Principal Civil Engineer

JOB REFERENCE	FUS-0080
LOCATION	Leeds
SALARY	
EMPLOYMENT	
HOURS	
WORKING ARRANGEMENT	Potential for flexible or hybrid working

THE CLIENT

A privately owned multidisciplinary engineering consultancy is appointing a Principal Civil Engineer to its Leeds office. The business provides civil, structural, geotechnical, geo-environmental, building consultancy and project management services.

Its civil engineering work includes drainage, highways, external works, earthworks, flood-risk, sustainable drainage, utilities and watercourse design.

THE ROLE

You will take senior responsibility for civil engineering design and project delivery, working across development infrastructure from early appraisal through detailed design and technical approval.

The role combines hands-on technical leadership with project coordination, review of design information and support for less experienced engineers.

KEY RESPONSIBILITIES

- Lead civil engineering design for drainage, highways and external works projects.
- Review calculations, drawings, specifications and technical reports.

- Coordinate civil engineering information with clients and multidisciplinary teams.
- Provide technical guidance to engineers and technicians.
- Manage communication with approving authorities and other stakeholders.
- Support client relationships and the development of future project opportunities.

PROJECT DELIVERY

- Lead projects from feasibility and planning through detailed design and completion.
- Control design quality, programme, technical risk and the issue of information.
- Coordinate sustainable drainage, earthworks, utilities and highway requirements.
- Maintain compliance with relevant standards, approvals and internal procedures.

REQUIRED EXPERIENCE

- A degree in civil engineering or an equivalent relevant qualification.
- Substantial experience delivering civil engineering or development-infrastructure projects.
- Strong knowledge of drainage, highways, external works and sustainable drainage design.
- Experience leading projects and reviewing technical information.
- Ability to coordinate with clients, design teams and approving authorities.
- Clear technical reporting and communication skills.

DESIRABLE EXPERIENCE

- Chartered Engineer status or progress toward professional qualification.
- Experience with Section 38, Section 104 and Section 278 approval processes.
- Experience using relevant civil engineering design software.
- Experience mentoring engineers and contributing to team development.

WORKING ARRANGEMENTS AND BENEFITS

- Published benefits include a market-leading pension with employer contributions of up to 8.68% and six-times-salary death-in-service cover.
- Professional membership subscriptions are supported for qualifying organisations.
- The benefits portal includes cycle-to-work, employee discount and healthcare discount schemes.
- Flexible or hybrid working may be available, depending on the role and business requirements.
- Holiday benefits include holiday trading and birthday leave.

APPLICATION
