Structural Engineer

JOB REFERENCE	FUS-0046
LOCATION	Bristol
SALARY	
EMPLOYMENT	
HOURS	
WORKING ARRANGEMENT	

THE CLIENT

A multidisciplinary engineering consultancy is appointing a Structural Engineer to its Bristol office. The business provides structural, civil, geotechnical, transport and related design services through a network of UK teams.

The structural practice works across new-build, refurbishment, inspection and specialist projects. Its published capability includes steel, concrete, timber and masonry structures, foundations, basements, temporary works and structural assessment.

THE ROLE

You will prepare structural designs and coordinated technical information for building projects, working with experienced engineers and the wider design team. The role covers calculation, drawing coordination, reporting and site-based input where required.

The appointment is suited to an engineer who can manage defined work packages reliably and is ready to build broader project responsibility.

KEY RESPONSIBILITIES

- Prepare structural calculations and design information for assigned projects.
- Coordinate drawings and models with technicians and other engineering disciplines.

- Develop designs in steel, reinforced concrete, timber and masonry where required.
- Liaise with clients, architects, contractors and approving parties on technical matters.
- Attend surveys, inspections and project meetings where required.
- Respond to design queries and maintain accurate project documentation.

PROJECT DELIVERY

- Contribute from feasibility and appraisal through detailed design and construction support.
- Identify design risks and raise issues requiring further investigation or coordination.
- Follow checking, document-control and quality assurance procedures.
- Deliver assigned work in line with agreed scope, programme and technical standards.

REQUIRED EXPERIENCE

- Structural engineering experience within a consultancy or comparable design environment.
- A relevant civil or structural engineering degree, or equivalent qualification.
- Ability to prepare clear calculations and coordinated structural information.
- Working knowledge of common structural materials and building construction.
- Experience communicating with colleagues and external project stakeholders.
- Strong written and verbal communication.

DESIRABLE EXPERIENCE

- Progress toward Chartered Engineer status through IStructE or ICE.
- Experience with refurbishment, structural inspections or existing buildings.
- Knowledge of temporary works or specialist structural design.
- Experience using relevant analysis, modelling or BIM software.

WORKING ARRANGEMENTS AND BENEFITS

- The consultancy publishes hybrid working and flexible working hours as part of its wider staff offering.
- Published benefits also include enhanced pension contributions, private medical insurance, life assurance and enhanced holiday entitlement; individual eligibility has not been confirmed.

APPLICATION
