## THE CLIENT

A civil, structural and infrastructure engineering consultancy is appointing a Senior Civil Engineer to its Newton Abbot office. The team works across residential, commercial, industrial, education and healthcare projects throughout the South West.

Its civil engineering work includes highways, drainage, infrastructure design, technical approvals and project coordination from early scheme development through detailed delivery.

## THE ROLE

You will lead the civil engineering design and delivery of roads, drainage and infrastructure schemes. You will act as the primary project contact, coordinate engineers and technicians and report to the Director of Civil Engineering.

The role includes responsibility for technical submissions, project deliverables, multidisciplinary liaison and construction-stage support.

## KEY RESPONSIBILITIES

- Lead the design of roads, drainage and development infrastructure schemes.
- Prepare and coordinate Section 104, 38 and 278 technical submissions.

- Manage engineers and technicians and review project deliverables.
- Act as the primary contact for clients, architects, contractors and statutory authorities.
- Attend site meetings and inspections and provide clear progress reporting.
- Coordinate civil engineering information with other disciplines within the practice.

## PROJECT DELIVERY

- Manage civil engineering schemes from preliminary design through technical approval and construction support.
- Control scope, programme, technical risk and the quality of issued information.
- Maintain clear project records and follow checking and document-control procedures.
- Ensure project deadlines are understood and supported by appropriate team resources.

## REQUIRED EXPERIENCE

- A BEng, MSc or equivalent qualification in civil engineering.
- At least three years of significant experience within a design-practice environment.
- Strong experience in roads, drainage and infrastructure design.
- Sound understanding of Section 278, 104 and 38 adoption procedures.
- Competence using AutoCAD, MicroDrainage, Civil 3D and PDS.
- Ability to lead a team and communicate effectively with clients and statutory authorities.

## DESIRABLE EXPERIENCE

- Experience in SuDS, flood-risk assessment, DMRB, roads or highways design.
- Chartered Engineer status or active progress toward chartership.
- Experience managing multidisciplinary project interfaces.
- Potential and interest in progressing toward a wider leadership role.

## WORKING ARRANGEMENTS AND BENEFITS

- Published benefits include 20 days' annual leave plus bank holidays and a holiday buy-back scheme.
- The package includes a pension, discretionary performance bonus and free onsite parking.
- The role offers potential progression to Equity Director for the right candidate.

## APPLICATION
