Civil Engineer

JOB REFERENCE	FUS-0130
LOCATION	Sheffield
EMPLOYMENT	Permanent
HOURS	Full-time

THE CLIENT

FUSION is recruiting a Civil Engineer for an established engineering consultancy in Sheffield. The role sits within a civil engineering team delivering residential and commercial development work, with a particular focus on residential schemes and technical approvals.

The team is looking for someone who can work with a good degree of independence, take ownership of design tasks and help senior colleagues focus on wider project and team responsibilities. Rail-sector experience would be useful but is not essential.

THE ROLE

This is a project-delivery role positioned between Engineer and Senior Engineer level. You will be expected to take responsibility for civil engineering designs, lead projects as appropriate and work directly with clients and design teams.

The brief is deliberately open on exact grade. It is likely to suit an engineer with around two to four years' relevant consultancy experience who can work with a good degree of independence and progress toward greater technical and project responsibility.

KEY RESPONSIBILITIES

- Deliver civil engineering design work with limited supervision.
- Lead agreed projects or work packages from design through coordination and technical approval.

- Prepare calculations, drawings, reports and technical information suitable for issue.
- Attend design team meetings and coordinate with clients, consultants and other project stakeholders.
- Manage day-to-day design priorities and take responsibility for progressing assigned work.
- Contribute to residential and commercial schemes, including relevant technical approval processes.

PROJECT DELIVERY

- Take ownership of project information and identify technical issues early.
- Coordinate design inputs and respond to comments from clients and approving bodies.
- Maintain clear project records and support the consultancy's quality procedures.
- Work with senior colleagues while developing toward broader project leadership and client responsibility.

REQUIRED EXPERIENCE

- A degree in Civil Engineering or an equivalent qualification.
- Around two to four years' relevant civil engineering experience within consultancy, with the ability to work independently on design tasks.
- Experience delivering civil engineering designs within a consultancy or comparable design environment.
- Ability to lead agreed work packages or projects and contribute effectively in design team meetings.
- Experience liaising directly with clients and other project stakeholders.
- Clear written and verbal technical communication skills.

DESIRABLE EXPERIENCE

- Working toward Incorporated Engineer (IEng) or Chartered Engineer (CEng) status.
- Experience on residential development projects.
- Experience on commercial development projects.
- Experience within the rail sector.
