

Business Critical data movement for your Azure Platform

Protect your Azure data infrastructure with the highest level of security and privacy measures to keep your most sensitive data safe.

Fivetran Business Critical for Microsoft Azure

Business Critical is Fivetran's most secure data movement solution, unlocking advanced compliance and privacy features unavailable at other plan levels. For enterprises running on Azure, navigating complex security and compliance regulations with highly sensitive data to protect, the business critical tier is the end-to-end protection your data stack needs.

- Highly secure connections: Private networking to avoid all exposure to the internet
- Advanced access control: Complete authority over who has access to your data and when
- Ultimate platform confidence: Priority support and the highest level of security

		
Highly secure connections	Advanced access control settings	Ultimate platform confidence
• End-to-end data encryption between Fivetran and Azure via Azure Private Link • On-premises or hybrid deployment capabilities • High-volume, change data capture database replication • Data lineage integrations for total audit security • SCIM configuration for Microsoft Entra ID	• Customer managed keys for absolute, 24/7 control over your data access via Azure Key Vault • Role and team based user access permission settings • Restrict your data to a specified Azure cloud region - Virginia (1&2), Iowa, London, Netherlands, Toronto, Sydney, Singapore, Pune, Tokyo or Dubai (latest)	• PCI and DSS level 1 certification for processing credit card data • CCPA, GDPR, HITRUST, ISO and SOC2 certifications for regulatory compliance • Priority support with 1-hour response time and option for US-only support • Data-delivery SLAs • 1-minute sync frequency
