POWERED BY AGENTCOMMAND SM

Agentify your commercial lending business

We turn your bank's commercial lending process into custom, governed agents, so your lenders close more loans with the same team. Agents work the pipeline. Your lenders make the calls.

Lending *growth*

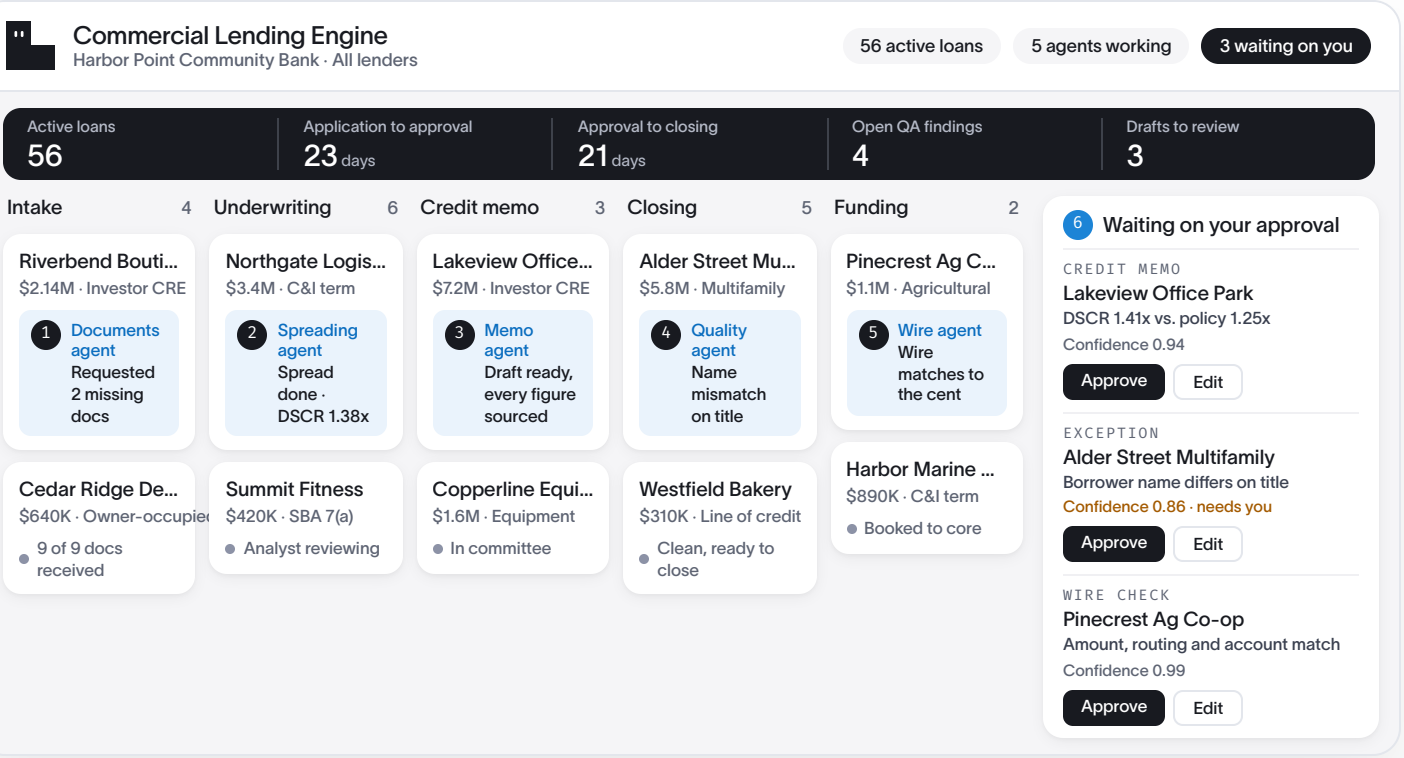

Faster decisions win more of the right loans and grow net interest income.

Same *headcount*

Decouple your lending business growth from underwriter headcount.

Compounding *advantage*

Every loan makes your engine smarter, in a way competitors can't buy.

1 Documents agent

Reads every file as it lands, checks it against your needs list and chases what's missing.

2 Spreading agent

Spreads financials on arrival and checks DSCR and leverage against your credit policy.

3 Memo agent

Drafts the credit memo in your template, with every figure tied to its source.

4 Quality agent

Checks names, amounts and dates across the file, so exceptions surface before closing.

5 Wire agent

Cross-checks every wire against the settlement statement. Your team releases it.

Your lenders

Approve, edit or reject every decision. Nothing auto-approves below 0.90 confidence.

Built by the team behind the #1 SBA lender.

60+	3x	67%
AGENTS IN PRODUCTION	FASTER FUNDING THAN THE SBA AVERAGE	FASTER UNDERWRITING

Stop teaching your competitors how to lend like *you*.

AI has changed the game. Your bank's decades of lending know-how are now its most valuable asset. Software vendors learn from what you feed their AI and sell that to your competitors. Own your agents, and every improvement stays yours.

AgentCommand℠

Praxent's agent accelerator. Start with commercial lending, then extend it to any financial workflow.

01 YOUR CLOUD
Runs your choice of model in your choice of cloud, like Claude on Azure AI Foundry.

02 YOUR IP
You own the agents and every decision record.

03 YOUR RULES
Your policies built in. Every step logged for examiners and model risk.

ANY MODEL, ANY CLOUD Claude · ANTHROP\C · Microsoft Foundry · Amazon Bedrock · Vertex AI

See it on your loans this *week*.

HOW WE WORK TOGETHER

01 PROTOTYPE START HERE
Agent POC
We take your processes and prototype the flow the same week.

Book a demo →

02 LAUNCH
First agents live
AgentCommand℠ live in your cloud with your workflow mapped to custom agents.

4–6 WEEKS

03 BUILD-OUT
Build out the full engine
Remaining agents in production with ongoing optimization.

DEPENDENT

04 FLEET OPS
Additional Engines
Automate more processes, same platform, faster.

ONGOING

Start for little to no *cost*.

Praxent can get you access to exclusive partner funding through Anthropic and Microsoft Frontier programs (dependent on volume) so you can start your AI transformation for little to no cost.

Praxent

Select Services Partner · Claude Partner Network

Microsoft Solutions Partner · Cloud & AI Platforms
