Graduate Structural Engineer

JOB REFERENCE	FUS-0121
LOCATION	Thames Ditton
WORKING ARRANGEMENT	1 day WFH after probation

THE CLIENT

FUSION is recruiting a Graduate Structural Engineer for an established multidisciplinary construction consultancy in Thames Ditton. The structural team works on high-end residential, new-build housing, refurbishment and affordable housing projects.

The business supports professional development and provides training and mentorship to help engineers progress toward chartered status through ICE or IStructE.

THE ROLE

This is a genuine graduate opportunity and candidates with no previous professional engineering experience are explicitly eligible. Candidates with some relevant experience will also be considered, but previous professional experience is preferred rather than essential.

Reporting to a senior engineer, you will develop practical experience across structural design, calculations, site visits and inspections. The role is initially office-based; after successful completion of a six-month probation, one day per week working from home may be available.

KEY RESPONSIBILITIES

- Prepare structural designs and supporting calculations for new-build and renovation projects under appropriate senior guidance.
- Carry out site visits and attend design team meetings for live projects.
- Carry out structural inspections, report on defects and recommend remedial works.

PROJECT DELIVERY

- Work across high-end residential, new-build housing, refurbishment and affordable housing schemes.
- Develop practical structural engineering experience through design, calculations, meetings, site visits and inspections.
- Use the training and mentorship provided to progress toward professional chartership through ICE or IStructE.

REQUIRED EXPERIENCE

- A relevant degree in civil or structural engineering, or equivalent.
- Ability to produce structural designs and supporting calculations at graduate level.
- Good written and verbal communication skills.
- A clear desire to work toward ICE or IStructE chartered status.

DESIRABLE EXPERIENCE

- Relevant structural engineering experience. This is preferred, not essential.
- A driving licence.

WORKING ARRANGEMENTS AND BENEFITS

- Pension and bonus payments.
- Holiday package.
- Gym and health club membership after successful probation.
- Training, mentorship and support toward chartered status through ICE or IStructE.
- Initially office-based in Thames Ditton, with one day per week working from home potentially available after successful completion of a six-month probation.

APPLICATION
