

Industry experts in precision manufacturing using the latest CNC technology

ALDUS Defence Industry is an Australian owned, engineered metal solution provider with over 75 years' experience, a workforce of over 400 skilled professionals, and 30,000 m2 of advanced manufacturing and engineering facilities across multiple locations.

ISO 9001 certified, ALDUS delivers high complexity, tight tolerance specialised CNC machined components and assemblies for:

- Defence
- Aerospace
- Medical
- Industrial sectors

Capabilities include dedicated project management, advanced CNC machining, precision assemblies, robotic automation, welding, and in house metrology.

Operating from Melbourne, ALDUS supports Australia's sovereign manufacturing capability through reliable, on time, specification compliant delivery for defence critical programs.

ALDUS Defence Industry

1 Rhodes St

West Ryde NSW 2114

Capabilities

- **Advanced CNC & Precision Machining:** 60+ machine fleet delivering complex geometries and large-scale machining up to 6 x 3 x 3m.
- **End-to-End Fabrication:** Laser cutting, bending, forming, punching, routing, and pipe processing across ferrous & non-ferrous materials.
- **Automation & High-Volume Production:** Robotic feeding, automated polishing, and scalable systems for efficient, repeatable output.
- **Welding, Finishing & Assembly:** Manual/robotic welding, powder coating, APAS painting, and full assembly solutions.
- **Tooling & Engineering Integration:** Custom jig & fixture design supporting precision manufacturing and repeatability.
- **Quality & Project Delivery:** CMM inspection, full QA, and turnkey project & supply chain management from sourcing to completion.

Certifications and Accreditations

- ISO 9001:2015
- ISO 14001
- ISO 3834
- ISO 9606
- DIN 2303
- DISP Member
- APAS Accredited
- Essential 8 / CMMC ML-2 in progress

Key Customers & Partners

- Rheinmetall
- Thales
- BAE
- ASDAM Group (Marand/Rosebank)
- Able Industries Engineering
- Value Heat Treatment
- ISCAR Tooling

Products and Services

- Precision components, metal fabrication and assemblies for land, maritime, aerospace and other critical-duty applications.
- Build-to-print parts and assemblies; simple to complex & small to large.
- 1-off prototypes, small runs, and high-volume production.
- Capacity and flexibility to best meet customer requirements.
- Materials include aluminium, stainless steel, steel alloys, nickel alloys, titanium, nylon, acetal and UHMW-PE; from bar, billet, plate, castings and forgings.

Affiliations/Memberships
