Principal/Associate Structural Engineer

JOB REFERENCE	FUS-0090
LOCATION	Birmingham
SALARY	£55,000 to £65,000
EMPLOYMENT	
HOURS	7.5 hours per day
WORKING ARRANGEMENT	Four days office-based and one day working from home

THE CLIENT

A growing multidisciplinary engineering consultancy is appointing a Principal or Associate Structural Engineer to its Birmingham team. The business provides civil, structural and geotechnical engineering and transport-planning services.

The structures team delivers new-build and alteration projects across logistics, manufacturing, residential, education, health, offices and other development sectors.

THE ROLE

You will take a lead role within the Birmingham structures team, working closely with senior leadership and taking technical ownership of project delivery.

The appointment combines structural design leadership, project management, client relationships, team development and contribution to the continued growth of the office.

KEY RESPONSIBILITIES

- Lead structural projects and take ownership of calculations, drawings, reports and design documents.
- Coordinate and review work produced by engineers and technicians.

- Analyse complex technical problems and develop practical design solutions.
- Lead client and third-party communication throughout project delivery.
- Support the technical and professional development of other team members.
- Prepare fee proposals, project cost estimates and resource plans.

PROJECT DELIVERY

- Manage programme, resources, financial performance and technical risk on assigned projects.
- Review building appraisals and structural reports and maintain design quality.
- Apply relevant design standards and CDM designer responsibilities.
- Identify commercial risks, additional work and future project opportunities.

REQUIRED EXPERIENCE

- Recent structural engineering consultancy experience in the Midlands.
- Substantial experience leading structural projects and multidisciplinary coordination.
- Strong structural design, appraisal and technical-reporting capability.
- Chartered Engineer status, or close to chartership, through ICE or IStructE.
- Ability to manage clients, project teams, resources and commercial matters.
- Clear communication with technical and non-technical audiences.

DESIRABLE EXPERIENCE

- A master's degree in civil or structural engineering.
- Experience supporting business development and team growth.
- Experience mentoring engineers and technicians.
- Familiarity with relevant structural analysis, design and CAD software.

WORKING ARRANGEMENTS AND BENEFITS

- One working-from-home day each week and flexible core hours of 10.00am to 4.00pm.
- 26 days' annual leave, with the option to buy or sell up to five days.
- Private medical insurance, health cash plan, life assurance and income protection.
- A discretionary bonus and payment of professional membership fees.
- Support for professional development through an ICE-certified training scheme.
