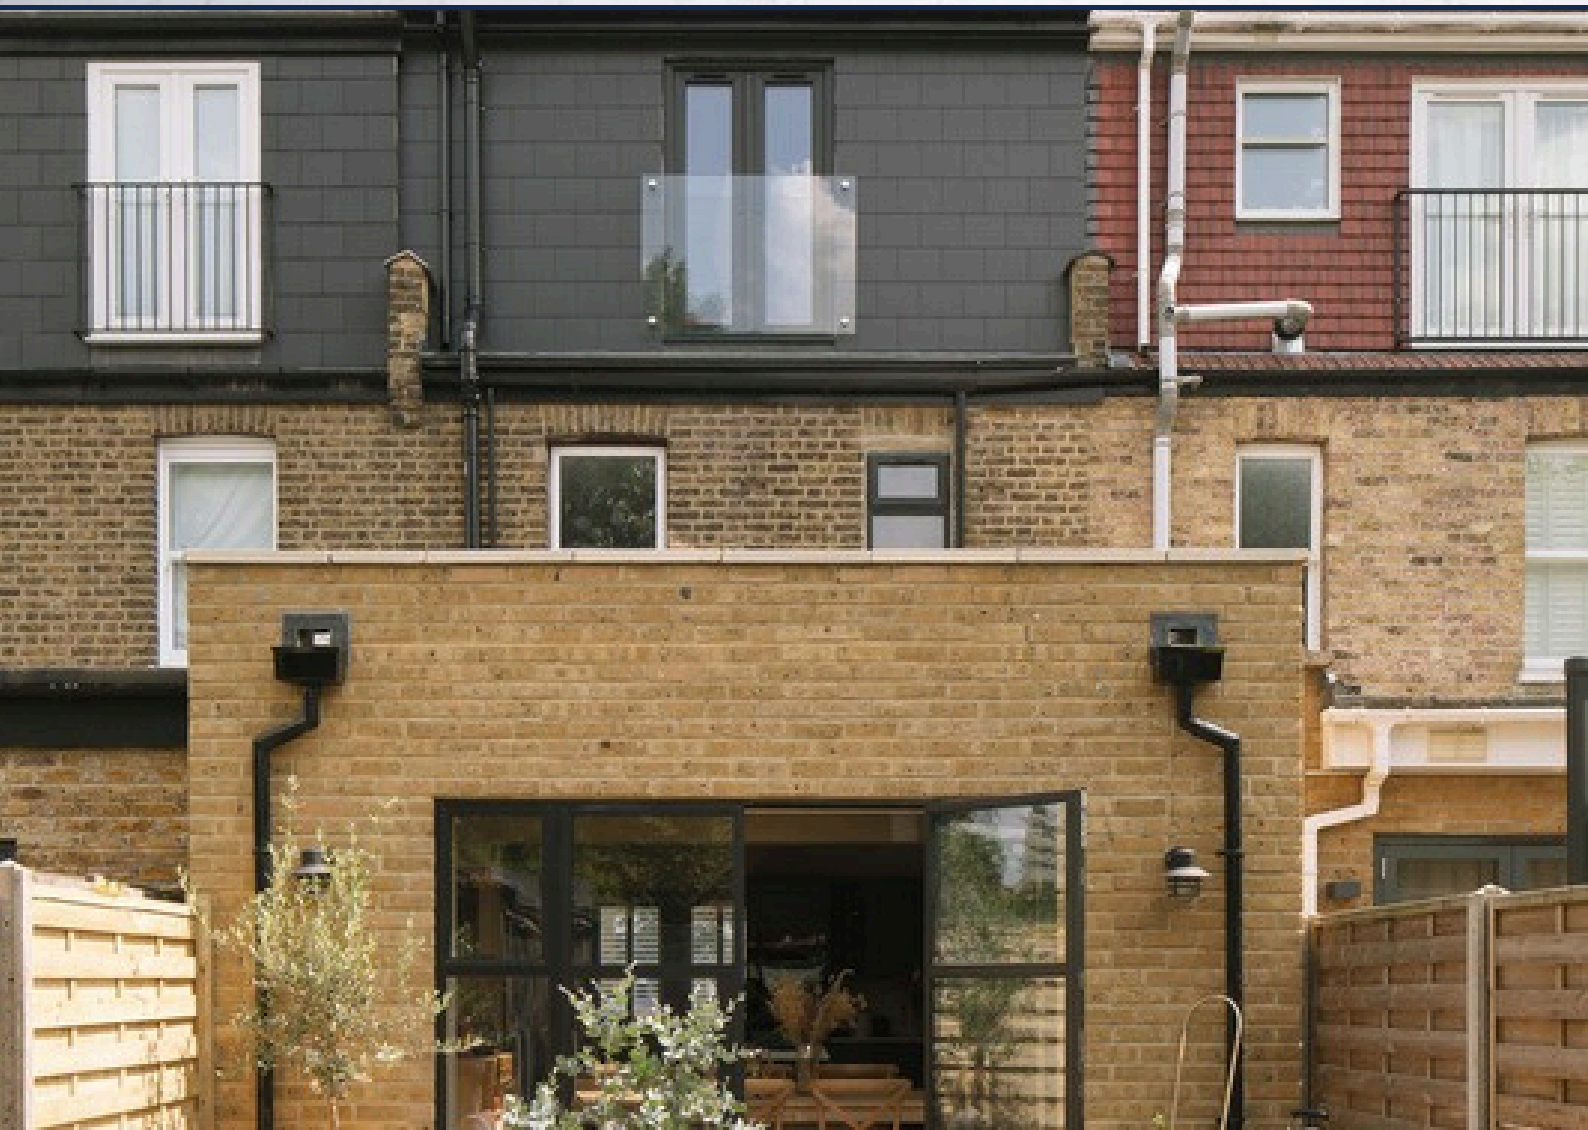

Loft conversion and remodel

A main dormer loft conversion added a new top floor to the house, and the ground and first floors were remodelled alongside it. The new bathrooms pair a freestanding bath beneath a sloping ceiling and roof window with a deep navy tiled bath and shower, finished with black fittings throughout.
