POWERED BY AGENTCOMMAND℠

Agentify your commercial lines business

We turn your commercial underwriting process into custom, governed agents, so your underwriters bind more policies with the same team. Agents work the pipeline. Your underwriters make the calls.

Underwriting *growth*

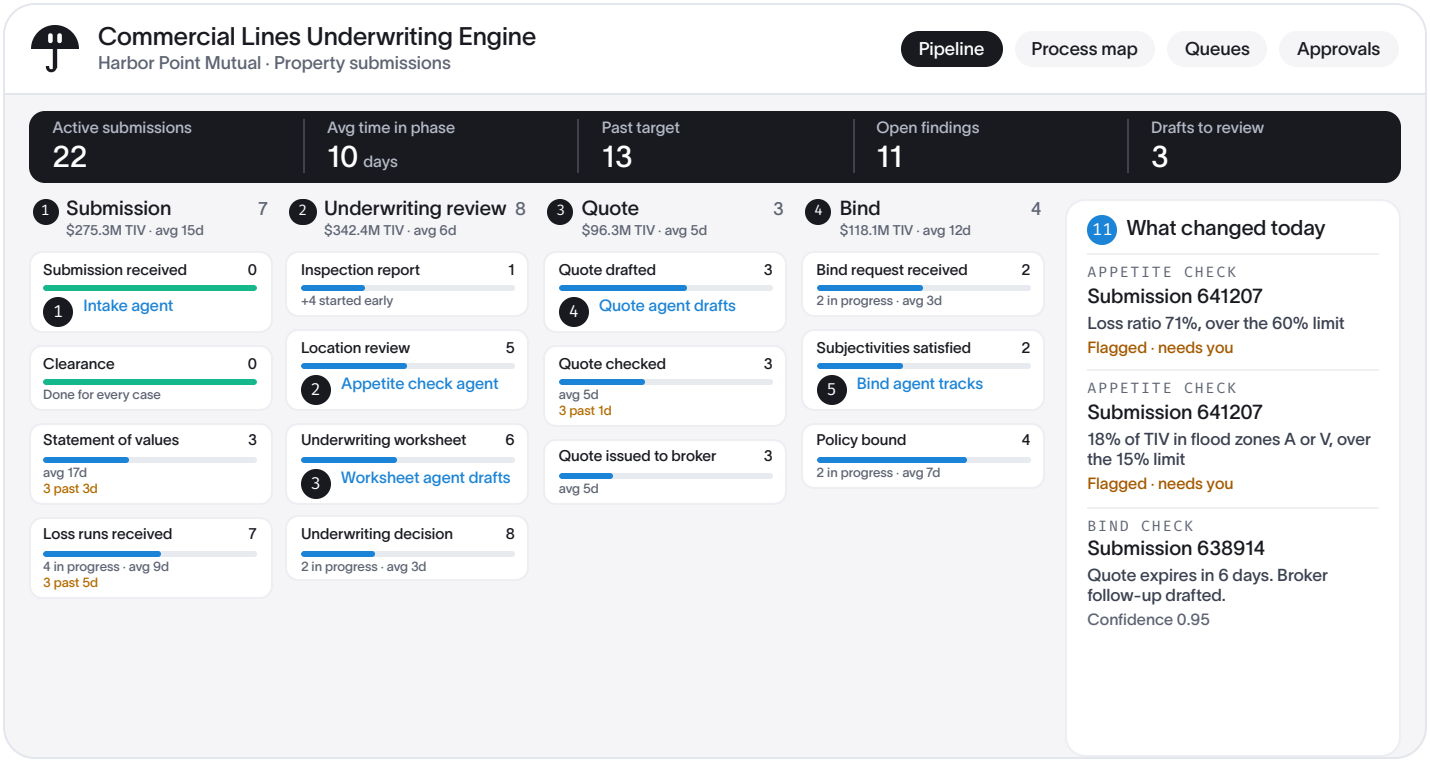

Faster quotes win more of the right policies and grow underwriting profit.

Same *headcount*

Decouple your underwriting business growth from underwriter headcount.

Compounding *advantage*

Every policy makes your engine smarter, in a way competitors can't buy.

1 Intake agent

Reads every broker submission as it lands, pulls the application, SOV and loss runs, and asks for what's missing.

2 Appetite check agent

Screens every submission against your appetite and flags where documents disagree.

3 Worksheet agent

Drafts the underwriting worksheet with rating, loss experience and a recommendation.

4 Quote agent

Drafts the quote and checks it against your guidelines and authority before it goes out.

5 Bind agent

Tracks subjectivities and follows up with brokers before quotes expire. Your team binds.

◯ Your underwriters

Approve, edit or reject every decision. Nothing auto-approves below 0.90 confidence.

Proven at a specialty insurance broker.

Stop teaching your competitors how to underwrite like *you*.

AI has changed the game. Your carrier's decades of underwriting know-how are now its most valuable asset. Software vendors learn from what you feed their AI and sell that to your competitors. Own your agents, and every improvement stays yours.

AgentCommand℠

Praxent's agent accelerator. Start with underwriting, then extend it to any financial workflow.

01 YOUR CLOUD

Runs your choice of model in your choice of cloud, like Claude on Azure AI Foundry.

02 YOUR IP

You own the agents and every decision record.

03 YOUR RULES

Your policies built in. Every step logged for examiners and model risk.

ANY MODEL, ANY CLOUD — Claude · ANTHROP\C · Microsoft Foundry · Amazon Bedrock · Vertex AI

See it on your policies this *week*.

HOW WE WORK TOGETHER

01 PROTOTYPE START HERE

Agent POC

We take your processes and prototype the flow the same week.

Book a demo →

02 LAUNCH

First agents live

AgentCommand℠ live in your cloud with your workflow mapped to custom agents.

4–6 WEEKS

03 BUILD-OUT

Build out the full engine

Remaining agents in production with ongoing optimization.

DEPENDENT

04 FLEET OPS

Additional engines

Automate more processes, same platform, faster.

ONGOING

Start for little to no *cost*.

Praxent can get you access to exclusive partner funding through Anthropic and Microsoft Frontier programs (dependent on volume) so you can start your AI transformation for little to no cost.

Praxent

Select Services Partner — Claude Partner Network

Microsoft Solutions Partner — Cloud & AI Platforms

Award-winning AI transformation firm and select Anthropic partner with 25+ years in financial services. We help banks, lenders and fintechs transform how their people work with AI, automate core processes and build intelligent products.
