Associate Structural Engineer

JOB REFERENCE	FUS-0097
LOCATION	Colchester and Cambridge
SALARY	
EMPLOYMENT	
HOURS	
WORKING ARRANGEMENT	

THE CLIENT

An established multidisciplinary engineering and building consultancy is appointing an Associate Structural Engineer to its structures team. The consultancy provides civil, structural, geotechnical and building surveying services across public and private-sector projects.

The structural team delivers new-build and refurbishment schemes through traditional and design-and-build procurement, coordinating closely with architects, clients and contractors.

THE ROLE

You will take a client-facing leadership role, directing structural engineering projects and supporting the day-to-day management of engineers and technicians.

The appointment combines technical design leadership, resource allocation, project delivery, mentoring and preparation of bids and fee proposals.

KEY RESPONSIBILITIES

- Lead structural projects and develop safe, efficient and buildable design solutions.
- Direct engineers and technicians to produce coordinated calculations, drawings and specifications.

- Review structural information and ensure independent checks are completed before issue.
- Coordinate with architects, clients, contractors and multidisciplinary design teams.
- Manage project resources, priorities and deadlines across several commissions.
- Prepare bids and fee proposals and support profitable project delivery.

PROJECT DELIVERY

- Maintain clear oversight of design quality, programme, budget and technical risk.
- Ensure CDM duties and construction risks are addressed and communicated in design information.
- Attend client, design-team and site meetings and maintain accurate records.
- Plan technical reviews early enough to complete amendments before issue deadlines.

REQUIRED EXPERIENCE

- A bachelor's degree in civil or structural engineering.
- Substantial structural engineering consultancy experience at senior or associate level.
- Experience leading projects and coordinating complete structural design packages.
- Experience managing and mentoring engineers and technicians.
- Strong client-facing, commercial and project-management capability.
- Proficiency using AutoCAD in a structural engineering environment.

DESIRABLE EXPERIENCE

- Chartered Engineer status through IStructE or ICE.
- Experience across residential, education, community, healthcare or heritage projects.
- Experience with design-and-build and traditional procurement routes.
- Experience preparing successful bids and fee proposals.
