Structural Engineer

JOB REFERENCE	FUS-0127
LOCATION	Canterbury
SALARY	Dependent on experience
EMPLOYMENT	Permanent
HOURS	Full-time or part-time
WORKING ARRANGEMENT	Hybrid can be considered

THE CLIENT

FUSION is recruiting a Structural Engineer for an established structural and civil engineering consultancy in Canterbury.

The consultancy works across a varied mix of building projects, including residential, commercial and mixed-use development, alongside heritage and conservation work. Their structural engineering services also include surveys, appraisals and investigations of existing buildings.

THE ROLE

The vacancy is open to structural engineers at different stages of their career, from graduate level through to experienced and chartered engineers. The level of responsibility will be shaped around your existing experience.

You will work across a mixture of new-build and existing buildings, with projects including heritage structures as well as more conventional development work. The role will also include structural surveys and appraisals, giving you exposure to both design work and the assessment of existing structures.

There is flexibility around the appointment, with full-time and part-time options available and the possibility of hybrid working.

KEY RESPONSIBILITIES

- Carry out structural design work appropriate to your level of experience.
- Prepare calculations, design information and technical reports.

- Contribute to new-build, refurbishment and heritage projects.
- Undertake structural surveys and appraisals of existing buildings.
- Assess structural defects and contribute to practical remedial solutions.
- Work with colleagues and other professionals as projects develop.
- Take increasing responsibility for projects and technical delivery as your experience develops.

REQUIRED EXPERIENCE

The consultancy is interested in speaking with structural engineers across a range of experience levels, so the exact requirements will depend on your current level.

- A relevant structural or civil engineering background.
- An understanding of structural engineering principles appropriate to your level of experience.
- The ability to produce clear calculations, reports and design information.
- An interest in working across both new-build and existing structures.

For more experienced appointments, you should also be comfortable taking greater responsibility for structural design, surveys and project delivery.

Chartership is not required for every level of appointment.

WORKING ARRANGEMENTS

The role can be considered on either a full-time or part-time basis.

Hybrid working can also be considered, with the exact arrangement agreed according to the individual and the requirements of the role.

Salary will be dependent on experience and the level at which the appointment is made.

APPLICATION
