Structural Engineer

JOB REFERENCE	FUS-0084
LOCATION	Sheffield
SALARY	
EMPLOYMENT	
HOURS	
WORKING ARRANGEMENT	Flexible start and finish times

THE CLIENT

An independent multidisciplinary engineering consultancy is appointing a Structural Engineer to its Sheffield team. The business provides civil, structural, geotechnical and geo-environmental engineering throughout the project lifecycle.

The structural team delivers new-build, alteration, appraisal and repair projects using steel, reinforced concrete, masonry, timber and other structural systems across a broad range of sectors.

THE ROLE

You will contribute to structural engineering design and project delivery, taking responsibility for defined technical work under senior oversight.

The role combines analysis, design, production of technical information and coordination with clients and multidisciplinary project teams.

KEY RESPONSIBILITIES

- Design structural elements in common construction materials.
- Prepare calculations, sketches, drawings and technical reports.

- Assess existing structures and contribute to alteration or repair solutions.
- Coordinate structural information with clients and other disciplines.
- Respond to technical queries during design and construction.
- Maintain accurate project records and follow checking and quality procedures.

PROJECT DELIVERY

- Deliver assigned work from concept through detailed design and construction support.
- Manage technical tasks against agreed programmes and raise risks promptly.
- Coordinate changes and maintain the quality of issued information.
- Apply relevant standards and internal design-review procedures.

REQUIRED EXPERIENCE

- A degree in civil or structural engineering, or an equivalent relevant qualification.
- Relevant structural engineering design experience.
- Experience preparing calculations and technical information for building projects.
- Understanding of design in common structural materials.
- Ability to coordinate with colleagues and multidisciplinary project teams.
- Clear written, verbal and technical communication skills.

DESIRABLE EXPERIENCE

- Experience with both new-build and existing-structure projects.
- Familiarity with structural analysis, design and drafting software.
- Experience across more than one project sector.
- Progress toward professional qualification with ICE or IStructE.

WORKING ARRANGEMENTS AND BENEFITS

- Published benefits include a contributory pension and life insurance.
- Holiday entitlement is available up to 26 days, with the option to buy up to three additional days.
- Flexible start and finish times are available, with working patterns considered around individual circumstances.
- A discounted health cash plan and cycle-to-work scheme are offered.
- Salaries are reviewed twice each year, with cost-of-living and merit reviews at separate points.

APPLICATION
