Senior Structural Engineer

JOB REFERENCE	FUS-0115
LOCATION	Billericay
EMPLOYMENT	Permanent
HOURS	Full-time

THE CLIENT

FUSION is recruiting a Senior Structural Engineer for a civil and structural engineering consultancy in Billerica. The appointment sits within the consultancy's structures team and is focused on residential structural design.

The role combines hands-on technical delivery with project management responsibility. You will work with design teams, clients and other project stakeholders while supporting the technical development of junior staff.

THE ROLE

This is a senior technical and project-delivery role for an engineer who can take ownership of structural design work and manage assigned projects. You will undertake complex structural calculations, develop design solutions and provide technical input across the project team.

Alongside the design work, you will coordinate stakeholders, manage scope, programme, resources and fees, maintain client relationships and mentor less experienced staff.

KEY RESPONSIBILITIES

- Lead and support structural engineering design work across residential projects.
- Undertake complex structural calculations and develop structural design solutions.
- Act as Project Manager on assigned projects, taking responsibility for coordinated delivery.
- Coordinate design teams and communicate clearly with clients and other project stakeholders.
- Manage project scope, programme, resources and fee performance.
- Mentor junior staff and provide practical technical support through project delivery.

PROJECT DELIVERY

- Take ownership of design development and technical delivery on assigned structural projects.
- Coordinate project information across the design team and relevant stakeholders.
- Monitor programme, resourcing, scope and fees as part of day-to-day project management.
- Maintain effective client relationships throughout project delivery.

REQUIRED EXPERIENCE

- Senior-level structural engineering experience within a consultancy or comparable design environment.

- Demonstrable residential structural-design experience.
- Ability to undertake complex structural calculations and develop design solutions with appropriate autonomy.
- Experience coordinating design teams and external project stakeholders.
- Experience acting as Project Manager or taking comparable responsibility for project delivery.
- Experience managing project scope, programme, resources and fees while working directly with clients.

DESIRABLE EXPERIENCE

- Progress toward Chartered Membership of ICE or IStructE.
