

Factsheet

Assurance

Making sure it holds up

WHAT WE DO

Verification without judgement

We're not here to pass moral judgment. We're here to establish, with complete clarity, what does and doesn't stand up in your sustainability or ESG performance.

Marketing claims

No empty promises. Just verifiable facts.

KPI-management

Clear insight into your performance under VSME or GRI.

ESG & EHS

Confidence in your environmental, social and governance performance.

Climate claims

An honest story about your carbon footprint.

What you gain

Confidence

Your claims stand up to scrutiny. 100%

Trust

From customers, banks and business partners.

Insight

What's working.
What can be improved.

Focus

Direct your efforts where they matter most.

Your organization is working on sustainability, and great steps have already been taken. But how do you know for sure you're on the right track? You want proof. And banks, customers, and partners want that too. Makes sense. Verification by Fira gives you that proof: we verify your sustainability performance, independently, crystal clear, and above all, with understanding, without pointing fingers.

Benefits of AA1000

Our statements are AA1000 Licensed: assessed according to the international AccountAbility standard. That means we don't just check whether your data is correct, but also whether your organization does what it says, inclusive, material, responsive, and with an eye for impact. It's especially relevant For clients with an **EcoVadis** rating: EcoVadis rewards externally verified data more heavily than data without assurance.

Why Fira?

Because we understand that honesty can be liberating. Once you have nothing left to hide, room for growth opens up. That's why we are deliberately not auditors who come to judge, but experts who, with a great deal of understanding for the matter at hand, bring the facts to light. Because once you know exactly where you stand, it becomes clear what's needed to move forward. That's what we mean by 'Honestly Forward'.
